Labour's Economic Ideology Since 1900 Christopher Kirkland, 2022-09-20 This book traces the economic ideology of the UK Labour Party from its origins to the current day Through its analysis the book emphasises key crises including the 1926 General Strike the 1931 Great Depression the 1979 Winter of Discontent and the 2007 2008 economic crisis In analysing this history the ideology of the Labour Party is examined through four core themes the party's definition of socialism the role of the state in economic decision making the party's understanding of inequalities and its relationship with the trade union movement The result is a systematic

exploration of the drivers and key ideas behind the Labour Party's economic ideology. In demonstrating how crises have affected the party's economic policy, the book presents a historical analysis of the party's evolution since its formation and offers insights into how future changes may occur.

**Governing Financialization** Jack Copley, 2022 The book offers an alternative explanation of why the British state propelled radical financialization in the 1970s and 1980s.

**Ten Years of New Labour** M. Beech, S. Lee, 2015-12-04 Evaluates the Blair government from 1997-2007, conducting high quality research into aspects of British politics with particular emphasis on parties, policies and ideologies. With contributions from key figures in the field, further topics include New Labour's record on social policy, defence policy, constitutional reform and public expenditure.

**British Government and Politics** Michael L. Mannin, 2010-01-16 This deeply informed text sets the government and politics of Britain firmly in the context of Britain's enduring membership in the European Union. Michael L. Mannin thoroughly applies the concept of Europeanization across the political system to explore how far change is a product of Britain's interdependent relationship with the EU. He shows how the EU's treaty relationships present new challenges to sovereign states, especially Britain, whose psyche has long revolved around iconic notions of Parliamentary sovereignty, imperial power, national independence and an assumed cultural homogeneity. Examining the cultural, economic and social background to Britain's twenty-first century politics, Mannin challenges some of the historical myths on which Britain's exceptionalism is founded. He then analyzes contemporary political institutions and processes in the context of Europeanization, as well as the impact of the EU on policy and policy making. Ideal for courses in British and European politics, this book breaks new ground in exploring the complex interdependence that the EU should bring to the study of European political systems.

*The British Government and the City of London in the Twentieth Century* Ranald Michie, Philip Williamson, 2004-10-21 The relationship between the British government and the City of London has become central to debates on modern British economic, political and social life. For some, the City's financial and commercial interests have exercised a dominant influence over government economic policy, creating a preoccupation with international markets and the strength of sterling, which impaired domestic industrial and social well-being. Others have argued that government seriously constricted financial markets, jeopardising Britain's most successful economic sector. This collection of essays was the first book to address these issues over the entire twentieth century. It brings together leading financial and political historians to assess the government-City relationship from several directions and by examination of key episodes. As such, it will be indispensable not just for the study of modern British politics and finance, but also for assessment of the worldwide problem of tensions between national governments and international financial centres.

**International Financial Architecture** C. Peláez, 2005-11-01 The Group of Seven Industrialized Countries G7 developed a new doctrine of international supervision and regulation of financial markets The G7 instructed international financial institution such as the IMF the Bank for International Settlements the World Bank and the Multilateral Development Banks to tighten their supervision and regulation of international finance This volume examines this doctrine sometimes known as the New Architecture of the International Financial System or IFA Strengthening of the international financial system never ends and there have been recurring vulnerabilities in international financial architecture The book examines current practices and its consequences and how the IFA has evolved and its alternatives The book draws upon academic knowledge practitioner techniques in financial risk management and official doctrine to analyze how investors creditors and

debts function within the new architecture      The Korean Developmental State Iain Pirie, 2007-09-12 Ian Pirie gives a comprehensive and up to date analysis of state and economic restructuring in South Korea since the 1997 crisis

Managing the Economy, Managing the People Jim Tomlinson, 2017 This study offers a distinctive new account of British economic life since the Second World War focussing upon the ways in which successive governments in seeking to manage the economy have sought simultaneously to manage the people to try and manage popular understanding of economic issues In doing so governments have sought not only to shape expectations for electoral purposes but to construct broader narratives about how the economy should be understood The starting point of this work is to ask why these goals have been focussed upon and differentially over time how they have been constructed to appeal to the population and insofar as this can be assessed how far the population has accepted these narratives The first half of the book analyses the development of the major narratives from the 1940s onwards addressing the notion of austerity and its particular meaning in the 1940s the rise of a narrative of economic decline from the late 1950s and the subsequent attempts to modernize the economy the attempts to roll back the state from the 1970s the impact of ideas of globalization in the 1990s and finally the way the crisis of 2008 onward was constructed as a problem of debts and deficits The second part of the book focuses on four key issues in attempts to manage the people productivity the balance of payments inflation and unemployment It shows how in each case governments sought to get the populace to understand these issues in a particular light and shaped strategies to that end
