Every walk of life is represented in these pages from powerful monarchs and politicians to talented artists and writers from inquisitive scientists to outspoken activists Each biography follows a standardized format recounting the woman's life and accomplishments discussing the challenges she faced within her particular time and place in history and exploring the lasting legacy she left A chronological listing of biographies makes it easy for readers to zero in on particular time periods while a further reading list at the end of each essay serves as a gateway to further exploration and study High interest sidebars accompany many of the biographies offering more nuanced glimpses into the lives of these fascinating women

The World from Beginnings to 4000 BCE Ian Tattersall, 2008-02-01 To be human is to be curious And one of the things we are most curious about is how we came to be who we are how we evolved over millions of years to become creatures capable of inquiring into our own evolution In this lively and readable introduction renowned anthropologist Ian Tattersall thoroughly examines both fossil and archaeological records to trace human evolution from the earliest beginnings of our zoological family Hominidae through the appearance of Homo sapiens to the Agricultural Revolution He begins with an accessible overview of evolutionary theory and then explores the major turning points in human evolution the emergence of the genus Homo the advantages of bipedalism the birth of the big brain and symbolic thinking Paleolithic and Neolithic tool making and finally the enormously consequential shift from hunter gatherer to agricultural societies 10 000 years ago Focusing particularly on the pattern of events and innovations in human biological and cultural evolution Tattersall offers illuminating commentary on a wide range of topics including the earliest known artistic expressions ancient burial rites the beginnings of language the likely causes of Neanderthal extinction the relationship between agriculture and Christianity and the still unsolved mysteries of human consciousness Complemented by a wealth of illustrations and written with the grace and accessibility for which Tattersall is widely admired *The World from Beginnings to 4000 BCE* invites us to take a closer look at the strange and distant beings who over the course of millions of years would become us

Footprints from Fossils to Gallows Russell H. Tuttle, 2023-06-30 *Footprints from Fossils to Gallows* Adventures in Paleoanthropology Primatology and Forensic Anthropology University of Chicago professor Russell Tuttle was privileged to study one of the most dramatic and provocative fossil discoveries of the twentieth century 3 66 million year old MA bipedal footprint trails at Laetoli Northern Tanzania This adventure concurrently led to invitations to join a team of barristers and solicitors in defense of two men accused of involvement in a murder in Winnipeg Canada The Queen's Counsel for the prosecution had engaged a certified forensic anthropologist Louise M Robbins 1928 1987 who had worked on a different section of the Laetoli footprints trails before him Her claim to have developed a new science of human footprint analysis for forensic use and wild speculations about the makers of some Laetoli prints prompted him to question her scientific ability and method of footprint analysis Tuttle 1986 and the judgment of fellow forensic anthropologists who supported her testimonials We hope this book might lead to a better understanding of how science can serve our courts by using novel and well established results of scientific

research less adversarially with a view to achieve justice for all parties affected by crimes Particularly claims of new forensic methods should be tested thoroughly by peer review outside the courtroom before employment to decide matters of life and death Dr Robbins s decade of quackery is a prime example of how justice might be better served by early thorough scrutiny of a claimant s novel methods and general scientific expertise In addition to relevant literature my main source is correspondence among Drs Robbins Mary Leakey and Michael Day court records of barristers and myself from copies of correspondence in my files dating back to 1980 and Anthropology Archives at the Smithsonian Institution and detailed reports prepared by Dr Robbins and R Tuttle concerning a criminal case in Winnipeg Canada Although I did not set out to write the book as a memoir it quickly became thus as I recalled the experiences that shaped me as a paleoanthropologist Previously my research was on functional morphology history of anthropology and evolutionary biology in the USA and Europe The Origin of Humanness in the Biology of Love Humberto Maturana Romesín, Gerda Verden-Zöller, 2012-02-21

The central concern of this book is us human beings The authors basic question is How is it that we can live in mutual care have ethical concerns and at the same time deny all that through the rational justification of aggression The authors answer this basic question indirectly by providing a look into the fundamentals of our biological constitution concentrating on what they term emotioning that is the flow of emotions in daily life that guides the flow of the systemic conservation of a manner of living Maturana and Verden Zöller claim that the fundamental emotion that gave rise to humans as sapient languaging beings was love and that this remains our fundament even when other emotions become socially prevalent Mere Creation
