 United Nations,2004-01-01 Using data on three countries in sub Saharan Africa this report compares macro and microlevel
 approaches to determine soil nutrient balances with an innovative mesolevel approach It highlights the added value that a
 mesolevel approach can provide in terms of its usefulness to mesolevel stakeholders in articulating and targeting scale
 specific soil fertility enhancing measures and its validity as an entry point for policy makers and private sector intervention
 Contains numerous color figures and tables Nile River Basin Assefa M. Melesse,2011-03-28 This book presents results of
 scientific studies ranging from hydrological modelling to water management and policy issues in the Nile River basin It
 examines the physical hydrometeorological and hydrogeological description of the basin along with analysis in understanding
 the hydrological processes of the basin under the changing land use stemming from population pressure and increased
 natural resources tapping The book discusses the increased impact of climate change on the river flows and such issues as
 water availability and demand management and policy to offset the imbalance between demand and available resources This
 book will be of interest to researchers practitioners water resources managers policy makers as well as graduate and
 undergraduate students It is a useful reference text for ecohydrology arid zone hydrology hydrology of transboundary rivers

 documentation summarizes information on the structure of GAEZ methodology and provides information on updates of input
 data and model procedures from GAEZ v3 **The Economics of Global Allocations of the Green Climate Fund** S.
 Niggol Seo,2019-06-04 This book provides an incisive and economic assessment of the global warming adaptation policy and
 programs carved out by the United Nations Framework Convention on Climate Change the Green Climate Fund GCF by
 relying on the four scientific traditions that have been advanced on the economics of adaptation to climate change in
 agricultural and natural resource enterprises Substantially expanding and refocusing on the book Micro behavioral

Economics of Global Warming Modeling Adaptation Strategies in Agricultural and Natural Resource Enterprises published by Springer in 2015 this book elucidates the theories and summarizes the empirical results and predictions from the four traditions of adaptation modelling a microbehavioral economic model of adaptation an agronomic economic modelling a statistical model of yield productivity changes and an ecosystem model of climate change impacts The four modeling traditions are freshly analyzed and applied to the assessments of the 93 GCF funded projects and programs through the end of 2018

The State of the World's Land and Water Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2013-06-17 The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources It is an advocacy report to be published every three to five years and targeted at senior level decision makers in agriculture as well as in other sectors SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation SOLAW focuses on these key dimensions of analysis i quantity quality of land and water resources ii the rate of use and sustainable management of these resources in the context of relevant socio economic driving factors and concerns including food security and poverty and climate change This is the first time that a global baseline status report on land and water resources has been made It is based on several global spatial databases e g land suitability for agriculture land use and management land and water degradation and depletion for which FAO is the world recognized data source Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions

Global Climate Change and Tropical Ecosystems John M. Kimble, B.A. Stewart, 2019-04-04 Tropical ecosystems the regions between the tropics of Cancer and Capricorn play an important role in global processes economic issues and political concerns In their natural state tropical ecosystems support a large quantity of above and below ground biomass and constitute a major part of the terrestrial carbon pool Conversion of the natural ecosystem to agriculture and forestry ecosystems disturbs this ecological balance Global Climate Change and Tropical Ecosystems presents data on carbon pool fluxes from case studies in 12 countries in tropical regions The chapters cover Characteristics of tropical ecosystems Soil and biotic carbon pools Impacts of land use and soil management Slash and burn practices Crop residue and fertility management This volume adds to the understanding of pedospheric processes in tropical ecosystems and how to better use soils as a sink for carbon dioxide and other greenhouse gases With Global Climate Change and Tropical Ecosystems you will understand the link between soil productivity environmental quality and the global carbon cycle not only in these ecologically sensitive regions but worldwide

Soil Science in Italy Carmelo Dazzi, Anna Benedetti, Giuseppe Corti, Edoardo A. C. Costantini, 2024-05-03 History is generally defined as the study of past events particularly in human affairs and is mostly understood when presented chronologically That's why someone also defined it as

the chronological record of the past Knowing the past is extremely important for any society and human being Past gives us insights into our evolving behavior in many matters of life The book is seen as a unique opportunity to preserve the memory of the Italian history of soil science It represents a milestone and a cultural heritage Moreover the book is a sort of ideal bridge between the pioneers of soil science in Italy and the young generation of researchers contributing to spreading awareness of the importance of soil as a fundamental resource

Development of Water Resources in India Vikas Garg,Vijay P. Singh,Vijay Raj,2017-06-10 This proceedings volume with more than 30 chapters is based on the presentations given at the National Conference on Water Resources and Hydropower WRHP 2016 and represents the state of the art in water resources in India It includes experimental investigations field studies theoretical developments numerical methods as well as engineering achievements in water resources The contributions are organised under four main topics Water Resources and Management covers the issues related to water resources planning and management water conservation flood mitigation policies and governance conflict over rivers and planning of groundwater evolution Assessment of Sedimentation Surface water quality Rainfall assessment Climate Change and Global Warming includes chapters on the impact of climate on water resources and groundwater hydrological impacts of climate change Ground Water Contaminants Assessment of Evaporation and evapotranspiration effects on global warming Hydraulic Structures presents contributions on fluvial hydraulics flow through Weirs Open Channel flow river flood control scour and erosion dam and downstream block failures and protection Losses in pipes By combining these topics the book provides a valuable resource for practitioners and researchers including field engineers academicians planners health specialists disaster managers decision makers and policy makers engaged in various aspects of water resources and hydropower The WRHP 2016 was organised in association with the Indian Institute of Technology Roorkee Uttrakhand Jal Vidyut Nigam Limited and the Indian Society for Hydraulics Pune and was held in University of Petroleum and Energy Studies Dehradun India from June 17 18 2016

Soft Computing and Geospatial Techniques in Water Resources Engineering Manish Pandey,K. V. Jayakumar,Manali Pal,Vijay P. Singh,2024-12-01 This book comprises proceedings of the 28th International Conference on Hydraulics Water Resources River and Coastal Engineering HYDRO 2023 It focuses on emerging opportunities and challenges in the field of soft computing and geospatial techniques in water resources engineering The book covers a range of topics including but not limited to satellite derived data for hydrologic applications Geospatial Information System GIS and Remote Sensing RS applications in water resources management rainfall and streamflow prediction hydro informatics data driven and artificial intelligent based hydrological modelling optimization of water resources systems The book presents these topics in the form of illustrations and tables thereby providing the readers with an in depth insight into the recent research It also addresses fundamental concepts and studies in the field of soft computing and geospatial techniques in water resources engineering making it a valuable resource for researchers and professionals working in the fields of hydraulics water resources and coastal engineering

Micro-Behavioral Economics of Global Warming S. Niggol Seo, 2015-03-30 This book presents a foundation for studying the micro behavioral economics of global warming The author develops an empirical model named the Geographically scaled Micro econometric model of Adapting Portfolios G MAP in response to climatic changes and risks The G MAP model is applied to observed decisions of agricultural and natural resource enterprises in Sub Saharan Africa and South America The author describes the five applications of the model the G MAP animal species the G MAP agricultural systems the G MAP natural resource enterprises the G MAP climate risk and the G MAP public adaptations The micro behavioral economics of global warming and the G MAP models are evaluated against the three alternative modeling traditions The first is the Agro Economic Models AEM based on crop simulations of selected crops under elevated CO2 conditions The second is a family of econometric studies of grain yield changes caused by yearly weather fluctuations The third is the Agro Ecological Zone AEZ method hinged crucially on the AEZ classifications of ecosystems The author offers a refreshing look at the traditional economics of global warming unraveling a broad array of adaptation strategies adopted by managers of agricultural and natural resource enterprises in Sub Saharan Africa and South America The book demonstrates that the micro behavioral economics dynamically integrates multiple disciplines in a cohesive way including economics psychology climate science ecosystem studies agronomy and animal science into the decision making framework of an individual agent The G MAP models provide a guide map of adaptation strategies for the humanity s enduring journey of battling global climatic changes in this century and beyond
