and practices of English poets writing from 1700 to the 1790s These specially commissioned essays avoid familiar categories
and single author approaches to look at the century afresh Chapters consider such large poetic themes as nature the city
political passions the relation of death to desire and dreams appeals to an imagined future and the meanings of sensibility
Other chapters explore historical developments such as the connection between poetic couplets and conversation the
conditions of publication changing theories of poetry and imagination growing numbers of women poets and readers the rise

of a self consciously national tradition and the place of lyric poetry in thought and practice The essays are well supported by supplementary material including a chronology of the period and detailed guides to further reading Altogether the volume provides an invaluable resource for scholars and students
