Protein Nutrition and

Mineral Absorption Raul A. Wapnir, 2024-12-06 This volume presents information regarding the mechanisms of protein absorption under normal and pathologic conditions in addition to reviewing changes that occur at various stages of life. General modifiers of intestinal absorption such as the processing of foods, the nutritional status of the individual and disease are explored with reference to both proteins and minerals. Inorganic macronutrients namely calcium, magnesium and phosphorus are discussed in relation to protein ingestion. The book also explores the concept of essential trace elements e.g. iron, zinc, copper and iodine and their link to protein sufficiency. The relationship of ultratrace elements with the content of proteins in food is examined and the book offers a fresh view of the role of certain elements particularly zinc on the conformation of proteins linked to DNA hormone receptors and gene products. Protein Nutrition and Mineral Absorption is packed with 2 300 references, 100 figures and graphs plus 25 tables. Nutritionists and physicians will find this book to be an invaluable reference source for rationalizing nutritional interventions and diet modifications for their patients.

Nutrient Requirements of Swine National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Nutrient Requirements of Swine, 2012-08-02 Since 1944 the National Research Council has published 10 editions of the Nutrient Requirements of Swine. This reference has guided nutritionists and other professionals in academia and the swine and feed industries in developing and implementing nutritional and feeding programs for swine. The swine industry has undergone considerable changes since the tenth edition was published in 1998 and some of the requirements and recommendations set forth at that time are no longer relevant or appropriate. The eleventh revised edition of the Nutrient Requirements of Swine builds on the previous editions published by the National Research Council. A great deal of new research has been published during the last 15 years and there is a large amount of new information for many nutrients. In addition to a thorough and current evaluation of the literature on the energy and nutrient requirements of swine in all stages of life, this volume includes information about feed ingredients from the biofuels industry and other new ingredients, requirements for digestible phosphorus and concentrations of it in feed ingredients, a review of the effects of feed additives and feed processing and strategies to increase nutrient retention and thus reduce fecal and urinary excretions that could contribute to environmental

pollution The tables of feed ingredient composition are significantly updated Nutrient Requirements of Swine represents a comprehensive review of the most recent information available on swine nutrition and ingredient composition that will allow efficient profitable and environmentally conscious swine production
