Education and the Public Interest Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education In the U S these reforms are rationalized based on intermediate variables like the number of math credits completed in high school and net prices However the reforms rationalized based on this research are seldom evaluated in relation to outcomes i e measures of student achievement and equal opportunity to attain an education In *Education and the Public Interest* the editor re examines the political rationales for these reforms John Rawls s theory of justice is reconstructed to develop a framework for assessing the effects of public policy on these outcomes This volume undertakes a comparative study of the states in the U S to examine how education reforms influence student achievement high school graduation and college access and finance schemes influence college access Policies implemented by states in the 1990s were associated with improved achievement as measured by test scores for high school students These policies also correlate with increased high school drop out rates and the widening gap in college enrolment rates across income groups This volume considers how privatization and accountability policies can be reconstructed to reduce inequality while continuing to improve student achievement and college enrolment I enjoyed reading the book and benefited from it and I feel confident others will as well I am particularly taken by its sweep and by the skill and persuasiveness with which the author ties together the broad trends and themes of privatization globalization school reform preparation equity equality and college access Prof James C Hearn Vanderbilt University USA What I especially like about this book is the framing of the importance of the topic in terms of the global political and economic changes and the notion of access to quality education as a basic right Prof Laura W Perna College of Education University of Maryland USA

Undermining Racial Justice Matthew Johnson, 2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial justice Despite knowing that racial disparities would likely continue Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education As Matthew Johnson illustrates inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide
