Killer Bees/Africanized Bees Sheldon Cheney, 1990 Protecting and Promoting Good Nutrition in Crisis and

Recovery Food and Agriculture Organization of the United Nations, 2005 Every year natural disasters armed conflicts and other forms of crisis adversely affect the lives of millions of people in the developing world In many countries families are forced to abandon their homes farms and villages access to adequate food becomes difficult and hardship contributes to high rates of malnutrition This book offers guidance to program planners and technicians in the fields of nutrition food security agriculture and community development in adopting a longer term perspective to addressing problems of household food insecurity and malnutrition during periods of crisis and recovery It provides a framework for an implementation strategy that focuses on both saving lives in the short term and strengthening livelihood to ensure that households are less vulnerable to food and nutrition insecurity in the future **Nutrition and economic development** Ecker, Olivier, Al-Riffai,

Perrihan, Breisinger, Clemens, El-Batrawy, Rawia, 2016-11-15 This book s main hypothesis is that Egypt s large food subsidy system has been ineffective in reducing undernutrition in fact it may have contributed to sustaining and even aggravating both nutrition challenges For a long time the subsidy system provided only calorie rich foods at very low and constant prices and with quotas much above dietary recommendations This system has created incentives to consume calorie overladen and unbalanced diets increasing the risks of child and maternal overnutrition and at high subsidy levels the risk of inadequate child nutrition Moreover the large public budget allocated to the food subsidies is unavailable for possibly more nutrition beneficial spending such as for child and maternal nutrition specific interventions The authors findings consistently suggest that in addition to the well known economic rationale for reforming the Egyptian food subsidy system there are strong reasons to reform food subsidies due to nutrition and public health concerns A fundamental food subsidy reform process has been under way since June 2014 The already implemented changes can be expected to have reduced some incentives for overconsumption and may have positive dietary effects However further major reform efforts are needed to transform the current subsidy system into a key policy instrument in the fight against malnutrition The findings of this book should be valuable to policy makers analysts development partners and others concerned with improving food security and promoting healthy nutrition in Egypt and other developing countries with large social protection programs *Benefits of*
