Political Judgement:

Expert Political Judgment Philip E. Tetlock, 2017-08-29 Since its original publication *Expert Political Judgment* by New York Times bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena let alone predict the future He evaluates predictions from experts in different fields comparing them to predictions by well informed laity or those based on simple extrapolation from current trends He goes on to analyze which styles of thinking are more successful in forecasting Classifying thinking styles using Isaiah Berlin's prototypes of the fox and the hedgehog Tetlock contends that the fox the thinker who knows many little things draws from an eclectic array of traditions and is better able to improvise in response to changing events is more successful in predicting the future than the hedgehog who knows one big thing toils devotedly within one tradition and imposes formulaic solutions on ill defined problems He notes a perversely inverse relationship between the best scientific indicators of good judgement and the qualities that the media most prizes in pundits the single minded determination required to prevail in ideological combat Clearly written and impeccably researched the book fills a huge void in the literature on evaluating expert opinion It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision making Now with a new preface in which Tetlock discusses the latest research in the field the book explores what constitutes good judgment in predicting future events and looks at why experts are often wrong in their forecasts

Explaining

Political Judgement Perri 6, 2011-09-22 What is political judgement Why do politicians exhibit such contrasting thought styles in making decisions even when they agree ideologically What happens when governments with contrasting thought styles have to deal with each other In this book Perri 6 presents a fresh rigorous explanatory theory of judgement its varieties and its consequences drawing upon Durkheim and Douglas He argues that policy makers will understand and misunderstand their problems and choices in ways that reproduce their own social organisation This theory is developed by using the Cuban Missile Crisis of 1962 as an extended case study examining the decision making of the Kennedy Castro and Khrushchev regimes *Explaining Political Judgement* is the first comprehensive study to show what a neo Durkheimian institutional approach can offer to political science and to the social sciences generally

Ronald Beiner, 2013-06-17 Originally published in 1983 One of the basic capacities of man as a political being is his faculty of judgement Yet for all the books on concepts like freedom equality and authority surprisingly little attention has been given to this topic in the tradition of Western political thought What is the nature of political judgement What endows us as human beings with the ability to make reasonable judgements about human affairs and to judge the common world we share with others By what means do we secure validity for our judgements What are the underlying conditions of this human capacity and what implications does it have for the understanding of politics These questions central as they are to any reflection on

politics have rarely been addressed in a systematic way This book examines Kant's concept of taste and Aristotle's concept of prudence as well as recent works of political philosophy by Arendt Gadamer and Habermas all crucially influenced by Kant and Aristotle

Teach it in English! Implementing English in the Political Classroom Janine Franke, 2013-08 Content and language integrated learning CLIL has recently gained great popularity in German schools Reports of teachers and pupils indicate that in bilingual lessons foreign language learning is perceived to be less artificial and far more motivating than in traditional language teaching In contrast to conventional language learning CLIL emphasises subject specific contents Although many teachers are not sure in which way English as predominant medium of instruction should be taught most of the rather experimental attempts to do so are reported to be successful Nevertheless in some German states there neither is a curriculum nor are there any recommendations specifically developed on the needs of different subjects taught in the integrated way CLIL requires teachers to be strongly committed and to invest extra time and work to turn this relatively new concept into a success But what is their motivation for establishing such learning environments To find out about some of the reasons why CLIL is currently so successful in German schools I examine the example of political education in Saxony and the extra benefits of CLIL when being taught in English

The Primacy of the Political R. Sundara Rajan, 1991 The core of the work is a lengthy hermeneutically oriented discussion of political judgment which projects the notion of political competence as a language mediated capacity of human subjects to recognize the common good by way of discourse This discursive conception of the political which is mediated on the one hand by a relationship to the moral and on the other to the conception which can be contrasted with the modern paradigm of politics as the episteme of power relations The earlier chapters build up to this contrast of the classical and the contemporary paradigms and stake out a claim for the primacy of the political in the classical mould The work is a return to the classical idea of the political by way of a long detour via the theory of judgment the Kuhnian theory of paradigms Ricoeur's theory of textual hermeneutics and rhetorical theory Ranging from discussions of sociological and political theory to philosophy of language and philosophical logic the work seeks to connect the Aristotelian Kautilyan conception of the political to contemporary debates in the metatheory of the social sciences
