Nurses In Nazi Germany:

Nurses in Nazi Germany Bronwyn Rebekah McFarland-Icke, 2020-11-10 This book tells the story of German nurses who directly or indirectly participated in the Nazis euthanasia measures against patients with mental and physical disabilities measures that claimed well over 100 000 victims from 1939 to 1945 How could men and women who were trained to care for their patients come to kill or assist in murder or mistreatment This is the central question pursued by Bronwyn McFarland Icke as she details the lives of nurses from the beginning of the Weimar Republic through the years of National Socialist rule Rather than examine what the Party did or did not order she looks into the hearts and minds of people whose complicity in murder is not easily explained with reference to ideological enthusiasm Her book is a micro history in which many of the most important ethical social and cultural issues at the core of Nazi genocide can be addressed from a fresh perspective McFarland Icke offers gripping descriptions of the conditions and practices associated with psychiatric nursing during these years by mining such sources as nursing guides personnel records and postwar trial testimony Nurses were expected to be conscientious and friendly caretakers despite job stress low morale and Nazi propaganda about patients having lives unworthy of living While some managed to cope with this situation others became abusive Asylum administrators meanwhile encouraged nurses to perform with as little disruption and personal commentary as possible So how did nurses react when ordered to participate in or tolerate the murder of their patients Records suggest that some had no conflicts of conscience others did as they were told with regret and a few refused The remarkable accounts of these nurses enable the author to re create the drama taking place while sharpening her argument concerning the ability and the willingness to choose

Mothers, Midwives, and Reproductive Labor in Interwar and Wartime Britain , Sandra Trudgen Dawson,2024-01-26 Mothers Midwives and Reproductive Labor in Interwar and Wartime Britain is about the experiences of mothers and midwives as they navigated the changing political and social issues surrounding childbirth and motherhood during interwar and wartime Britain The needs and agency of women as mothers and midwives often conflicted with the ideals of the state While government officials understood the importance of safe childbirth to the nation they also chose to allow economic crises and war preparation to take precedence The interwar plans for a national maternal healthcare system met financial constraints and a lack of political will As the outbreak of the Second World

War appeared imminent politicians planned for pregnant women and those with small children to evacuate from cities The reception areas were less well planned and pregnant women returned to their homes rather than deliver among strangers Wartime maternity provision didn't take into account the needs and desires of mothers and midwives Reproductive laborers mothers and midwives demonstrated agency throughout the period Pregnant women chose to deliver at home with untrained or trained birth attendants midwives entered and left the profession on their own terms offering or withholding their skills when it suited individual need rather than at the behest of government

Caring and Killing Thomas Foth, 2013 Under the Nazi regime in Germany a calculated killing of chronic mentally ill patients took place Nurses executed this program in their everyday practice However suspicions have been raised that psychiatric patients were also assassinated before and after the Nazi regime suggesting that the motives for these killings must be investigated within psychiatric practice itself This book highlights the mechanisms and scientific discourses in place that allowed nurses to perceive patients as unworthy of life This study analyzes patient records as inscriptions that actively intervene in interactions in institutions and that create a specific reality on their own accord The question is not whether the reality represented within the documents is true but rather how documents worked in institutions and what their effects were It is shown how nurses were actively involved in the construction of patients identities and how these documentary identities led to the death of thousands of humans

Human Subjects Research after the Holocaust Sheldon Rubenfeld, Susan Benedict, 2014-06-30 An engaging compelling and disturbing confrontation with evil a book that will be transformative in its call for individual and collective moral responsibility Michael A Grodin M D Professor and Director Project on Medicine and the Holocaust Elie Wiesel Center for Judaic Studies Boston University Human Subjects Research after the Holocaust challenges you to confront the misguided medical ethics of the Third Reich personally and to apply the lessons learned to contemporary human subjects research While it is comforting to believe that Nazi physicians nurses and bioscientists were either incompetent mad or few in number they were in fact the best in the world at the time and the vast majority participated in the government program of applied biology They were not coerced to behave as they did they enthusiastically exploited widely accepted eugenic theories to design horrendous medical experiments gas chambers and euthanasia programs which ultimately led to mass murder in the concentration camps

Americans provided financial support for their research modeled their medical education and research after the Germans and continued to perform unethical human subjects research even after the Nuremberg Doctors Trial The German Medical Association apologized in 2012 for the behavior of its physicians during the Third Reich By examining the medical crimes of human subjects researchers during the Third Reich you will naturally examine your own behavior and that of your colleagues and perhaps ask yourself If the best physicians and bioscientists of the early 20th century could do evil while believing they were doing good can I be certain that I will never do the same
