## **Redesigning Library Services A Manifesto:**

Redesigning Library Services Michael Keeble Buckland,1992 This blueprint provides a new framework within which to attempt to understand and to plan library services in the future      **Reimagining the Academic Library** David W. Lewis,2016-05-04 Academic libraries are in the midst of significant disruption Academic librarians and university administrators know they need to change but are not sure how Bits and pieces of what needs to happen are clear but the whole picture is hard to grasp Reimagining the Academic Library paints a simple straightforward picture of the changes affecting academic libraries and what academic librarians need to do to respond to the changes would help to guide future library practice The aim is to explain where academic libraries need to go and how to get there in a book that can be read in a weekend David Lewis provides a readable survey of the current state of academic library practice and proposes where academic libraries need to go in the future to provide value to their campuses His primary focus is on collections as this is the area with the greatest opportunity for change and is the driver of most library cost Lewis provides an accessible framework for thinking about how library practice needs to adjust in the digital environment The book will be useful not only to academic librarians but also for librarians to share with presidents and provosts who a concise source for understanding where and how to focus their expenditures on libraries      **Innovative Redesign and Reorganization of Library Technical Services** Bradford Lee Eden,2004-04-30 The second part focuses on redesign and reorganization efforts through a number of fascinating case studies The majority of these case studies come from academic library technical services departments highlighting efforts to meet and deal with challenges through a myriad of options      *Planning Our Future Libraries* Kim Leeder,Eric Frierson,2013-11-12 This thought provoking collection will challenge librarians at every kind of institution to start planning today for the library of tomorrow      *Influence of funding on advances in librarianship* Danuta A. Nitecki,Eileen G. Abels,2008-12-05 Addresses the influence of research funding on advances in libraries and librarianship from two perspectives funding agents and specific initiatives      **Libraries as User-centered Organizations** Meredith A. Butler,1993 How do we begin to assess the impact of economic technological demographic and management trends in our environment and understand the long term implications How can administrators managers and information professionals take advantage of these trends How can librarians empower staff and change organizational hierarchies to create more responsive and rewarding environments How do we restructure organizations to make them more learning and student centered and more responsive to the needs of new clienteles These are just a few of the questions addressed in Libraries as User Centered Organizations which examines organizational change from the point of view that academic institutions are experiencing a paradigm shift in the definition of their mission their focus and their activities As librarians move into a new paradigm of library as gateway and connector they must also shift their focus from the information product to the user of information This profound change in vision is explored in this book through the concept of user centeredness a focus on the

habits needs desires dislikes abilities and preferences of the user Libraries as User Centered Organizations explores a variety of important aspects of organizational change including leadership styles sustaining and expanding staff empowerment and creativity collaboration between libraries and computer centers creating multicultural organizations remodeling the library science educational structure organizational change in professional associations Libraries as User Centered Organizations looks at current trends affecting higher education research libraries professional education for librarians professional associations and publishing from the point of view of some of the leaders in these fields and offers readers a context for viewing organizational change The book is of particular assistance to library administrators and educators engaged in planning for change and rethinking operations and services Information Tomorrow Rachel Singer Gordon, 2007 In Information Tomorrow Rachel Singer Gordon brings together 20 of today's top thinkers on the intersections between libraries and technology They address various ways in which new technologies are impacting library services and share their ideas for using technology to meet patrons where they are In addition to a preface by the editor the book's foreword by Stephen Abram and 16 chapters feature insights and opinions from these library leaders bloggers and futurists **Research 2.0 and the Future of Information Literacy** Tibor Koltay, Sonja Spiranec, Laszlo Z Karvalics, 2016-01-22 Research 2.0 and the Future of Information Literacy examines possible congruencies between information literacy and Research 2.0 because the work of today's researcher mobilizes a number of literacies From among the various types of relevant literacies at least three types of literacies can be mentioned in this relation information literacy scientific literacy and academic literacy This book addresses these literacies in the light of the changing research landscape Broad contexts of the researcher's abilities as adaptive and innovative thinking problem solving skills self management and design mindset are also examined Computational thinking and the computational paradigm in a number of fields of research are taken into consideration as well Researchers differ to non researchers when populating social media which means that these two different groups require different literacies The relationship between information literacy and information is approached in a new way Among the multitude of issues we introduce a new interface between information literacy and Research 2.0 It encompasses the issues of research data management and data literacy which represent also a challenge both for the academic library and for the communities of researchers Similarly the questions of new metrics of scientific output are addressed in the book Summarizes the most important and up to date approaches towards Research 2.0 including researchers skills and abilities the data intensive paradigm of scientific research open science not forgetting about factors that inhibit a wider uptake of Research 2.0 Discusses the nature of information literacy in the light of its definitions declarations and related frameworks and by outlining the new literacies context reading and writing the cultural context and the turns of library and information science Numerous literacies other than information literacy its relationship to information overload and personal information management are also subject of the book Theoretical and practical perspectives are given to enable the understanding of the

transformations of information literacy and its relationship to Research 2 0

### **Our Enduring Values Revisited:**

**Librarianship in an Ever-Changing World** Michael Gorman, 2015-03-16 In the almost 15 years since *Our Enduring Values* was published there has been a sea change in the way much of the world thinks about and uses libraries Young librarians and seasoned LIS professionals alike are experiencing increasing pressure to adjust to new economic societal and technological demands amidst the often dire rhetoric currently surrounding the future of our institutions In this stirring manifesto public intellectual librarian and philosopher Gorman addresses head on the existential panic among library professionals caused by the radical shift in how libraries are viewed He reconnects readers with the core values that continue to inspire generations of library professionals and scholars while making the case that these values are doubly crucial to hold on to in the brave new shifting world of librarianship Destined to become another classic of library literature this book explores such contemporary issues as The growing emphasis of the library as a cultural institution placing libraries within their cultural context as gathering places for learning access to information and community The impact of technological innovations on core values such as access and stewardship Library places and spaces of the future How the mass digitization of books archives and other materials affects the purpose and function of libraries Intellectual freedom and privacy in the era of the PATRIOT Act Wikileaks and Edward Snowden The role of libraries as both champions and facilitators of social justice Inspirational yet clear sighted Gorman emphatically reaffirms the importance of libraries and librarians while proposing a path for future survival and growth

*Fool's Gold* Mark Y. Herring, 2015-01-09 This work skeptically explores the notion that the internet will soon obviate any need for traditional print based academic libraries It makes a case for the library's staying power in the face of technological advancements television microfilm and CD ROM's were all once predicted as the contemporary library's heir apparent and devotes individual chapters to the pitfalls and prevarications of popular search engines e books and the mass digitization of traditional print material
