Evans,2014-11-27 Schooling Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years Based in extensive archival

research it traces the origins and development of accountability reform as marked by key government and business led reports from A Nation at Risk to No Child Left Behind and Race to the Top By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools Evans shows how reformers have applied principles of business management to schools in extreme ways damaging civic education and undermining democratic learning The first full length narrative account of accountability reform and its impact on social studies and civic education Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform shedding light on its dilemmas and possibilities and allowing for thoughtful consideration of future reform efforts Handbook of Education Policy Research Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-07-17 The second edition of the Handbook of Education Policy Research the largest volume published in AERA s history addresses a variety of policy and contextual issues in early childhood K 12 and postsecondary education that have received extensive empirical attention during the past 15 years With the pandemic and social turmoil as a backdrop the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects methods theories and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s The field has become more comprehensive and inclusive and the authors represent a diversity of racial ethnic and gender identities and intellectual and disciplinary orientations Most chapters come from multiple authors reflecting the multi sourced development of research in education policy since the first volume was published This compilation consists of 70 chapters and nine commentaries that map past present and future directions of the field and richly attend to critical issues of interest to students researchers policy makers and practitioners

**Education Reform in the American States** Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public **Education, Reform and the State** John Furlong, Robert Phillips, 2002-11 This book supplies the definitive contemporary history of

education policy in the late twentieth century Some of the leading educationalists reflect on the major legislative and structural changes in the field over the last 25 years *inside/out* Rebecca A. Martusewicz, William M. Reynolds, 2012-12-06 This engaging text examines issues in education and curriculum theory from multiple critical perspectives Students are encouraged to look at education from the inside the complex processes methods and relations that operate within schools and from the outside the larger social economic and political forces that have affected schools over time Each essay begins with Guiding Questions and concludes with Questions for Discussion Teachers as Researchers activities and Suggested Readings

**The Strong State and Curriculum Reform** Leonel Lim, Michael W. Apple, 2016-04-20 As Asian education systems increasingly take on a stronger presence on the global educational landscape of special interest is an understanding of the ways in which many of these states direct their schools towards higher achievement What is missing however are accounts that take seriously the particular construction of the strong developmental state witnessed across many Asian societies and that seek to understand the politics and possibilities of curriculum change vis a vis precisely the dominance of such a state By engaging in analyses based on some of the best current social and cultural theories and by illuminating the interactions among various state and non state pedagogic agents the chapters in this volume account for the complex post colonial historical and cultural consciousnesses that many Asian states and societies experience At a time when much of the educational politics in Asia remains in a state of transition and as many of these states seek out through the curriculum new forms of social control and novel bases of political legitimacy such a volume offers enduring insights into the real if not also always relative autonomy that schools and communities maintain in countering the hegemonic presence of strong states

**The End of School Reform** Maurice R. Berube, Clair T. Berube, 2007 Education as a major social movement is coming to an end The theoretical framework for this proposition derives from Thomas Kuhn s theory of paradigm shifts of major movements and Hegel s end of history thesis The end of school reform thesis blends Arthur Danto s end of *The New Social Studies* Barbara Slater Stern, 2009-11-01 This volume *The New Social Studies People Projects and Perspectives* is not an attempt to be the comprehensive book on the era Given the sheer number of projects that task would be impossible However the current lack of knowledge about the politics people and projects of the NSS is unfortunate as it often appears that new scholars are reinventing the wheel due to their lack of knowledge about the history of the social studies field The goal of this book then is to sample the projects and individuals involved with the New Social Studies NSS in an attempt to provide an understanding of what came before and to suggest guidance to those concerned with social studies reform in the future especially in light of the standardization of curriculum and assessment currently underway in many states The authors who contributed to this project were recruited with several goals in mind including a broad range of ages interests and experiences with the NSS from participants during the NSS era through new young scholars who had never heard much about the NSS As many of the authors remind us in their chapters much has been written of the failure of the NSS However

in every chapter of this book the authors also point out the remnants of the projects that remain
