Nukes Are Not Forever:

The Nuclear Express Thomas Reed, Danny Stillman, 2010-11-10 This is a political history of nuclear weapons from the discovery of fission in 1938 to the nuclear train wreck that seems to loom in our future It is an account of where those weapons came from how the technology surprisingly and covertly spread and who is likely to acquire those weapons next and most importantly why The authors examination of post Cold War national and geopolitical issues regarding nuclear proliferation and the effects of Chinese sponsorship of the Pakistani program is eye opening The reckless nuclear weapons programs for sale exporting of technology by Pakistan is truly chilling as is the on again off again North Korean nuclear weapons program New Nukes Praful Bidwai, Achin Vanaik, 2000 Nuclear tests in India and Pakistan brought the threat of nuclear war back to the world s centre stage The tests and nuclear moves have raised regional tension increased poverty in already impoverished nations and could possibly have fuelled an arms race which goes beyond the borders of the two countries This text examines the causes and consequences of India and Pakistani nuclear tests The book provides a framework for understanding the global context of these tests and looks at approaches for nuclear abolition in Asia and the West *Bulletin of the Atomic Scientists* , 1997-03 *South Asian Cultures of the Bomb* Itty Abraham, 2009-03-26 Since their founding as independent nations nuclear issues have been key elements of nationalism and the public sphere in both India and Pakistan Yet the relationship between nuclear arms and civil society in the region is seldom taken into account in conventional security studies These original and provocative essays examine the political and ideological components of national drives to possess and test nuclear weapons Equal coverage for comparable issues in each country frames the volume as a genuine dialogue across this contested boundary *The Challenge of Abolishing Nuclear Weapons* David Krieger, 2017-07-05 In the more than sixty years since the advent of nuclear weapons there has been little meaningful progress toward nuclear disarmament Some countries have nuclear weapons while other states are forbidden to acquire them a status quo that lacks rational basis and cannot be sustained In this remarkable collection scholars and policy analysts argue that humankind has a choice either allow nuclear weapons to continue to proliferate throughout the world or move toward their complete elimination The vast majority of people on the planet would surely opt to abolish nuclear weapons But decisions about nuclear weapons are not made by the public but by small groups of political elites Consequently in a world with nuclear weapons the fate of humanity rests in the hands of a small number of individuals whose perceptions communications and judgment determine whether there is to be a future The contributors to this volume provide historical perspective on nuclear weapons policy explore the role of international law in furthering the prospects of nuclear weapons abolition consider the obstacles to abolition present a path to achieving a nuclear weapons free world and look beyond abolition to consider issues of post abolition sovereignty and general and complete disarmament The goal of a nuclear weapons free world can be awakened by an engaged citizenry bringing pressure from below in demanding action from

political leaders This book contributes to this awakening and engagement North Korean Nuclear Operationality Gregory J. Moore, 2014 Kennedy School of Government at Harvard University sets the stage for a rigorous look at the threats North Korea poses to regional security and the nuclear nonproliferation regime The Code Silencer: Silence the Code Edwin Rivera, 2016-02-04 Read how this futuristic bounty hunter encounters his vengeance his missions and his work with a past that can only make him strong and powerful for what the future of his time leads him into As he goes through different levels of personalities to accomplish a mission to save humanity from a one world order evil government read how he unites all bounty hunters to go out and assist him to save humanity by destroying the one world order evil government *No Nukes* Anna Gyorgy, 1979 A classic A comprehensive and accessible presentation of the ins and outs of nuclear power It includes explanations of nuclear plant operation the fuel cycle health and safety hazards the economics and politics of nuclear power international anti nuclear programs and alternative energy sources *Bulletin of the Atomic Scientists* ,1997-03

Nuclear Weapons and Cooperative Security in the 21st Century Stephen J. Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors **Kevin Costner, America's Teacher** Ludovic A.
