A Blueprint for Equity-Driven Community College Leadership Pamela L. Eddy, Kim E. VanDerLinden, 2024-08-14 Expert advice and effective strategies for community college leaders who endeavor to embed equity and social justice in institutional policies practices and structures *Engaging Black Men in College Through Leadership Learning* Cameron C. Beatty, Jesse R. Ford, 2023-05-01 This book encourages leadership educators and practitioners to understand the importance of black male leadership on college campuses in today's world As the push to make higher education more culturally relevant and inclusive the need for these educators to critically engage in their work to create intentional and developmental experiences for their black male leaders is needed now more than ever The contexts outlined in this book illustrate the need to see Black men's leadership as a critical dynamic and ever evolving component on college campuses that requires intentionality to best develop serve and holistically engage Black men in leadership learning This book is intended to be a practical and scholarly resource to aid in the awareness of Black men in college Black men's leadership identities and experiences and the growing need to assist this population's success in college and beyond Engaging Black Men In College Through Leadership Learning centers on leadership and Black identity as it tackles the intersecting identities of maleness Blackness and leadership identity as it encourages educators to consider the importance of the college environment in shaping the next generation of Black men collegiate leaders In addition this scholarship provides insight into Black men's leadership experiences in various contexts including fraternity life first year experiences and student organizations while capturing the collective experiences of Black men as leadership learners at different types of institutions including HBCUs Community Colleges PWIs and a host of other institution types This resource is for leadership educators and practitioners to develop Black men as leaders on today's college campuses where our global society continues to navigate challenges This book also situates more nuanced topics such as mental health trans identity graduate education and the experiences of former foster care youth which provides insight into the experiences of Black men as leaders on college campuses These contexts illustrate the need to see Black men's leadership as a critical dynamic and ever evolving component on college campuses that requires intentionality to best develop serve and holistically engage Black men in leadership learning We encourage readers of this text to consider how black men's experiences with leadership are woven into the fabric of your college campus and how you can be an advocate for more critical and sustainable ways to engage Black men in college through leadership learning *Redesigning America's Community Colleges* Thomas R. Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 In the United States 1 200 community colleges enroll over ten million students each year nearly half of the nation's undergraduates Yet fewer than 40

percent of entrants complete an undergraduate degree within six years This fact has put pressure on community colleges to improve academic outcomes for their students Redesigning America's Community Colleges is a concise evidence based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions It makes a compelling case that two year colleges can substantially increase their rates of student success if they are willing to rethink the ways in which they organize programs of study support services and instruction Community colleges were originally designed to expand college enrollments at low cost not to maximize completion of high quality programs of study The result was a cafeteria style model in which students pick courses from a bewildering array of choices with little guidance The authors urge administrators and faculty to reject this traditional model in favor of guided pathways clearer more educationally coherent programs of study that simplify students choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost Distilling a wealth of data amassed from the Community College Research Center Teachers College Columbia University Redesigning America's Community Colleges offers a fundamental redesign of the way two year colleges operate stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals **Rethinking**

Kezar, 2023-07-03 The complexity of the decisions that today's higher education leaders face as they engage with a diversifying student body globalization and technological advances requires embracing new ways of thinking about leadership This book examines the new theories and concepts of leadership that are described in the multidisciplinary literature on leadership and are being applied in other sectors from government to the non profit and business communities to explore the implications for leaders and leadership programs in higher education At a time when the heroic controlling and distant leader of the past has given way to a focus on teams collectives and social change the contributors to this book ask What new skills and competencies should leaders and programs be addressing The recognition of the interdependence of groups within organizations and between organizations of cultural and social differences and of how technology has sped up decision time and connected people across the globe have changed the nature of leadership as well as made the process more complex and diffuse This book is addressed to anyone developing institutional regional or national leadership development programs to aspiring leaders planning to participate in such programs and to campus leaders concerned with the development and pipeline of emerging leaders It will be particularly useful for administrators in faculty development offices who are planning and creating workshops in leadership training and for staff in human resource offices who offer similar training Contributors Laurel Beesemyer Rozana Carducci Pamela Eddy Tricia Bertram Gallant Lynn Gangone Cheryl Getz Jeni Hart Jerlando F L Jackson Lara Jaime Adrianna Kezar Bridget R McCurtis Sharon McDade Robert J Nash Elizabeth M O Callahan Sue V Rosser Lara Scott **Urban Education** Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education

of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d tre of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others

Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University Connecting Learning Across the Institution Pamela L. Enhancing Campus Capacity for Leadership Adrianna Kezar, Jaime Lester, 2011-07-26

Enhancing Campus Capacity for Leadership explores a mostly untapped resource on college campuses the leadership potential of staff and faculty at all levels This book contributes to the growing tradition of giving voice to grassroots leaders offering a unique contribution by honing in on leadership in educational settings In an increasingly corporatized environment grassroots leadership can provide a balance to the prestige and revenue seeking impulses of campus leaders act as a conscience for institutional operations with greater integrity create changes related to the teaching and learning core build greater equity improve relationships among campus stakeholders and enhance the student experience The text documents the stories of grassroots leaders including the motivation and background of these bottom up beacons the tactics and strategies that they use the obstacles they overcome and the ways that they navigate power and join with formal authority This investigation also showcases how grassroots leaders in institutional settings particularly more marginalized groups can face significant backlash While we like to believe that organizations are civil and humane the stories in this book demonstrate a dark side with which we must reckon The book ends with a discussion of the future of leadership on college campuses examining the possibilities for shared and collaborative forms of leadership and governance

The Organization of

Higher Education Michael N. Bastedo, 2012-05-01 Colleges and universities are best understood as networks of

departments working together to fulfill a mission of education innovation and community partnership To better understand how these large and complex institutions function scholars can apply organizational and strategic planning concepts made familiar by business management This book follows that model and explores the new and emerging ways by which organizational theories address major contemporary concerns in higher education The contributors to this volume are both influenced and inspired by the pioneering work of Marvin Peterson and his four decade career researching higher education organization Comprising a serious reexamination of the field the essays review past and current thinking address the field s core theoretical traditions and pursue exciting new lines of inquiry including the organizational dynamics of diversity and social movement organizations Ideal for courses in administration and theory this book reinvigorates the study of higher education as an organization and encourages scholars to rediscover the value of organizational principles in all areas of higher education research Contributors Michael N Bastedo University of Michigan Patricia J Gumpert Stanford University James C Hearn University of Georgia Adrianna Kezar University of Southern California Jason Lane State University of New York at Albany Simon Marginson University of Melbourne Michael K McLendon Vanderbilt University Anna Neumann Columbia University Brian Pusser University of Virginia Fabio Rojas Indiana University Daryl G Smith Claremont Graduate University William G Tierney University of Southern California and the late J Douglas Toma University of Georgia When For-Profit Meets Nonprofit Jared Bleak, 2017-09-25 This study addresses the increasing tumult over the commercialization of higher education a battle over profit and principle money and mission While many issues in higher education encompass the mission and values of the university the operation of for profit subsidiaries by nonprofit universities provides the potential for an especially contentious clash Some faculty have been especially vocal in this debate claiming that the culture of the academy is being irreparably altered as traditional values are being replaced by a corporate style of management or by some hybrid By answering the questions of why for profit subsidiaries of nonprofit universities were created how they are governed and managed and what the nature of the relationship with their nonprofit parent is this book contributes to a better understanding of the larger controversy over whether universities have become too business like too market oriented and whether they have sold their souls and values in the process In essence the book provides a window into whether it is possible to do business like a business a trend afoot in the academy and still retain allegiance to core values
