Redes Jerarquias Y Dinamicas Productivas:

Agentes y dinamicas territoriales Raul González-Meyer, 2006 Los territorios locales y regionales son una producción social a partir de la interacción entre agentes que poseen intereses lógicos y estrategias diversas y que actúan desde diversas escalas de la realidad. Esto suele obviarse cuando se habla de políticas de desarrollo territorial como si estas operasen en campos sociales vacíos. En América Latina y Chile existe un déficit interdisciplinario que abra una socioeconomía política de lo territorial. Ella es clave además para analizar las viabilidades de sociedades locales con protagonismo de sus agentes más enraizados en los territorios en cuanto medio de vida y trabajo. El recorrido por las teorías y conceptos que han destacado el lugar ocupado por determinados agentes como estructurantes de los territorios subnacionales muestra una diversidad de aproximaciones, así como de espacios y tiempos históricos que han servido de referencia. Un período especial es el de los últimos decenios en que se constituye un importante debate acerca del peso y las relaciones que tienen los agentes globales, nacionales y locales en las dinámicas territoriales. Los estudios de territorios, las ciudades chilenas de Valdivia, Temuco y Arica permiten visualizar el juego denso de agentes que va imprimiendo el movimiento de los grupos globales, exportadores, cadenas nacionales e internacionales de comercio y servicios, distintas expresiones sectoriales del Estado y sus niveles, centrales, regionales y locales, diversos grupos, medios, diferenciados en ideologías e intereses, instituciones como universidades, iglesias, partidos políticos y ONGs, agentes populares como el sindicalismo, microempresariado popular, grupos vecinales y manifestaciones étnicas. Entre ellos median relaciones de conflicto, de cooperación o fragmentaciones. Estas ocurren marcadas por una envoltura histórica que expresa la singularidad de cada ciudad construida en el tiempo. En esa dinámica se va revelando el poder aumentado de grandes agentes privados, pero también el de los agentes para empujar una gobernanza local para un desarrollo endógeno y democrático.

Redes globales de producción, rentas económicas y estrategias de desarrollo: Pozas, María de los Ángeles, Rivera, Miguel Ángel, Dabat, Alejandro, 2010-08-17 Las redes globales de producción representan un salto exponencial en la organización y funcionamiento de la economía mundial. Después de tres décadas de evolución, el paradigma industrial que llamamos electrónico informático está suficientemente maduro para examinar sus características de forma sistemática y sus consecuencias para el desarrollo de América Latina.

A Handbook of Industrial Districts Giacomo Becattini, Marco Bellandi, Lisa De Propris, 2014-05-14 A Handbook of Industrial Districts is a very well organized and structured collection of scientific works on the theory of industrial districts. Roberta Capello, Regional Studies. In this comprehensive original reference work, the editors have brought together an unrivalled group of distinguished scholars and practitioners to comment on the historical and contemporary role of industrial districts.

Handbook of Social Capital and Regional Development Hans Westlund, Johan P. Larsson, 2016-12-30 The role of social capital in regional development is a multifaceted topic which is studied all over the world using various methods and across numerous disciplines. It has long been evident that social capital is important for regional development, however, it is less clear how this

works in practice Do all types of social capital have the same effects and are different kinds of regions impacted in the same way This book is the first to offer an overview of this rapidly expanding field of research and to thoroughly analyse the complex issue of social capital and regional development

Innovación y empleo en tramas productivas de Argentina Marcelo Delfini, 2007 La presente publicación abarca aspectos de producción y empleo de manera articulada incorporando para ello la noción de tramas productivas Este concepto prioriza la integración entre los agentes a partir de aquellos elementos que conforman los aspectos vinculados a la innovación y el empleo y no solamente en la relación clásica de intercambio de bienes y servicios entre las empresas Este libro es un insumo de importancia para los interesados en la problemática de los encadenamientos productivos y en el impacto de diferentes complejos productivos en distintas áreas geográficas del país Los casos de estudio sobre siderurgia automotores hidrocarburos vitivinicultura fruticultura INVAP y la integración entre el desarrollo del software y el sector agrícola permiten mostrar divergencias y similitudes en el sendero evolutivo de cada una de estas tramas y a la vez se constituyen en importantes insumos para el diseño e implementación de políticas para el desarrollo y fortalecimiento de tramas

Redes, jerarquías y dinámicas productivas Mónica Casalet, Mario Cimoli, Gabriel Yoguel, 2005 Analiza el impacto de los procesos de globalización la integración regional y los cambios tecnológicos en la evolución y la configuración de las redes de los procesos de producción y examina el papel de las pequeñas y medianas empresas el contexto institucional y la gobernabilidad

Knowledge Generation and Protection Jorge Mario Martínez-Piva, 2009-12-03 This book is the English version of the text published by the Economic Commission for Latin America and the Caribbean in April 2008 and entitled Generación y protección del conocimiento propiedad intelectual innovación y desarrollo económico Since then the year that has passed has been fraught with uncertainty but has also brought signs of hope Indeed the past year was marked by the outbreak of the deepest and most pervasive financial and economic crisis since the Great Depression of 1929 a crisis generated in the United States but whose negative repercussions have spread at a phenomenal rate throughout the planet The impact of this crisis on the peoples of Latin America and the Caribbean will undermine the region's prospects for economic growth employment and poverty alleviation This was the year in which United States citizens elected Barack Obama as their President a clear sign of new hope This hope was tangible at the Fifth Summit of the Americas held in Port of Spain which marked a turning point in the relations between the countries that make up this hemisphere The open posture of the United States and that country's readiness to listen rather than to impose any particular position and its willingness to engage in dialogue on an equal footing were positive signs Moreover it was generally admitted that there is not just one model for advancing successfully toward development

Dilemas de innovación en México: Dinámicas sectoriales, territoriales e institucionales Jorge Carrillo Viveros, Alfredo Hualde, Daniel Villavicencio, [Redes ciencia-industria para la transferencia en México, Estados Unidos y Canadá](#) Federico Andrés Stezano Pérez, 2013-09-10 Esta investigación premiada analiza las relaciones que establecen ciencia

industria y gobierno para favorecer la transferencia de conocimientos con base en distintos estudios de caso en México, Estados Unidos y Canadá, destacando la incidencia de las relaciones históricas institucionales entre el Estado, la economía y la sociedad en la constitución de los sistemas nacionales de innovación. *Estudio social de la ciencia y la tecnología desde América Latina*. Antonio Arellano Hernández, Hebe Vessuri, Léa Velho, Rosalba Casas Guerrero, Matilde Luna Ledesma, Alexis De Greiff, Óscar Javier Maldonado, Iván da Costa Marques, Leonardo Silvio Vaccarezza, 2011-06-24. Este libro tiene dos objetivos: en primer lugar, poner en escena los aportes y las propuestas desarrolladas por un conjunto de investigadores latinoamericanos sobre diversos temas y enfoques en torno al estudio de las relaciones entre la ciencia, la tecnología y la sociedad; CTS es decir, tratar de presentar un panorama de los estudios CTS latinoamericanos vistos a través de las aportaciones teóricas, epistemológicas y empíricas recientes generadas por especialistas representativos de campos de conocimiento y abordajes diversos. En segundo lugar, mostrar algunas avenidas por las que transcurrirán los esfuerzos de investigación en la región, tratando de profundizar los debates vigentes y de enriquecer la agenda de discusión de los estudios CTS y dar cuenta de las modificaciones del campo CTS en la región en términos de los abordajes posdisciplinarios de la fuerte integración conceptual y empírica de los diversos ámbitos y de las posiciones críticas respecto de las elaboraciones teóricas y metodológicas de otras regiones. *Trabajo colaborativo y redes de cooperación basadas en asociatividad*. Carlos José Bello Pérez, Rafael Alfredo Camargo Remolina, 2022-01-11. Asociarse para enfrentar los retos que imponen los entornos en permanente cambio y altamente competidos es una estrategia viable que se plantea para las pequeñas y medianas empresas alrededor del mundo. Dicha estrategia se soporta esencialmente en el desarrollo de las competencias sociales que permiten el trabajo colaborativo en red y ponen en juego la capacidad de confiar en el otro, trabajar conjuntamente y construir proyectos comunes que benefician a todos en términos económicos y principalmente sociales. El libro que se presenta al lector aborda la asociatividad empresarial como una estrategia con alto potencial institucional para ser implementada en la formulación de la política pública de desarrollo de pymes. Es una alternativa para que la academia se aproxime a la realidad de estas empresas y al mismo tiempo brinda pautas para que el empresario individual considere en serio las bondades de trabajar colaborativamente en red. El modelo de asociatividad propuesto es el resultado de más de diez años de conceptualización teórica en revisión de modelos de trabajo colaborativo asociativo alrededor del mundo. Ha sido probado por varios años con cientos de pymes, lo cual lo hace un modelo propio que incorpora las mejores prácticas mundiales a las características y la realidad de nuestra pyme. Los autores ponen a consideración de la comunidad académica este modelo de asociatividad. Esperan que sea también de utilidad para organizaciones dedicadas al fortalecimiento empresarial de pymes, las instituciones de gobierno interesadas en mejorar la competitividad de estas empresas, las grandes empresas que promueven el ejercicio del intra e interempresarial y el fortalecimiento de sus proveedores, así como al empresario pyme individual que apuesta por la mejora continua y la innovación. La pyme de hoy está llamada a enfrentar el día a día de manera colaborativa.

en los últimos veinte años teniendo en cuenta los distintos grupos de actores y sus contextos. Los autores, todos especialistas de las ciencias sociales y humanidades, aportan sus análisis sobre la base de estudios circunstanciados de las distintas realidades observadas: zona pampeana, noroeste, Cuyo, noreste, etc. A campesinos, empresarios de los agronegocios, productores familiares, ingenieros agrónomos, instituciones técnicas públicas y privadas van siendo objeto de la mirada de antropólogos, geógrafos, políticos, sociólogos, etc. con el objetivo de dar sentido a esa cartografía novedosa que se fue configurando a partir del marco político de desregulación de los mercados, 1991 de la liberación de los transgénicos, 1996 y de la managerialización de las empresas. Luego de este recorrido, el lector tendrá elementos para comprender las nuevas solidaridades evidenciadas durante el conflicto: el campo versus el gobierno, entre productores medianos y grandes, huertos de siembra entre urbanos y rurales, entre rentistas y productores. El paso del paradigma de la agricultura familiar al de los agronegocios no solo supuso una revolución tecnológica sino que implicó una innovación conceptual, subjetiva e ideológica muy profunda, cuyos elementos centrales son abordados en estas páginas.

Sistemas de innovación en México, Daniel Villavicencio, Daniel H. Villavicencio Carbajal, Pedro Luis López de Alba, 2009. La globalización y la necesidad de incrementar las condiciones de competitividad de las empresas y los países pusieron de manifiesto durante los años 90 la obsolescencia de los modelos de política industrial, científica y tecnológica basados en la oferta de instrumentos sin discriminar sectores y regiones. Se trató de modelos que poco tomaban en cuenta las diversas dimensiones que implican los procesos de innovación y las cambiantes condiciones de demanda de conocimiento científico y tecnológico. En el libro *Sistemas de Innovación en México: Regiones, redes y sectores*, coordinado por Daniel H. Villavicencio Carbajal y Pedro Luis López de Alba, se explica que la innovación es un proceso multidimensional de creación de nuevos usos del conocimiento que requiere de la combinación de factores como capital, recursos humanos, infraestructura y oportunidades de mercado. Señalan los autores que se requiere asimismo de procesos de aprendizaje tecnológico y organizacional, de la exploración y explotación de oportunidades tecnológicas y comerciales. Es una actividad que se realiza principalmente en las empresas, pero que conlleva relaciones de estas con diversos actores dentro y fuera del mercado, como son los clientes, proveedores, agencias intermedias, universidades y centros de investigación. Sin embargo, aseguran para que una empresa logre capitalizar sus experiencias de aprendizaje y convertirlas en procesos y productos nuevos o mejorados, necesita de un entorno institucional capaz de ofrecer servicios tecnológicos, programas de fomento, flujos de conocimiento, redes de cooperación con otros agentes, entre otros incentivos. A partir de la premisa de que la innovación es la base de la competitividad y de la creación de nueva riqueza, muchos países reformulan sus políticas de ciencia, tecnología e innovación. En la década pasada, con el objeto de asegurar condiciones institucionales para asegurar nuevas formas de producción, difusión y apropiación del conocimiento y nuevos mecanismos de transferencia de tecnología y de aceleración de capacidades de innovación, pueden formularse algunas interrogantes para el caso de México. Existen políticas encaminadas a acelerar los procesos de innovación. Existen entornos que ofrecen condiciones favorables a la acumulación y desarrollo de

capacidades tecnológicas. Cuáles han sido las vías exitosas de innovación que es necesario repetir. Los artículos reunidos en este volumen sin pretender ser exhaustivos ofrecen elementos de respuesta a estas preguntas desde diversos ángulos teóricos y abordajes empíricos. Muestran asimismo los problemas y tensiones que ocasiona la dinámica de innovación desde la perspectiva de la coevolución entre agentes públicos y privados académicos y productivos y que es necesario comprender para diseñar instrumentos de política más eficientes.
