McNeill, 2022-03-01 This volume brings together a set of key articles from the last 30 years pertaining to the environmental history of the Pacific basin It aims to treat the islands and waters of the Pacific as well as the lands around the Rim from New Zealand to Japan to California to Chile and is the first work of environmental history to take this inclusive view of the Pacific basin The focus is

mainly on recent centuries but as environmental history requires at times the work also takes the very long view of millennia. Several of the articles seek to bring a broad Pacific perspective to bear on their subjects while others use Pacific basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture. The book includes a bibliography of Pacific basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field.

Australia's Toxic Medical Culture Vicki Adele Pascoe, 2018-10-11. This book explores dominance in Australia's medical culture through the positioning of international medical graduates (IMGs). It argues that IMGs are othered and ultimately positioned as an underclass, a positioning validated and reinforced by the intersecting inequalities of class, race, and nation. It also suggests that the positioning of IMGs is organised through the dimensions of structural power, hegemonic power, and interpersonal power, which allow an exploration of power relations between the structures of the health system, the Australian medical profession, and the agency of IMGs. The Australian narrative presented to the world espouses a community of social justice and human rights. Instead, an historical lens traces the formation and persistence of difference represented in ethnocentrism, racism, and xenophobia from 1788 to the present. The research presented is multidisciplinary in scope. An anti-oppressive theoretical framework enables the voices of lived experience to penetrate throughout, and a social justice platform engages the participants and the reader into the interwoven conversations. The data set comprises a focus group, 10 individual interviews with IMGs, and a selection of inquiry submissions revealing rich and sometimes shocking evidence to paint a stark picture. Other medical voices join the conversation via media responses to revelations of experiences not only by IMGs but also by Australian-trained doctors. It exposes a toxic culture endemic with bullying and sexual harassment. This book is of interest to practitioners, researchers, and administrators in the fields of medical education, human resource management, legal studies, health sciences, social sciences, health services, government departments, universities, and hospitals, as well as those tasked with duty of care and the provision of a safe workplace. The voices gifted to this study raise awareness of current issues within medicine in Australia at a very personal level and begin to formulate a policy and practical response to address these disturbing revelations.

Watershed Anika Gauja, Marian Sawyer, Jill Sheppard, 2023-08-10. Australia's 2022 federal election played out in ways that few could have expected. Not only did it bring a change of government, it also saw the lowest number of primary votes for the major parties and the election of the greatest number of Independents to the lower house since the formation of the Australian party system. The success of the Teal Independents and the Greens, along with the appetite voters showed for doing politics differently, suggested that the dominant model of electoral competition might no longer be the two-party system of Labor versus Liberal. At the very least, the continued usefulness of the two-party preferred vote as a way of conceptualising and predicting Australians' voting behaviour has been cast into serious doubt. In *Watershed*, leading scholars analyse the election from the ground up, focusing on the campaign issues, the actors involved, and the successes and failures.

of campaign strategy and show how digital media visual politics and fake news are changing the way politics is done Other topics include the impact of COVID 19 and the salience of climate gender and integrity issues as well as voting patterns and polling accuracy This authoritative book is indispensable for understanding the disenchantment with the major parties the rise of Community Independents and the role of the Australian Greens and third parties Watershed is the eighteenth in the ANU Press federal election series and the tenth sponsored by the Academy of the Social Sciences in Australia
