Reflections On Intelligence:

Reflections on Intelligence Reginald Victor Jones, 1989 *Reflections on Intelligence* Magnus Vinding, 2017-05-02 A lot of people are talking about superintelligent AI these days But what are they talking about Indeed what is intelligence in the first place This question is generally left unanswered even unasked in discussions about the perils and promises of artificial intelligence which tends to make these discussions more confusing than enlightening More clarity and skepticism about this term intelligence is desperately needed Hence this book *Reflections on Intelligence* aims to look deeper into the concept of intelligence and to question common assumptions about the phenomenon or rather phenomena that we refer to with the word intelligence Based on such an examination it proceeds to criticize some of the views and ideas commonly discussed in relation to the future of artificial intelligence and to draw some general conclusions about the future of intelligence

Reflections on Artificial Intelligence for Humanity Bertrand Braunschweig, Malik Ghallab, 2021-02-06 We already observe the positive effects of AI in almost every field and foresee its potential to help address our sustainable development goals and the urgent challenges for the preservation of the environment We also perceive that the risks related to the safety security confidentiality and fairness of AI systems the threats to free will of possibly manipulative systems as well as the impact of AI on the economy employment human rights equality diversity inclusion and social cohesion need to be better assessed The development and use of AI must be guided by principles of social cohesion environmental sustainability resource sharing and inclusion It has to integrate human rights and social cultural and ethical values of democracy It requires continued education and training as well as continual assessment of its effects through social deliberation The *Reflections on AI for Humanity* proposed in this book develop the following issues and sketch approaches for addressing them How can we ensure the security requirements of critical applications and the safety and confidentiality of data communication and processing What techniques and regulations for the validation certification and audit of AI tools are needed to develop confidence in AI How can we identify and overcome biases in algorithms How do we design systems that respect essential human values ensuring moral equality and inclusion What kinds of governance mechanisms are needed for personal data metadata and aggregated data at various levels What are the effects of AI and automation on the transformation and social division of labor What are the impacts on economic structures What proactive and accommodation measures will be required How will people benefit from decision support systems and personal digital assistants without the risk of manipulation How do we design transparent and intelligible procedures and ensure that their functions reflect our values and criteria How can we anticipate failure and restore human control over an AI system when it operates outside its intended scope How can we devote a substantial part of our research and development resources to the major challenges of our time such as climate environment health and education Why School? Mike Rose, 2011-02 In the tradition of Jonathan Kozol this little book is driven by big questions What does it mean to be educated What is intelligence How should we think
