Krause,Omer Sergi,2025-07-21 Recent studies have demonstrated that ancient Near Eastern societies considered themselves as part of one social fabric divided not by mode of life or place of residence but according to traditional associations of kin Kinship relations appear to maintain their essential integrity over long periods of time even within complex political organizations In the past it was common to view state formation as an evolutionary process from

tribe to state during which former kinship relations and tribal identities dissolve in face of the political identity imposed by the state Today however it seems that there were no evolutionary relations between the tribe and the state as they both represent identities that coexist at the same time It is against this background that a common structural element of ancient Levantine polities emerges their fragmented nature mostly based on an overarching concept of kinship This book presents studies of different polities and societies from the Bronze and Iron Ages Levant and beyond highlighting their kin based social and political structures interactions and ultimate formations as may be gleaned from both material and textual sources

Cobb's Abridgment of J. Walker's Critical Pronouncing Dictionary and Expositor of the English Language

John Walker,Lyman Cobb,1834 Drug and Chemical Markets ,1926 Beyond Israel and Aram Assaf Kleiman,2022-11-21 In this study Assaf Kleiman discusses the settlement history and material culture of complex communities that flourished in the shadow of Israel and Aram Damascus A detailed examination of the finds from the Lebanese Beqaa through the Sea of Galilee to the Irbid Plateau offers an exceptional portrayal of the developments experienced by these communities before and after the emergence of the territorial kingdoms these advances include the rise and fall of local polities the adoption and rejection of certain cultural traits and even the background for the dissemination of writing The study provides therefore a new and exciting way to look at the political relations and cultural exchange between the indigenous communities and the elites that ruled over them Rather than interpreting the local populations simply as Israelites or Aramaeans the archaeological record reveals their diversity and highlights the discrete historical trajectories they followed from the 12th to 8th centuries BCE
