Lucrèce et les sciences de la vie P. H. Schrijvers, 1999 This collection of 11 studies provides a new discussion of Lucretius History of the Human Mankind and of other topics Lucretius explanation of sleep dreams and optical illusions in relationship to other philosophical and scientific doctrines of Antiquity **Lucrèce et les sciences de la vie** Schrijvers, 2018-07-17 This volume contains a collection of 11 studies on the philosophical and scientific background of Lucretius De rerum natura The studies 1-7 form a running commentary on the history of ideas in Drn 5 780-1160 Lucretius famous description of the History of Human Mankind 8-10 discuss some topics from book 4 sleep dreams optical illusions in relationship to other philosophical doctrines and ancient medical thought the last study 11 treats the use of analogy by Lucretius Lucretius: Poetry, Philosophy, Science Daryn Lehoux, A. D. Morrison, Alison Sharrock, 2013-05-09 The volume unites the three aspects poetry philosophy and science found in Lucretius De Rerum Natura With ten original essays and an analytical introduction the volume aims not only to combine different approaches within single covers but to offer responses to the poem by experts from all three scholarly backgrounds Lucretius on Creation and Evolution Gordon Lindsay Campbell, 2003 Lucretius account of the origin of life the origin of species and human prehistory is the longest and most detailed account extant from the ancient world It gives an anti teleological mechanistic theory of zoogony and the origin of species that does away with the need for any divine aid or design in the process and accordingly it has been seen as a forerunner of Darwin's theory of evolution This commentary locates Lucretius in both the ancient and modern contexts and treats Lucretius ideas as very much alive rather than as historical concepts The recent revival of creationism makes this study particularly relevant to contemporary debate and indeed many of the central questions posed by creationists are those Lucretius attempts to answer

**Lucrèce et les sciences de la vie** P. H. Schrijvers, 1999 Approaches to Lucretius Donncha O'Rourke, 2020-07-16 Both in antiquity and ever since the Renaissance Lucretius De Rerum Natura has been admired and condemned for its startling poetry its evangelical faith in materialist causation and its seductive advocacy of the Epicurean good life Approaches to Lucretius assembles an international team of classicists and philosophers to take stock of a range of critical approaches to which this influential poem has given rise and which in turn have shaped its interpretation including textual criticism the text's strategies for engaging the reader with its author and his message the atomology that posits a correlation of the letters of the poem with the atoms of the universe the literary and philosophical intertexts that mediate the poem and the political and ideological questions that it raises Thirteen essays take up a variety of positions within these traditions of interpretation innovating within them and advancing beyond them in new directions Lucrezio e il criterio di verità epicureo Chiara Rover, 2025-06-02 Was Lucretius a fundamentalist Epicurean and a mere repeater of his Master's words or did he emerge as an innovative philosopher in his own right The relationship between Lucretius and Epicurus remains a complex and unresolved issue in Epicurean scholarship To what extent was Lucretius aware of intellectual debates following Epicurus and

how did he contribute to them The volume examines these questions through an epistemological lens focusing on the Canon of the science of the criterion Epicurus who died around 271-270 BC did not fully witness firsthand the impact of his doctrines on Hellenistic epistemology nor could he defend them against subsequent criticisms tasks left to his successors By systematically examining the doctrine of the criterion of truth in *De rerum natura* this study shows how Lucretius actively engaged in the defence and evolution of early Epicureanism Despite his fidelity to Epicurus the Poet displayed a remarkable philosophical ability to independently rethink and rework materials from both within the Epicurean tradition and beyond thereby reiterating on a broader scale the non-monolithic nature of the Canon It appeals to scholars interested in Hellenistic and Roman philosophy alike

**A Commentary on Lucretius De Rerum Natura** Don Fowler, 2002 Lucretius' theory of atomic motion is one of the most difficult and technical parts of *De rerum natura* and for that reason has hitherto been neglected by commentators This is the first commentary to take account of the remarkable discoveries and re-evaluations in the field of Hellenistic philosophy over the past thirty years which have been stimulated by the publication of many more Epicurean fragments from Herculaneum

*Medicine and Paradoxography in the Ancient World* George Kazantzidis, 2019-08-05 The present volume offers a systematic discussion of the complex relationship between medicine and paradoxography in the ancient world For a long time the relationship between the two has been assumed to be virtually non-existent Paradoxography is concerned with disclosing a world full of marvels and wondrous occurrences without providing an answer as to how these phenomena can be explained Its main aim is to astonish and leave its readers bewildered and confused By contrast medicine is committed to the rational explanation of human physis which makes it in a number of significant ways incompatible with thauma This volume moves beyond the binary opposition between rational and non-rational modes of thinking by focusing on instances in which the paradox is construed with direct reference to established medical sources and beliefs or inversely on cases in which medical discourse allows space for wonder and admiration Its aim is to show that thauma rather than present a barrier functions as a concept which effectively allows for the dialogue between medicine and paradoxography in the ancient world

**Blood, Sweat and Tears - The Changing Concepts of Physiology from Antiquity Into Early Modern Europe** Manfred Horstmanshoff, Helen King, Claus Zittel, 2012-06-22 Drawing on the methods of a wide range of academic disciplines this volume shifts the focus of the history of the body exploring the many different ways in which its physiology and its fluids were understood in pre-modern European thought

**Lucretius and the Early Modern** David Norbrook, S. J. Harrison, Philip R. Hardie, 2016 The rediscovery in the fifteenth century of Lucretius' *De rerum natura* was a challenge to received ideas The poem offered a vision of the creation of the universe the origins and goals of human life and the formation of the state all without reference to divine intervention It has been hailed in Stephen Greenblatt's best-selling book *The Swerve* as the poem that invented modernity But how modern did early modern readers want to become This collection of essays offers a series of case studies which demonstrate the sophisticated ways in which

some readers might relate the poem to received ideas assimilating Lucretius to theories of natural law and even natural theology while others were at once attracted to Lucretius subversiveness and driven to dissociate themselves from him The volume presents a wide geographical range from Florence and Venice to France England and Germany and extends chronologically from Lucretius contemporary audience to the European Enlightenment It covers both major authors such as Montaigne and neglected figures such as Italian neo Latin poets and is the first book in the field to pay close attention to Lucretius impact on political thought both in philosophy from Machiavelli through Hobbes to Rousseau and in the topical spin put on the De rerum natura by translators in revolutionary England It combines careful attention to material contexts of book production and distribution with close readings of particular interpretations and translations to present a rich and nuanced profile of the mark made by a remarkable poem

**Being Alone in Antiquity** Rafał Matuszewski, 2021-11-22 This volume aims to provide an interdisciplinary examination of various facets of being alone in Greco Roman antiquity Its focus is on solitude social isolation and misanthropy and the differing perceptions and experiences of and varying meanings and connotations attributed to them in the ancient world Individual chapters examine a range of ancient contexts in which problems of solitude loneliness isolation and seclusion arose and were discussed and in doing so shed light on some of humankind s fundamental needs fears and values

**Empedocles Redivivus** Myrto

Garani,2007-12-12 This book consists of a thorough study of Lucretius poetic and philosophical debt to Empedocles focusing on their respective uses of analogy and examining how both poets turn these poetic techniques to use in their epistemological approaches to nature

**Valuing the Past in the Greco-Roman World** Christoph Pieper,James Ker,2014-05-28 The classical tradition is no invention of modernity Already in ancient Greece and Rome the privileging of the ancient played a role in social and cultural discourses of every period A collaboration between scholars in diverse areas of classical studies this volume addresses literary and material evidence for ancient notions of valuing or disvaluing the deep past from approximately the fifth century BCE until the second century CE It examines how specific communities used notions of antiquity to define themselves or others which models from the past proved most desirable what literary or exegetic modes they employed and how temporal systems for ascribing value intersected with the organization of space the production of narrative or the application of aesthetic criteria
