Makers And Milestones Of The Middle Ages:

Men and Milestones of the Middle Ages Peter G. Stillman, 1970 *The Making of the Middle Ages* R. W. Southern, 1961-09-10 A study of the chief personalities and forces that brought Western Europe to pre eminence as a centre for political experimentation economic expansion and intellectual discovery *The Making of Politics* John Watts, 2009-05-07 This major survey of political life in late medieval Europe provides a framework for understanding the developments that shaped this turbulent period Rather than emphasising crisis decline disorder or the birth of the modern state this account centres on the mixed results of political and governmental growth across the continent The age of the Hundred Years War schism and revolt was also a time of rapid growth in jurisdiction taxation and representation of spreading literacy and evolving political technique This mixture of state formation and political convulsion lay at the heart of the making of politics Offering a full introduction to political events and processes from the fourteenth century to the sixteenth this book combines a broad comparative account with discussion of individual regions and states including eastern and northern Europe alongside the more familiar west and south *Making Money in the Early Middle Ages* Rory Naismith, 2023-07-11 An examination of coined money and its significance to rulers aristocrats and peasants in early medieval Europe Between the end of the Roman Empire in the fifth century and the economic transformations of the twelfth coined money in western Europe was scarce and high in value difficult for the majority of the population to make use of And yet as Rory Naismith shows in this illuminating study coined money was made and used throughout early medieval Europe It was he argues a powerful tool for articulating people's place in economic and social structures and an important gauge for levels of economic complexity Working from the premise that using coined money carried special significance when there was less of it around Naismith uses detailed case studies from the Mediterranean and northern Europe to propose a new reading of early medieval money as a point of contact between economic social and institutional history Naismith examines structural issues including the mining and circulation of metal and the use of bullion and other commodities as money and then offers a chronological account of monetary development discussing the post Roman period of gold coinage the rise of the silver penny in the seventh century and the reconfiguration of elite power in relation to coinage in the tenth and eleventh centuries In the process he counters the conventional view of early medieval currency as the domain only of elite gift givers and intrepid long distance traders Even when there were few coins in circulation Naismith argues the ways they were used to give gifts to pay rents to spend at markets have much to tell us ***The Making of the Middle Ages*** Richard William Southern, 1959 *Savings and Investment Information for Teens, Fourth Edition* James Chambers, 2022-08-01 Provides consumer finance information for teens about economic principles wealth development bank accounts stocks bonds mutual funds and other financial tools *Financial Literacy Information for Teens, 1st Ed.* James Chambers, 2021-08-01 Provides tips for financial success including facts about earning money creating budget savings and investments banking credit unions credit cards

Boomers 3.0 Lawrence R. Samuel, 2017-07-14 Capitalizing on what is arguably the most important social phenomenon of our time and place the aging of America this book shows organizations how to market specifically to baby boomers in their third act of life The graying of America is undeniable with an estimated 10 000 boomers turning 65 every day But to dismiss the baby boomer generation as a group no longer worth marketing to would be foolish According to the Census Bureau in 2029 the year when the last boomer will have turned 65 there will still be more than 61 million boomers roughly 17 percent of the projected population of the United States Boomers will still be the wealthiest generation in the United States until at least 2030 according to the Deloitte Center for Financial Services with their share of net household wealth to peak at 50.2 percent by 2020 Boomers 3.0 Marketing to Baby Boomers in Their Third Act of Life describes how to market to baby boomers from a cultural perspective specifically addressing the demographic group of baby boomers in their later adulthood a period that will continue for the next two to three decades The author uses the term 3.0 to indicate the baby boomers third phase of life and explains how this third act of life will differ from earlier periods accordingly organizations should take a different approach to marketing to them than in the past This book offers a way to contextualize business objectives within a culturally based forward thinking framework that fully leverages the opportunities presented by what is perhaps the biggest and most affluent customer base in history Readers will be able to use the strategies described to map territories to stake and mine in targeting boomers create meaningful relationships with individuals in this group and communicate effectively with boomers to offer them products and services

Making Early Medieval Societies Kate Cooper, Conrad Leyser, 2016-01-21 Making Early Medieval Societies explores a fundamental question what held the small and large scale communities of the late Roman and early medieval West together at a time when the world seemed to be falling apart Historians and anthropologists have traditionally asked parallel questions about the rise and fall of empires and how societies create a sense of belonging and social order in the absence of strong governmental institutions This book draws on classic and more recent anthropologists work to consider dispute settlement and conflict management during and after the end of the Roman Empire Contributions range across the internecine rivalries of late Roman bishops the marital disputes of warrior kings and the tension between religious leaders and the unruly crowds in western Europe after the first millennium all considering the mechanisms through which conflict could be harnessed as a force for social stability or an engine for social change

Making of the World Mahbub H. Khan, 2023-10-30 Humanity was once scattered into small sized nomadic groups that barely knew each other Each lived inside its bubble of myths and beliefs The notion of one single community related by a common origin and similar aspirations the world began to evolve along with the founding of early civilizations It was an auspicious development that has changed not only the way we live but also how we think We are the only species probing the mysteries of nature and life Curiously the story of how wandering Homo sapiens who had lived off nature for hundreds of
