Suburbia in the 21st Century Paul

Maginn, Katrin B. Anacker, 2022-03-24 The majority of the world's population now live in urban areas and the 21st century has been declared as the urban age. However, closer inspection of where people live in cities, especially within so-called advanced liberal democracies such as Australia, the United Kingdom, and the United States, reveals that most people live in different types of suburban environments. Drawing together scholars from across the globe, this book provides a series of national, regional, and local case studies from Australia, Canada, Finland, France, Ireland, Spain, the United Kingdom, and the United States to exemplify the diverse and dynamic nature and importance of suburbia in 21st-century urban studies, city building, and urbanism. This book explores the evolving social, physical, and economic character of the suburbs and how structural processes, market dynamics, and government policies have shaped and transformed suburbia around the world. It highlights the continuing importance of the suburbs and the suburban dream, which lives on albeit under increasing challenges such as the global financial crisis, structural racism, and the Covid-19 pandemic, which have given rise to various suburban nightmares.

Confronting Urban Legacy Xiangming Chen, Nick Bacon, 2013-10-18 *Confronting Urban Legacy* fills a critical lacuna in urban scholarship. As almost all of the literature focuses on global cities and megacities, smaller secondary cities, which actually hold the majority of the world's population, are either critically misunderstood or unexamined in their entirety. This neglect not only biases scholars' understanding of social and spatial dynamics toward very large global cities but also maintains a void in students' learning. This book specifically explores the transformative relationship between globalization and urban transition in Hartford, Connecticut, while including crucial comparative chapters on other forgotten New England cities: Portland, Maine, along with Lawrence and Springfield, Massachusetts. Hartford's transformation carries a striking imprint of globalization that has been largely missed from its 17th-century roots as New England's first inland colonial settlement to its emergence as one of the world's most prosperous manufacturing and insurance metropolises to its present configuration as one of America's poorest post-industrial cities, which by still retaining a globally lucrative FIRE Sector is nevertheless surrounded by one of the nation's most prosperous metropolitan regions. The myriad of dilemmas confronting Hartford calls for this book to take an interdisciplinary approach. The editors' introduction places Hartford in a global comparative perspective. Part I provides rich historical delineations of the many rises and not quite falls of Hartford. Part II offers a broad contemporary treatment of Hartford by dissecting recent immigration and examining the demographic and educational dimensions of the city-suburban divide, and Part III unpacks Hartford's current social, economic, and political situation and discusses what the city could become. Using the lessons from this book on Hartford and other underappreciated secondary cities in New England, urban scholars, leaders, and residents alike can gain a number of essential insights, both theoretical and practical.

9781032006352 **Charting Reform, Achieving Equity in a Diverse Nation** Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives

to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens

Why Don't American Cities Burn? Michael B. Katz, 2012-05-25 At 1 27 on the morning of August 4 2005 Herbert Manes fatally stabbed Robert Monroe known as Shorty in a dispute over five dollars It was a horrific yet mundane incident for the poor heavily African American neighborhood of North Philadelphia one of seven homicides to occur in the city that day and yet not make the major newspapers For Michael B Katz an urban historian and a juror on the murder trial the story of Manes and Shorty exemplified the marginalization social isolation and indifference that plague American cities Introduced by the gripping narrative of this murder and its circumstances Why Don't American Cities Burn charts the emergence of the urban forms that underlie such events Katz traces the collision of urban transformation with the rightward moving social politics of late twentieth and early twenty first century America He shows how the bifurcation of black social structures produced a new African American inequality and traces the shift from images of

a pathological black underclass to praise of the entrepreneurial poor who take advantage of new technologies of poverty work to find the beginning of the path to the middle class He explores the reasons American cities since the early 1970s have remained relatively free of collective violence while black men in bleak inner city neighborhoods have turned their rage inward on one another rather than on the agents and symbols of a culture and political economy that exclude them The book ends with a meditation on how the political left and right have come to believe that urban transformation is inevitably one of failure and decline abetted by the response of government to deindustrialization poverty and race How Katz asks can we construct a new narrative that acknowledges the dark side of urban history even as it demonstrates the capacity of government to address the problems of cities and their residents How can we create a politics of modest hope The Resegregation of Suburban Schools Erica Frankenberg, Gary Orfield, 2012-10-01 The United States today is a suburban nation that thinks of race as an urban issue and often assumes that it has been largely solved write the editors of this groundbreaking and passionately argued book They show that the locus of racial and ethnic transformation is now clearly suburban and illustrate patterns of demographic change in the suburbs with a series of rich case studies The book concludes by considering what kinds of strategies school officials and community leaders can pursue at all levels to improve opportunities for suburban low income students and students of color and what ways address the challenges associated with demographic change **Diversity and Disparities** John Logan, 2014-11-01 The United States is more diverse than ever before Increased immigration has added to a vibrant cultural fabric and women and minorities have made significant strides in overcoming overt discrimination At the same time economic inequality has increased significantly in recent decades and the Great Recession substantially weakened the economic standing not only of the poor but also of the middle class Diversity and Disparities edited by sociologist John Logan assembles impressive new studies that interpret the social and economic changes in the United States over the last decade The authors leading social scientists from many disciplines analyze changes in the labor market family structure immigration and race They find that while America has grown more diverse the opportunities available to disadvantaged groups have become more unequal Drawing on detailed data from the decennial census the American Community Survey and other sources the authors chart the growing diversity and the deepening disparities among different groups in the United States Harry J Holzer and Marek Hlavac document that although the economy always rises and falls over the business cycle the Great Recession of 2007 2009 was a catastrophic event that saw record levels of unemployment especially among less educated workers young people and minorities Emily Rosenbaum shows how the Great Recession amplified disparities in access to home ownership and demonstrates that young adults especially African Americans are falling behind previous cohorts not only in home ownership and wealth but even in starting their own families and households Sean F Reardon and Kendra Bischoff explore the rise of class segregation as higher income Americans are moving away from others into separate and privileged neighborhoods and communities Immigration has also

seen class polarization with an increase in both highly skilled workers and undocumented immigrants As Frank D Bean and his colleagues show the lack of a path to legal status for undocumented immigrants inhibits the educational and economic opportunities for their children and grandchildren Barrett Lee and colleagues demonstrate that the nation and most cities and towns are becoming more diverse by race and ethnicity However while black white segregation is slowly falling Hispanics and Asians remain as segregated today as they were in 1980 Diversity and Disparities raises concerns about the extent of socioeconomic immobility in the United States today This volume provides valuable information for policymakers journalists and researchers seeking to understand the current state of the nation

New SubUrbanisms Judith K De Jong, 2013-09-11 Historically we see the city as the cramped crumbling core of development and culture and the suburb as the vast outlying wasteland convenient but vacant Contemporary urban design proves this wrong In **New SubUrbanisms** Judith De Jong explains the on going flattening of the American Metropolis as suburbs are becoming more like their central cities and cities more like their suburbs through significant changes in spatial and formal practice as well as demographic and cultural changes These revisionist practices are exemplified in the emergence of hybrid sub urban conditions such as parking practices the residential densification of suburbia hyper programmed public spaces and inner city big box retail among others Each of these hybridized conditions reflects to varying degrees the reciprocating influences of the urban and the suburban Each also offers opportunities for innovation in new formal and spatial practices that re configure conventional understandings of urban and suburban and in new ways of forming the evolving American metropolis Based on this new understanding De Jong argues for the development of new ways of building the city Aimed at students and practitioners of urban design and planning **New SubUrbanisms** attempts to re frame the contemporary metropolis in a way that will generate more instrumental engagement and ultimately better design
