NASA Space Technology Roadmaps and Priorities National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Steering Committee for NASA Technology Roadmaps, 2012-06-07 NASA's Office of the Chief Technologist OCT has begun to rebuild the advanced space technology program in the agency with plans laid out in 14 draft technology roadmaps It has been years since NASA has had a vigorous broad based program in advanced space technology development and its technology base has been largely depleted However success in executing future NASA space missions will depend on advanced technology developments that should already be underway Reaching out to involve the external technical community the National Research Council NRC considered the 14 draft technology roadmaps prepared by OCT and ranked the top technical challenges and highest priority technologies that NASA should emphasize in the next 5 years This report provides specific guidance and recommendations on how the effectiveness of the technology development program managed by OCT can be enhanced in the face of scarce resources

Space Operations: Inspiring Humankind's Future Helene Pasquier, Craig A. Cruzen, Michael Schimidhuber, Young H. Lee, 2019-05-03 This book includes a selection of 30 reviewed and enhanced manuscripts published during the 15th SpaceOps Conference held in May 2018 in Marseille France

The selection was driven by their quality and relevance to the space operations community. The papers represent a cross section of three main subject areas: Mission Management (management tasks for designing, preparing, and operating a particular mission); Spacecraft Operations (preparation and implementation of all activities to operate a space vehicle, crewed and uncrewed, under all conditions); and Ground Operations (preparation, qualification, and operations of a mission-dedicated ground segment and appropriate infrastructure, including antennas, control centers, and communication means and interfaces). This book promotes the SpaceOps Committee's mission to foster the technical interchange on all aspects of space mission operations and ground data systems while promoting and maintaining an international community of space operations experts.

WESCON ... Conference Record, 1996 **Design Methodologies for Space Transportation Systems** Walter Edward Hammond, 2001. Annotation: *Design Methodologies for Space Transportation Systems* is a sequel to the author's earlier text *Space Transportation: A Systems Approach to Analysis and Design*. Both texts represent the most comprehensive exposition of the existing knowledge and practice in the design and project management of space transportation systems and they reflect a wealth of experience by the author with the design and management of space systems. The text discusses new conceptual changes in the design philosophy away from multistage expendable vehicles to winged reusable launch vehicles and presents an overview of the systems engineering and vehicle design process as well as systems trades and analysis. Individual chapters are devoted to specific disciplines such as aerodynamics, aerothermal analysis, structures, materials, propulsion, flight mechanics, and trajectories; avionics and computers and control systems. The final chapters deal with human factors, payload, launch, and mission operations, safety, and mission assurance. The two texts by the author provide a valuable source of information for the space transportation community of designers, operators, and managers. A companion CD-ROM succinctly packages some oversized figures and tables, resources for systems engineering and launch ranges, and a compendium of software programs. The computer programs include the USAF AIRPLANE AND MISSILE DATCOM CODES with extensive documentation; COSTMODL for software costing; OPGUID launch vehicle trajectory generator; SUPERFLO, a series of 11 programs intended for solving compressible flow problems in ducts and pipes found in industrial facilities; and a wealth of Microsoft Excel spreadsheet programs covering the disciplines of statistics, vehicle trajectories, propulsion performance, math utilities.
