Reform of Civil Procedure A. A. S. Zuckerman, Ross Cranston, 1995      European Traditions in Civil Procedure C. H. van Rhee, 2005 European co operation has resulted in many new and challenging opportunities for legal scholars who since the so called codification period have become used to operating in a purely national context This applies also to scholars in the field of civil procedure who for a considerable period of time have resisted leaving the purely national domain These scholars have devoted a great deal of attention to the question whether or not harmonisation of civil procedural law is a feasible option and if so in what manner harmonisation should be achieved The contributors to this book seek to further the harmonisation debate by exploring some of the main trends in the development of civil procedural law during the last two centuries in several European countries Germany Austria Switzerland France England and Wales The Netherlands and Belgium Two of the central issues that are addressed by the contributors are the extent to which the various procedural models have influenced each other and the extent to which common traditions in civil procedural law may be distinguished in Europe Each general chapter in this book is supplemented by three chapters devoted to specific procedural topics Conciliation Party Interrogation as Evidence and the Role of the Judge In addition extensive bibliographical references are included      Access to Justice J. Peysner, 2014-09-29 This book addresses an experiment in funding money damage claims in England from 2000 to 2013 The model recoverable conditional fees was unique and has remained so It covers the development amendment and effective abolition of the model as well as the process of policy development and the motivation and objectives of the policy makers      The Class Action in Common Law Legal Systems Rachael Mulheron, 2004-11-15 Multi party litigation is a world wide legal process and the class action device is one of its best known manifestations As a means of providing access to justice and achieving judicial economies the class action is gaining increasing endorsement particularly given the prevalence of mass consumerism of goods and services and the extent to which the activities and decisions of corporations and government bodies can affect large numbers of people The primary purpose of this book is to compare and contrast the class action models that apply under the federal regimes of Australia and the United States and the provincial regimes of Ontario and British Columbia in Canada While the United States model is the most longstanding there have now been sufficient judicial determinations under each of the studied jurisdictions to provide a constructive basis for comparison In the context of the drafting and application of a workable class action framework it is apparent that similar problems have been confronted across these jurisdictions which in turn promotes a search for assistance in the experience and legal analysis of others The book is presented in three Parts The first Part deals with the class action concept and its alternatives and also discusses and critiques the stance of England where the introduction of the opt out class action model has been opposed The second Part focuses upon the various criteria and factors governing commencement of a class action encompassing matters such as commonality superiority suitability and the class representative Part 3 examines matters pertaining to conduct of the

action itself such as becoming a class member notice requirements settlement judgments and costs and fees The book is written to have practical utility for a wide range of legal practitioners and professionals such as academics and students of comparative civil procedure and multi party litigation litigation lawyers who may use the reference materials cited to the benefit of their own class action clients and those charged with law reform who look to adopt the most workable and avoid the unworkable features in class action models elsewhere *Beyond the Adversarial System* Helen Stacy, Michael Lavarch, 1999 Australia is presently seeking to streamline its civil justice system It is popular folklore that the Australian civil justice system is inaccessible to ordinary people as it is expensive slow and complex The reasons for these alleged failings are attributed to various causes such as arcane and inefficient judicial practices money hungry lawyers or more fundamentally to the very underpinnings of civil litigation adversarialism This volume confronts this folklore It provides perspectives about civil justice from its major user and funding source government and the group of Australians who have used it the least and feel most alienated from the system indigenous Australians It explores the insights of those who work with adversarialism day in and day out judges and lawyers and reveals both defenders and strident advocates for change Finally it steps back and gives an outsider's view of Australian adversarialism from those with knowledge of a sister system in the United States
