History Melissa Yeager, Charles Carter, 2012-04-11 Agreements between nations constitute the fundamental framework for
 the ordering of international affairs and their successes and failures have led to some of the great turning points in modern
 history The result of a unique collaboration by historians and political scientists this book delineates defines and assesses the
 idea of pacts and alliances as a key model of political organisation Anchored by leading academics in the field it presents
 numerous case studies covering a broad chronological sweep Through theoretical and empirical methodology the
 contributors address pacts and alliances from the fifteenth century onwards including among others the Korean American
 and Moscow Cairo alliances the Sevres Pact Turkey's accession to NATO and US alliances around the world Through a close
 reading of these historical diplomatic relationships fundamental yet relatively unaddressed research questions are developed
 and explored First what are the common denominators shared by successful alliances Second why do pacts and alliances
 disintegrate Third is the eventual demise of pacts and alliances inevitable Finally what are the implications of these issues on
 pact and alliance making today This is the first volume to address this wide range of issues and to bring together researchers

and theorists from the historical and political disciplines to provide original and groundbreaking theories of diplomacy Together these case studies explore why alliances succeed why they fail and why it matters Pacts and Alliances in History is therefore not only important reading for the next generation of policymakers but will also help frame scholars enquiries as they try to understand key events in international relations and history *Social Democracy in the Making* Gary Dorrien, 2019-04-23 An expansive and ambitious intellectual history of democratic socialism from one of the world's leading intellectual historians and social ethicists The fallout from twenty years of neoliberal economic globalism has sparked a surge of interest in the old idea of democratic socialism a democracy in which the people control the economy and government no group dominates any other and every citizen is free equal and included With a focus on the intertwined legacies of Christian socialism and Social Democratic politics in Britain and Germany this book traces the story of democratic socialism from its birth in the nineteenth century through the mid 1960s Examining the tenets on which the movement was founded and how it adapted to different cultural religious and economic contexts from its beginnings through the social and political traumas of the twentieth century Gary Dorrien reminds us that Christian socialism paved the way for all liberation theologies that make the struggles of oppressed peoples the subject of redemption He argues for a decentralized economic democracy and anti imperial internationalism
