*The Peopling of Britain* Paul Slack, Ryk Ward, 2002-03-07 This volume reviews the way in which over the centuries the evolving human presence in Britain has shaped the British landscape and how in turn the British landscape has moulded the development of British communities From the beginnings of human settlement Britain has

represented a final frontier for successive waves of colonists each bringing its own set of cultural adaptations and its own ethos into the landscape Over time both landscape and culture have matured from raw frontier to settled centre moulded by the advent of agriculture towns and industry and by streams of migration both within Britain and from outside The chapters in this book by archaeologists historians and geographers present an interdisciplinary and accessible account of that long process Together they trace the various phases of the story showing how much of it has only recently been unearthed and how much remains to be discovered

**The Ancient Human Occupation of Britain** Nick Ashton, Simon Lewis, Chris Stringer, 2010-11-12 The Ancient Human Occupation of Britain Project AHOB funded by the Leverhulme Trust began in 2001 and brought together researchers from a range of disciplines with the aim of investigating the record of human presence in Britain from the earliest occupation until the end of the last Ice Age about 12 000 years ago Study of changes in climate landscape and biota over the last million years provides the environmental backdrop to understanding human presence and absence together with the development of new technologies This book brings together the multidisciplinary work of the project The chapters present the results of new fieldwork and research on old sites from museum collections using an array of new analytical techniques Features an up to date treatment of the record of human presence in the British Isles during the Palaeolithic period 700 000 10 000 years before present Takes multidisciplinary approach that includes archaeology geochemistry geochronology stratigraphy and sedimentology Coincides with the culmination of the AHOB project in 2010 providing a benchmark statement on the record of human occupation in Britain that can be utilized and tested by future research

*Prehistoric Britain* Timothy Darvill, 2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain's ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most

comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject
