Rediscovering Japanese Space Kishō Kurokawa,1988 **Big Plans** Kenneth L. Kolson,2003-11-03 This work springs from the idea that human aspirations for the city tend to overstate the role of rationality in public life The author explores the part serendipity plays in urban experience *Public Spaces, Marketplaces, and the Constitution* Anthony Maniscalco,2015-10-15 Examines how the Supreme Court has banished free expression from shopping malls and other public spaces In spite of their public attractions and millions of visitors most shopping malls are now off limits to free speech and expressive activity The same may be said about many other public spaces and marketplaces in American cities and suburbs leaving scholars and other observers to wonder where civic engagement is lawfully permitted in the United States In *Public Spaces Marketplaces and the Constitution* Anthony Maniscalco draws on key legal decisions social theory and urban history to demonstrate that public spaces have been split apart from First Amendment protections while the expression of political ideas has been excluded from privately owned publicly accessible malls Today the traditional indoor suburban shopping mall that icon of modern American capitalism and culture is being replaced by outdoor retail centers Yet the law and courts have been slow to catch up Maniscalco argues that scholars students and the public must confront these innovations in commercial design and consumer practices as well as what they portend for contemporary metropolitan America and its civic spaces *The Paradoxes of Planning* Sara Westin,2016-03-03 Why is it that modern architects and planners these benevolent and socially visionary experts have created environments that can make one feel so uneasy Using a philosophical and psycho analytical approach this book critically examines expert knowledge within architecture and urban planning Its point of departure is the gap between visions and realities intentions and outcomes in planning with particular focus on projects in Sweden that try to create an urban atmosphere Finding insights from the work of Sigmund Freud and his followers the book argues that urban planning during the 20th century is a neurotic activity prone to produce a type of alienation Besides trying to understand the gap

between intentions and outcomes in planning the book also discusses how to define the concept of the urban juxtaposing different knowledge traditions contrasting the positivistic theory of space syntax with poetic dialectical approaches the planner view of the city with that of the fl neur examining texts by Virginia Woolf and August Strindberg

History and Precedent in Environmental Design Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful

The Victorian Art School Ranald Lawrence, 2020-09-02 The Victorian Art School documents the history of the art school in the

nineteenth century from its origins in South Kensington to its proliferation through the major industrial centres of Britain Charles Rennie Mackintosh's Glasgow School of Art together with earlier examples in Manchester and Birmingham demonstrate an unprecedented concern for the provision of plentiful light and air amidst the pollution of the Victorian city As theories of design education and local governance converged they also reveal the struggle of the provincial city for cultural independence from the capital Examining innovations in the use of new technologies and approaches in the design of these buildings The Victorian Art School offers a unique and explicitly environmental reading of the Victorian city It examines how art schools complemented civic Improvement programmes their contribution to the evolution of art pedagogy the tensions that arose between the provincial schools and the capital and the role they would play in reimagining the relationship between art and public life in a rapidly transforming society The architects of these buildings synthesised the potential of art with the perfection of the internal environment indelibly shaping the future cultural life of Britain **Rethinking Public**

Space Ali Madanipour, 2023-01-17 Taking a critical perspective this book rethinks public space in the context of contemporary global health and economic crises as well as technological political and cultural change In order to do so Ali Madanipour brings together two often unrelated discourses public space and social inclusion interrogating the potential for public spaces to contribute to inclusive social practices **The world book encyclopedia**, 1997 **Carne y piedra**

Richard Sennett, 2019-04-18 Carne y piedra es una historia de la ciudad en la civilizaci n occidental contada a trav s de la experiencia corporal de las personas Apoy ndose en un enfoque multidisciplinar y en su vasta erudici n Richard Sennett describe aspectos ntimos de la vida c mo se mov an hombres y mujeres qu ve an y o an d nde com an cu ndo se ba aban c mo hac an el amor en el espacio urbano de ciudades emblem ticas a lo largo de la historia De la desnudez en la antigua Atenas a la falta de contacto con los otros en la Nueva York contempor nea de la estricta geometr a romana a la creaci n de lugares para la caridad en el Par s medieval de las reuniones de los primeros cristianos a las fiestas revolucionarias francesas del destino de los jud os en el gueto de Venecia durante el Renacimiento al del ciudadano franc s en el Par s del siglo XIX el autor explora un tema vasto y elusivo la cambiante relaci n del cuerpo humano con su entorno construido **Race** Denise Eileen McCoskey, 2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person's physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one's skin lies at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age

Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal s seminal study Black Athena this is a powerful and original new assessment
