Ludic Picturebooks in Early Childhood Education Cynthia Birrer, 2003-12-01 *Early Foreign Language Learning and Teaching* Marianne Nikolov, Stela Letica Krevelj, 2024-10-15 Over the past six decades the field of teaching modern foreign languages to young learners has come a long way from the early surmises about the advantages of a young start to today's widespread integration of foreign languages into curricula in public and private schools. The chapters in this book bring together internationally renowned researchers who have been vocal in establishing early language teaching and learning as an independent area of research and novice voices who represent a new generation of devoted researchers to present a state of the art volume on the topic. The authors address key questions about young learner second foreign language L2 FL development, methodological issues when conducting research with young learners, L2 FL teaching pedagogy, language education policy, technology enhanced learning and assessment. Together the chapters capture the reality of early FL development in the context of a globalized world and will be of great interest to researchers and postgraduate students of SLA and Applied Linguistics, specifically in the field of early language development and teaching languages to young learners.

Preschool Bilingual Education Mila Schwartz, 2018-05-23 This volume provides an up to date collection of key aspects related to current preschool bilingual education research from a socio linguistic perspective. The focus is on preschool bilingual education in multilingual Europe which is characterized by diverse language models and children's linguistic backgrounds. The book explores the contemporary perspectives on early bilingual education in light of the threefold theoretical framework of child's teachers and parents' agencies in interaction in preschool bilingual education. Five significant theoretical concepts are promoted in this volume: the ecology of language learning, an educational partnership for bilingualism, a notion of agency in early language development and education, language conducive contexts and language conducive strategies. The volume examines preschool bilingual education as embedded in specific socio cultural contexts on the one hand and highlights its universal features on the other. The book is a fundamental read for scholars and students of second language teaching, preschool education and bilingual education in multilingual and multicultural societies. 40

Innovative Programs in Early Childhood Education Berlie J. Fallon, 1973 Childhood by Design Megan

Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary material turn and social historical studies of childhood, *Childhood By Design: Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio cultural constructions of childhood but consider how design culture actively shaped commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern

invention of childhood what we might refer to as objects for a childhood by design Childhood by Design explores dynamic tensions between theory and practice discursive constructions and lived experience as embodied in the material culture of childhood Contributions from and between a variety of disciplinary perspectives including history art history material cultural studies decorative arts design history and childhood studies are represented critically linking historical discourses of childhood with close study of material objects and design culture Chronologically the volume spans the 18th century which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children s use through the 19th century expansion of factory based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household towards the intersection of early 20th century child centered pedagogy and modernist approaches to nursery and furniture design through the changing consumption and sales practices of the postwar period marketing directly to children through television film and other digital media and into the present where the line between the material culture of childhood and adulthood is increasingly blurred

Ein spiritueller Zugang Donna Maria Thomas, 2023-09-25 Telepathie Vorhersagungen Medialität Umgang mit unsichtbaren Wesen Gespräche mit verstorbenen Verwandten luzides Träumen Gipfelerfahrungen Astralreisen Nahtod Erfahrungen bei Kindern und Jugendlichen Forschungen die die Autorin mit Kindern auf der ganzen Welt durchgeführt hat Ungewöhnliche anomale Erfahrungen von Kindern und Jugendlichen werden eher als Ergebnis einer beraktiven Vorstellungskraft oder was noch mehr schadet als krankhaft abgetan Mit Donna Thomas haben junge Menschen endlich eine Gesprächspartnerin die nicht über sie sondern mit ihnen forscht In diesem Buch das auf aktuellen wissenschaftlichen Erkenntnissen beruht und durchdrungen ist von echter Empathie für Kinder und Jugendliche die eine solche Erfahrungen gemacht haben wird ein neuer Interpretationsrahmen vorgeschlagen der auf den neuesten Erkenntnissen der Bewusstseinsforschung basiert Welcher Elternteil würde sich nicht freuen endlich über die nötigen Informationen zu verfügen um die ungewöhnlichen Wahrnehmungen seines Kindes besser verstehen zu können Welcher Fachmann würde nicht dankbar wenn er die Instrumente zur Verfügung hätte um beurteilen zu können ob eine therapeutische oder pharmakologische

Behandlung wirklich der richtige Weg für ein aufflügendes Kind ist. Das Buch ist eine bahnbrechende Arbeit mit dem Potenzial, die derzeitige klinische Praxis grundlegend zu verändern. Es ist auch ein Muss für alle, die Einblicke in diese ungewöhnlichen Phänomene suchen, die ihre Kinder und sie selbst eines Tages erleben könnten. Unsere Kultur hat sich zu lange darauf konzentriert, Kinder zu unterrichten und dabei vergessen, dass wir enorm viel von ihnen lernen können. Das Buch von Donna Thomas ist Pflichtlektüre, denn es zeigt deutlich, dass die Kindheit eine besondere spirituelle Phase unseres Lebens ist, in der wir leichter Zugang zu spirituellen Erfahrungen haben. Das Buch zeigt, dass wir unsere normalen Annahmen über die Kindheit umglichenweise umdrehen müssen. In gewisser Weise sind die Welterfahrungen von Kindern reicher und tiefer als die von Erwachsenen, und wir müssen daher Wege finden, ihren Sinn für das Staunen wiederzugewinnen. Zumindest müssen wir die außergewöhnlichen Erfahrungen von Kindern wertschätzen, anstatt sie mit Verachtung zu behandeln. Dieses Buch ist ein wichtiger Schritt in diese Richtung.

Dr. Steve Taylor PhD **Working with Young Children in Museums** Abigail Hackett, Rachel Holmes, Christina MacRae, 2020-02-03

Working with Young Children in Museums makes a major contribution to the small body of extant research on young children in museums, galleries and heritage sites. Bridging theory and practice, the book introduces theoretical concepts in a clear and concise manner whilst also providing inspirational insights into everyday programming in museums. Structured around three key themes, this volume seeks to diverge from the dominant socio-cultural learning models that are generally employed in the museum learning literature. It introduces a body of theories that have variously been called new materialist, spatial, posthuman and Deleuzian theories, which enable a focus on the body, movement and place, and which have not yet been widely shared or developed with the museum sector or explicitly connected to practice. This book outlines these theories in an accessible way, explaining their usefulness for conceptualising young children in museums and connecting them to practical examples of programming in a range of locations via a series of contributed case studies. Connecting theory to practice for readers in a way that emphasises possibility, Working with Young Children in Museums should be essential reading for museum practitioners working in a range of institutions around the world. It should be of equal interest to researchers and students engaged in the study of museum learning, early childhood education and children's experiences in museums.

Using Graphic Novels in the STEM Classroom William Boerman-Cornell, Josha Ho, David Klanderman, Sarah Klanderman, 2023-11-02. This book provides everything STEM teachers need to use graphic novels in order to engage students, explain difficult concepts and enrich learning. Drawing upon the latest educational research and over 60 years of combined teaching experience, the authors describe the multimodal affordances and constraints of each element of the STEM curriculum. Useful for new and seasoned teachers alike, the chapters provide practical guidance for teaching with graphic novels, with a section each for Science, Technology, Engineering and Mathematics. An appendix provides nearly 100 short reviews of graphic novels arranged by topic, such as cryptography, evolution, computer coding, skyscraper design, nuclear physics, auto repair, meteorology and human physiology, allowing the teacher to find multiple graphic novels to enhance almost any unit. These include graphic novel biographies of Stephen Hawking, Jane Goodall, Alan Turing, Rosalind Franklin, as well as popular titles such as *T Minus* by Jim Ottaviani, *Brooke Gladstone's The Influencing Machine*, *Theodoris Andropoulos's Who Killed Professor X* and *Gene Yang's Secret Coders* series.

Nostalgia in Transition, 1780-1917 Linda Marilyn Austin, 2007. Referred to long ago as a disease of Swiss soldiers and Highland regiments far from home, nostalgia became known in the 1920s as more of a fleeting rather than debilitating condition. Yet what caused this shift in our collective understanding of the term? In *Nostalgia in Transition, 1780-1917*, Linda M. Austin traces the development of nostalgia from a memory disorder in the eighteenth century to its modern formulation as a pleasant recreational distraction. Offering a paradigm for and analysis of nostalgic memory as it operates in various attempts to reenact the past, Austin explains both the early and the modern understanding of this phenomenon. Beginning with an account of nostalgia's transformation from an acute form of melancholia and homesickness into elegiac expression and idyllic representation, Austin goes on to examine an array of texts from poetic meditations on nostalgia in the first half of the nineteenth century to the popular adult souvenirs of childhood in the second half. She shows how, in novels by Hardy, in elegies and lyrics by Arnold Tennyson and Emily Brontë, in illustrations by Kate Greenaway and Helen Allingham, and in late Victorian cultural histories of the cottage, nostalgia acts as a collective rather than an individual reenactment of an invented rather than a remembered past or place. For students and scholars interested in the Victorian era as well as in Romanticism and modernism, *Nostalgia in Transition* provides a well

rounded perspective on how and why our understanding of nostalgia has changed over time **The Athenæum** ,1848
