Select Committee on Nutrition and Human Needs,1975 **Food Politics** Marion Nestle,2002-03-04 We all witness in advertising and on supermarket shelves the fierce competition for our food dollars In this engrossing expos Marion Nestle goes behind the scenes to reveal how the competition really works and how it affects our health The abundance of food in the United States enough calories to meet the needs of every man woman and child twice over has a downside Our overefficient food industry must do everything possible to persuade people to eat more more food more often and in larger portions no matter what it does to waistlines or well being Like manufacturing cigarettes or building weapons making food is very big business Food companies in 2000 generated nearly 900 billion in sales They have stakeholders to please shareholders to satisfy and government regulations to deal with It is nevertheless shocking to learn precisely how food companies lobby officials co opt experts and expand sales by marketing to children members of minority groups and people in developing countries We learn that the food industry plays politics as well as or better than other industries not least because so much of its activity takes place outside the public view Editor of the 1988 Surgeon General s Report on Nutrition and Health Nestle is uniquely qualified to lead us through the maze of food industry interests and influences She vividly illustrates food politics in action watered down government dietary advice schools pushing soft drinks diet supplements promoted as if they were First Amendment rights When it comes to the mass production and consumption of food strategic decisions are driven by economics not science not common sense and

certainly not health No wonder most of us are thoroughly confused about what to eat to stay healthy An accessible and balanced account Food Politics will forever change the way we respond to food industry marketing practices By explaining how much the food industry influences government nutrition policies and how cleverly it links its interests to those of nutrition experts this pathbreaking book helps us understand more clearly than ever before what we eat and why **The Complete Guide to Health and Nutrition** Gary Null, Ph.D.,2009-09-23 The ultimate sourcebook from America s leading alternative health expert Yes you can feel better look better and extend the best years of your life through proper nutrition and exercise And there is no better guide to optimum health than this classic reference and sourcebook Compiled by Gary Null Ph D America s leading health and fitness expert a TV regular and host of his own nationally syndicated radio program this invaluable resource offers a comprehensive overview of protein carbohydrates lipids vitamins and minerals with the facts about their role in maintaining and restoring health Learn what s in the food you eat and what it can do for and to you Discover the pros and cons of supplements which to take how to take them and safe and effective dosages for each Find out The best way to lower high blood pressure and lose weight How to know if you re getting enough or too much protein The role of sugar in cardiovascular disease The best foods and supplements to meet changing nutritional needs Why exercise is more important than diet for weight control and which exercise is best of all The vitamin that slows down the aging process Why you may be inviting heart disease when you eliminate all cholesterol containing foods from your diet Gary Null cuts through the myths and hype and presents the facts everything you need to know about living well every day of your life
