mentally physically and psychologically In many parts of the East people do not eat meat but that was because millenniums ago when they decided to turn vegetarian they were finding it very difficult to survive in harsh environments So they could not track animals nor could they trap them So they decided that a vegetarian diet would do very well for them And this became the rule instead of the exception and in a couple of generations this became the lifestyle Then came some philosophers and they added not eating meat to the religious rituals so that a person would be proud of being a vegetarian because he was following one particular religious believer and path Many of the religions including Hinduism in the east where they say that vegetarianism is a part of spiritual elevation will be surprised to know that before Hinduism came into existence the people living in that area were definitely meat eaters who enjoyed venison game domesticated poultry and other meat dishes There are many parts of the world where even today the cuisine is totally vegetarian and the people are not meat eaters In many parts of Asia especially in the Indian subcontinent there are areas where people have not eaten meat for millenniums because they make do with fruit and vegetables and milk products
