Reforming Urban Land Policies and Institutions in Developing Countries Catherine Farvacque Vitovic, Patrick McAuslan, Banco Mundial, 1992 Reforming Urban Land Policies and Institutions in Developing Countries Catherine Farvacque, Patrick McAuslan, 1992 This paper attempts to define and assess the various institutional and mechanical elements which constitute a land management system and which have a significant impact on the functioning of land markets The assumption of this report is that the accumulation over time of different institutions and instruments which have reflected different priorities and policies has inhibited the efficient and equitable operation of land markets and that reforms of institutions and policies are now urgently needed Adapt du r sum des auteurs **1991** .1992 Trends in <u>Urbanisation and Urban Policies in OECD Countries What Lessons for China?</u> OECD, China Development Research Foundation, 2010-08-27 This report presents an overview of trends in urban policies in OECD countries with the objective to identify successes and failure that could inform national Chinese policy makers in their preparation of an Urbanisation Household Responses to Poverty and Vulnerability Caroline O. N. Strategy Guiding cities Babar Mumtaz,2001 Moser, Cathy McIlwaine, Jeremy Holland, 1997 This research paper describes the main results from the community of Angyalfold in Budapest Hungary The research is concerned with the strategies adopted by the urban poor to reduce vulnerability and prevent impoverishment during periods of economic stress This type of study assists policymakers in designing effective locally based solutions that ensure the poor are themselves active agents of growth rather than passive recipients of compensatory measures Three features distinguish this study from other poverty studies a micro level approach combining households and communities as the main units of analysis an unusually long period of observation for some communities and households and a comparative framework offering fours cases with very different economic development levels and institutional contexts The study concludes with some priority recommendations for action 1 support households in their role as safety net 2 alleviate constraints on women s labor supply 3 ensure that social capital is not taken for granted 4 develop social policy that integrates human capital and social capital 5 pursue further research and 6 develop tools and indicators to strengthen the assets of the poor The State of Post-conflict Reconstruction Naseem Badiey, 2014 Naseem Badiev examines the local dynamics of the emerging capital city of Juba Southern Sudan during the historically pivotal transition period following the 2005 Comprehensive Peace Agreement CPA Focusing on the intersections of land tenure reform and urban development she challenges the dominant paradigm of post conflict reconstruction and re conceptualizes state building as a social process underpinned by negotiation Badiey explores local resistance to reconstruction programmes debates over the interpretation of peace settlements and competing claims to land and resources not as problems to be solved through interventions but as negotiations of authority which are fundamental to shaping the character of the state While donors and aid agency officials anticipated clashes between the Government of Sudan and the Sudan People's

Liberation Movement SPLM following the CPA they did not foresee internal divisions that impeded reconstruction in Southern Sudan raising serious questions about the viability of an independent state In Juba local elites interpreted the CPA in line with their economic and political interests using claims to land authority and political power to challenge the SPLM s agenda for urban reconstruction In revealing how local actors strategically interpreted the framework of land rights in Southern Sudan the book offers a basis for understanding the challenges that confront the nascent South Sudan s state builders and their international partners in the future NASEEM BADIEY is Assistant Professor of International Development and Humanitarian Action at California State University Monterey Bay

A Reappraisal of the Urban Planning Process Alexander Clement Mosha, 1995 Africa's Urban Revolution Doctor Edgar Pieterse, Susan Parnell, 2014-01-09 The facts of Africa's rapid urbanisation are startling By 2030 African cities will have grown by more than 350 million people and over half the continent's population will be urban Yet in the minds of policy makers scholars and much of the general public Africa remains a quintessentially rural place This lack of awareness and robust analysis means it is difficult to make a policy case for a more overtly urban agenda As a result there is across the continent insufficient urgency directed to responding to the challenges and opportunities associated with the world's last major wave of urbanisation Drawing on the expertise of scholars and practitioners associated with the African Centre for Cities and utilising a diverse array of case studies Africa's Urban Revolution provides a comprehensive insight into the key issues demographic cultural political technical environmental and economic surrounding African urbanisation the Law Back In Patrick McAuslan, 2019-07-23 This title was first published in 2003 Bringing together the two fields of land reform and law this volume examines the role the law and lawyers can should and do play in developing countries in the evolution of land policies in land tenure reform and in the reform of land use and urban planning Providing both a theoretical and practical perspective it discusses the role of law in both urban land reform concentrating on reforms in land use and town and country planning law and general national land reform looking at specific case studies and at more general themes It provides a coherent set of ideas and philosophies about land reform through the medium of law which have been developed through reflection and action over a considerable period of time *Urban Geography* Michael Pacione, 2005 The second edition of Urban Geographycontinues to provide an authoritative and stimulating global introduction to the study of towns and cities The text synthesizes a wealth of material to provide unrivalled depth and breadth for students of urban geography drawing on a rich blend of theoretical and empirical information with which to advance the knowledge of the city The new edition has been extensively revised to reflect feedback from users and to incorporate the latest research and developments in the field The text is divided into six main parts that explain and discuss the field of urban geography and the importance of a global perspective the historical growth of cities from the earliest times and the urban geography of the major world regions the dynamics of urban structure and land use change in Western cities economy society and politics in the Western

city the economic social political and environmental challenge faced by the third world city an overview on the future of cities and cities of the future Featuring over one hundred and eighty case study and explanatory boxes this book draws insights from across the globe and contains a glossary of key terms and words chapter summaries key points study questions and annotated further reading Property Rights, Land Values and Urban Development Li Tian, 2014-12-31 This book presents an analysis of betterment and compensation issues under the Land Use Rights LURs System in China since 1988 The topic originates from the observation of widening inequity and increasing uncertainty associated with the failure of g Years of World Bank Shelter Lending Robert M. Buckley, Jerry Kalarickal, 2006-01-01 As England's Industrial Revolution started the process of urbanization that has since characterized development throughout the world a poet worried about the dark satanic mills that were such a fundamental part of this revolution However despite his misgivings he also suggested that it was necessary for societies to arm themselves with chariots of fire and other weapons so that they could master this process In a somewhat more prosaic poetic vein World Bank President Robert McNamara launched the bank s shelter assistance programs saying that If cities do not begin to deal more constructively with poverty poverty may begin to deal more destructively with cities These concerns would appear to have even more resonance today as the population of cities in developing countries increasing by unprecedented levels of more than 1 billion people per year for the next 15 years This magnitude suggests the scale of the increase in the investment in shelter needed to meet the needs of this growing Land Issues for Urban Governance in Sub-Saharan Africa Robert Home, 2020-11-11 Sub Saharan Africa population faces many development challenges such as its size and diversity rapid urban population growth history of colonial exploitation fragile states and conflicts over land and natural resources This collection contributed from different academic disciplines and professions seeks to support the UN Habitat New Urban Agenda passed at Habitat III in Quito Ecuador in 2016 It will attract readers from urban specialisms in law geography and other social sciences and from professionals and policy makers concerned with land use planning surveying and governance Among the topics addressed by the book are challenges to governance institutions how international development is delivered building land management capacity funding for urban infrastructure land based finance ineffective planning regulation and the role of alternatives to courts in resolving boundary and other land disputes Issues of rights and land titling are explored from perspectives of human rights law the right to development and women's rights of access to land and land tenure regularization Particular challenges of housing planning and informality are addressed through contributions on international real estate investment community participation in urban settlement upgrading housing delivery as a partly failing project to remedy apartheid s legacy and complex interactions between political power money and land Infrastructure challenges are approached in studies of food security and food systems urban resilience against natural and man made disasters and informal public transport Urban Land Markets Somik V. Lall, Mila Freire, Belinda Yuen, Robin Rajack, Jean-Jacques Helluin, 2009-10-07 As urbanization

progresses at a remarkable pace policy makers and analysts come to understand and agree on key features that will make this process more efficient and inclusive leading to gains in the welfare of citizens Drawing on insights from economic geography and two centuries of experience in developed countries the World Bank's World Development Report 2009 Reshaping Economic Geography emphasizes key aspects that are fundamental to ensuring an efficient rural urban transformation Critical among these are land as the most important resource and well functioning land markets Regardless of the stage of urbanization flexible and forward looking institu ons that help the efficient functioning of land markets are the bedrock of succe ful urbanization strategies In particular institutional arrangements for allocating land rights and for managing and regulating land use have significant implica ons for how cities deliver agglomeration economies and improve the welfare of their residents Property rights well functioning land markets and the management and servicing of land required to accommodate urban expansion and provide trunk infrastructure are all topics that arise as regions progress from incipient urbani tion to medium and high density Strategic Options for Urban Infrastructure Management William F. Fox,1994-01-01 Experience of the past decade confirms that the solution to infrastructure problems is not merely to expand capacity by making new investments Much more systematic changes must be undertaken if service delivery is to attain the standards necessary to improve quality of life and allow economic output to expand more rapidly This paper identifies several broad areas for reform and recommends a series of actions to attain effective service delivery Adapt du r sum de l'auteur The Challenge of Slums United Nations Human Settlements Programme, 2012-05-23 The Challenge of Slums presents the first global assessment of slums emphasizing their problems and prospects Using a newly formulated operational definition of slums it presents estimates of the number of urban slum dwellers and examines the factors at all level from local to global that underlie the formation of slums as well as their social spatial and economic characteristics and dynamics It goes on to evaluate the principal policy responses to the slum challenge of the last few decades From this assessment the immensity of the challenges that slums pose is clear Almost 1 billion people live in slums the majority in the developing world where over 40 per cent of the urban population are slum dwellers The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities governments civil society and the international community This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes The Global Report on Human Settlements is the most authoritative and up to date assessment of conditions and trends in the world's cities Written in clear language and supported by informative graphics case studies and extensive statistical data it will be an essential tool and reference for researchers academics planners public authorities and civil society organizations around the world Financing Africa's Cities Thierry Paulais, 2012-07-05 This volume addresses the issues of financing urban growth of the African continent which has the

highest urban growth rate on the planet in the next decades Considerable investment will be needed to sustain this level of growth and to clear up accumulated backlogs At the same time decentralization has resulted in increased responsibilities for local government but in most cases institutional reforms were carried out without the transfer of a sufficient level of resources and local capacities in governance and project management are weak Which mechanisms will finance these extensive needs and how will African local governments meet these needs Specifics on how to finance African cities have not been studied The actual scale of this market has not been fully grasped A systemic approach to this market is difficult because of its diversity country size institutional context characteristics of urban network availability of capital market currency etc and a lack of data Donors assistance methods in the sector are disparate marked by disputes between different schools of thought special purpose vehicles created by donors operate according to a variety of methods and with wide ranging and sparsely disseminated results What is the best way to transform these systems often antiquated in many respects into modern financing systems that facilitate access to domestic markets mobilize local savings and reinforce local government autonomy There is no single answer to this question in regard to such a variety of institutional and economic contexts The main objective of the study is to clarify the debates and to enlighten the choices of African decision makers at local and national level **Urban Development and Planning** Bikram Pattanaik, 2025-03-20 This book details the most contemporary concerns related to urban development governance and planning as well as the challenges to urban administration It analyses the policies and programmes adopted by both high income and lower middle income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic practical perspective of the issues at hand This volume elucidates urban development theories and approaches coupled with urban planning local government finance urban management and urban governance It also discusses urban issues and challenges such as education health waste management land use planning housing and transport Critical concerns related to urban water bodies open spaces urban heritage and smart cities and urban future are similarly addressed This book will be useful to students researchers and teachers of urban planning and architecture urban sociology economics geography environmental science and public administration It shall also be useful to NGOs parastatal bodies and trainers of urban planning and development Planners policymakers functionaries and elected representatives of urban local bodies may also use this book as a capacity building instrument
