

Year 11 into 12 Philosophy and Ethics Bridging Project

Developments in religious thought - Christianity

How did the Christian belief in God originate?

Revelation is all about God showing himself to man.

There are **two ways** of describing revelation:

General revelation involves the witness of the natural world to the existence of God. Knowledge of God is gained through the natural world i.e. looking at the beauty of the natural world and feeling the presence of God. This is known as Natural theology.

Specific revelation relates to witness of a personal nature e.g. historical events, miracles, personal experiences i.e. miracles. Sacred teachings are viewed as vehicles of specific revelation too. Different approaches across and within religions will determine the type of revelation occurs.

So how is revelation gained by human beings?

Task:

Choose two of the following examples of revelation, and research both: **the conversion of Saul (the Bible, Acts 9:1-22), the Toronto Blessing, St. Bernadette of Lourdes, the day of Pentecost (the Bible, Acts 2:1-4), the Teleological argument for God's existence, the moral argument for God's existence.**

Then, write a detailed response to the following questions:

1. Describe this revelation – what is believed to have happened/ how does this theory try to show that God exists?
2. How is God shown through this experience? i.e. does he speak to the person, is God experienced through nature, is it a theory, etc.
3. How might religious and non-religious people interpret this event/belief?
4. Do you think that this event/belief/theory shows that God exists?

Bring your project, printed and ready to hand in, to the first Philosophy and Ethics lesson you have with **Ms Cannon** in **September**. Make sure you come and ask for help beforehand if you are stuck.

Good Luck!

The New Midlife Self-Writing Emily O. Wittman,2021-11-04 In The New Midlife Self Writing Wittman treats recent self writing by Rachel Cusk Roxane Gay Sarah Manguso and Maggie Nelson carefully situating these vital midlife works within the history of self writing She argues that they renew and redirect the autobiographical trajectories characteristic of earlier self writing by switching their orientation to face the future and by celebrating midlife as a growing season a time of Bildung In each chapter writer by writer she demonstrates how the midlife self writers in question trace confident and future oriented paths through the past rejecting triumphalism and complicating both identity and individualism just as they refine and redefine genres Exploring these midlife self writers as chroniclers of Generation X s midlife in particular Wittman coins the term digital absence to map their unique relationship to new forms of knowledge and knowledge gathering in an Information Age that they are both of and set apart from She theorizes that their works share a

pedagogical style a style characterized by clarity exposition and classical rhetoric as well as a concern with the classroom offering a warrant for reading them in pedagogical terms in concert with traditional scholarly approaches Furthermore Wittman presents readers with a look ahead at the future of midlife self writing as well as self writing overall concluding that we might be looking at the scholarship of the future
