treated as mute or neutral backdrops to maternal history but as a series of vital entangled atmospheres materials practices and objects that are produced by and in turn produce particular social and political conditions gendered structures and experiences Moving across spaces systems protagonists and their subjectivities the book shows how hospital design and protocol altered ordinary birth at home and continues to shape maternal spatial experience today As such it will be of interest to a wide range of readers from architectural historians theoreticians designers and students to medical humanities historians to English Literature humanities and material studies scholars as well as those interested in creative critical writing
