Samuel, 2017-01-31 Aging is a preoccupation shared by beauty bloggers serious journalists scientists doctors celebrities arguably all of adult America given the pervasiveness of the crusade against it in popular culture and the media We take our youth oriented culture as a given but as Lawrence R Samuel argues this was not always the case Old age was revered in early America in part because it was so rare Indeed it was not until the 1960s according to Samuel that the story of aging in America became the one we are most familiar with today aging is a disease that science will one day cure and in the meantime signs of aging should be prevented masked and treated as a source of shame By tracing the story of aging in the United States over the course of the last half century Samuel vividly demonstrates the ways in which getting older tangibly contradicts the prevailing social values and attitudes of our youth obsessed culture As a result tens of millions of adults approaching their sixties and seventies in this

decade do not know how to age as they were never prepared to do so Despite recent trends that suggest a more positive outlook getting old is still viewed in terms of physical and cognitive decline resulting in discrimination in the workplace and marginalization in social life Samuels concludes Aging in America by exhorting his fellow baby boomers to use their economic clout and sheer numbers to change the narrative of aging in America Your Body Can Talk, Revised 2nd Edition Susan Levy, D.C.,2014-09-29 This book about the art and application of Clinical Kinesiology introduces the energetic system that links mind and body It shows how the body can talk and therefore be used as a diagnostic tool and to determine which healing approach will best suit an individual Clinical Kinesiology allows us to interpret this new body talk This method of muscle testing reads the body s innate wisdom when asked a question or presented with a stimulus the muscles respond clearly either strongly or weakly This system which expedites the application of acupuncture also helps realign the body s energy imbalances Readers will find specific methods of fighting disease that emphasize the dangers of unnecessary drugs antibiotics and immunization and the need for a fortified immune system especially through natural foods Other topics include rebuilding the body s ecology after an overgrowth of unhealthy bacteria or Candidiasis how to maintain the integrity of the energy system through minimizing exposure to unhealthy electromagnetic fields or EMFs optimal health for woman and issues of men s health New material in this 2nd edition includes an extensive chapter on children s health which addresses pregnancy birthing procedures and breastfeeding and illustrates a road map for giving your children and children yet to come the best potential for optimal health **The Quantum Doctor** Amit Goswami,2011-01-01 The quantum physicist author of The Self Aware Universe calls for mainstream applications of integrated medicine in the health care industry presenting bold interpretations of leading alternative medicines to explain how they can be an effective part of an integrated medical practice Original *Ethical Dimensions of Geriatric Care* S.F. Spicker,S.R. Ingman,Ian Lawson,2012-12-06 There is both a timeliness and a transcendent rightness in the fact that scholars clinicians and health professionals are beginning to examine the ethics based components of decision making in health care of the elderly Ethics as the discipline concerned with right or wrong conduct and moral duty pervades hospital rooms nursing home corridors physicians offices and the halls of Congress as decisions are made that concern the allocation of health related services to individuals and groups in need In particular care of older persons recently has received disproportionate attention in discussions of ethics and clinical care Age alone of course should not generate special focus on ill individuals about whom concerns arise based on value conflicts tacitly involved in the delivery of health care Having said that age is not the principal criterion for attention to ethics based concerns in health care it must be acknowledged that old people have a high prevalence of conditions that provoke interest and put them in harm s way if value conflicts are not identified and seriously addressed Issues that concern autonomy the allocation of scarce resources inter generational competition and conflict the withholding of treatment in treatable disease and substitute and proxy decision making for the cognitively impaired all have
