Shifting Food Facts Alissa Overend,2020-11-15 This book offers a much needed reframing of food discourse by presenting alternative ways of thinking about the changing politics of food eating and nutrition It examines critical epistemological questions of how food knowledge comes to be shaped and why we see pendulum swings when it comes to the question of what to eat As food facts peak and peril in the face of conflicting dietary advice and nutritional evidence this book situates shifting food truths through a critical analysis of how healthy eating is framed and contested particularly amid fluctuating truth claims of a post truth culture It explores what a post truth epistemological framework can offer critical food and health studies considers the type of questions this may enable and looks at what can be gained by relinquishing rigid empirical pursuits of singular dietary truths In focusing too intently on the separation between food fact and food fiction the book argues that politically dangerous and epistemically narrow ideas of one way to eat healthy or right are perpetuated Drawing on a range of archival materials related to food and health and interviews with registered dietitians this book offers various examples of shifting food truths from macro historical genealogies to contemporary case studies of dairy wheat and meat Providing a rich and innovative analysis this book offers news ways to think about and act upon our increasingly complex food landscapes It does so by loosening our empirical Western reliance on singular food facts in favour of an articulation of contextual food truths that situate the problems of health as problems of living not as individualistic problems of eating It will be of interest to students scholars and practitioners working in food studies food politics sociology environmental geography health nutrition and cultural studies
