**Reflexive Ethnography** Charlotte Aull Davies, 2012 Reflexive Ethnography is a unique guide to ethnographic research for students of anthropology and related disciplines It provides practical and comprehensive guidance to ethnographic research methods but also encourages students to develop a critical understanding of the philosophical basis of ethnographic authority Davies examines why reflexivity at both personal and broader cultural levels should be integrated into ethnographic research and discusses how this can be accomplished for a variety of research methods This revised and updated second edition includes a new chapter on internet based research and interethnography chapters on selection of topics and methods data collection and analysis and ethics and politics of research practical advice on writing up ethnographic study new and updated research examples Postmodernist relativism can lead to an over emphasis on reflexivity that denies the possibility of social research Reflexive Ethnography utilises postmodernist insights incorporation of different standpoints exposure of the intellectual tyranny of meta narratives but proposes that reflexive ethnographic research be undertaken from a realist perspective Reflexive Ethnography will help students to use and understand ethnographic research practices that fully incorporate reflexivity without abandoning claims to develop valid knowledge of social reality

**Meta-Ethnographic Synthesis in Education** Michalis Kakos, Bettina Fritzsche, 2020-04-22 Calls for deparochialization of educational research Lingard 2006 have directed educational ethnography from the conventional research designs and from the study of single sites and local situations to the study of the circulation of cultural meanings objects and identities in diffuse time spaces Marcus 1995 96 In response to this call and following the already established tradition of use of meta ethnography in health studies this volume explores the potentials of this method Noblit Hare 1988 to unpick the interconnectedness of different educational sites which have been and are being studied ethnographically Besides metaethnographic analyses may also offer a credible response to the lessening of opportunities for original educational ethnographic research at times of limited resources The volume examines the forms of translocal and transtemporal ethnographic synthesis currently in use by educational ethnographers as well as the challenges and the possibilities that the method offers It also addresses and attempts to respond to the question if meta ethnography might be a means to sharpen ethnographers sensitivity for each other s work and achievements in the past This book was originally published as a special issue of *Ethnography and Education*

**Social Research and Disability** Ciaran Burke, Bronagh Byrne, 2020-12-29 Social Research and Disability argues that the contemporary rules of sociological methods outlined in numerous research methods texts make a number of assumptions concerning the researcher including

ambulance sight hearing and speech In short the disabled researcher is not considered when outlining the requirements of particular methods Drawing upon these considerations the volume emphasizes how disabled researchers negotiate the empirical process in light of disability whilst retaining the scientific rigour of the method It also considers the negative consequences arising from disabled researchers attempts at passing and the benefits that can emerge from a reflexive approach to method This innovative and original text will for the first time bring together research active academics who identify as being disabled to consider experiences of being disabled within a largely ableist academy as well as strategies employed and issues faced when conducting empirical research The driving force of this volume is to provide the blueprints for bringing how we conduct social research to the same standards and vision as how the social world is understood multi faceted and intersectional To this end this edited collection advocates for a sociological future that values the presence of disabled researchers and normalises research methods that are inclusive and accessible The interdisciplinary focus of Social Research and Disability offers a uniquely broad primary market This volume will be of interest not only to the student market but also to established academics within the social sciences
