Riding Rockets The Outrageous Tales Of A Space Shuttle Astronaut:

Riding Rockets Mike Mullane, 2006-02-14 On February 1 1978 the first group of space shuttle astronauts twenty nine men and six women were introduced to the world Among them would be history makers including the first American woman and the first African American in space This assembly of astronauts would carry NASA through the most tumultuous years of the space shuttle program Four would die on Challenger USAF Colonel Mike Mullane was a member of this astronaut class and *Riding Rockets* is his story told with a candor never before seen in an astronaut s memoir Mullane strips the heroic veneer from the astronaut corps and paints them as they are human His tales of arrested development among military flyboys working with feminist pioneers and post doc scientists are sometimes bawdy often hilarious and always entertaining Mullane vividly portrays every aspect of the astronaut experience from telling a female technician which urine collection condom size is a fit to walking along a Florida beach in a last tearful goodbye with a spouse to a wild intoxicating terrifying ride into space to hearing Taps played over a friend s grave Mullane is brutally honest in his criticism of a NASA leadership whose bungling would precipitate the Challenger disaster *Riding Rockets* is a story of life in all its fateful uncertainty of the impact of a family tragedy on a nine year old boy of the revelatory effect of a machine called Sputnik and of the life steering powers of lust love and marriage It is a story of the human experience that will resonate long after the call of Wheel stop *Riding Rockets* R. Mike Mullane, 2006 A revealing memoir of the astronaut s career with the space shuttle program describes his childhood dreams after the launch of Sputnik work as a Mission Specialist in the first group of shuttle astronauts and hundreds of hours spent aboard the Discovery and Atlantis 60 000 first printing *Riding Rockets* Mike Mullane, 2007-02-06 Selected as a Mission Specialist in 1978 in the first group of shuttle astronauts Mike Mullane completed three missions and logged 356 hours aboard the Discovery and Atlantis shuttles It was a dream come true As a boy Mullane could only read about space travel in science fiction but the launch of Sputnik changed all that Space flight became a possible dream and Mike Mullane set out to make it come true In this absorbing memoir Mullane gives the first ever look into the often hilarious sometime volatile dynamics of space shuttle astronauts a class that included Vietnam War veterans feminists and propeller headed scientists With unprecedented candour Mullane describes the chilling fear and unparalleled joy of space flight As his career centred around the Challenger disaster Mullane also recounts the heartache of burying his friends and colleagues And he pulls no punches as he reveals the ins and outs of NASA frank in his criticisms of the agency A blast from start to finish *Riding Rockets* is a straight from the gut account of what it means to be an astronaut just in time for this latest generation of stargazers **NASA's First Space Shuttle Astronaut Selection** David J. Shayler, Colin Burgess, 2020-07-10 Unofficially they called themselves the TFNG or the Thirty Five New Guys Officially they were NASA s Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle Prior to this time only pilots or scientists trained as pilots had been assigned to fly on America s spacecraft but with the advent of the innovative winged spacecraft the door was finally

opened to non pilots including women and minorities In all 15 of those selected were categorised as Pilot Astronauts while the other 20 would train under the new designation of Mission Specialist Altogether the Group 8 astronauts would be launched on a total of 103 space missions some flying only once while others flew into orbit as many as five times Sadly four of their number would perish in the Challenger tragedy in January 1986 In their latest collaborative effort the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews Throughout its remarkable 30 year history as the workhorse of NASA s human spaceflight exploration twice halted through tragedy the Shuttle fleet performed with magnificence So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America s Space Shuttle program This book on the Group 8 Astronauts the TFNGs is an excellent summation of the individuals first selected for the new Space Shuttle Program It provides insight into what it took to first get the Space Shuttle flying For any space enthusiast it is a must read Robert L Crippen PLT on STS 1 As a reader I had many moments where long lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page Loved it This is a must have book for every space enthusiast s library TFNG Mission Specialist Astronaut Richard Mike Mullane author of *Riding Rockets The Outrageous Tales of a Space Shuttle Astronaut* Many of the anecdotes in the book brought back memories of challenges opportunities and a team of men and women who were committed not just to the space program but to one another I ve gone back to it several times as a reference source TFNG Steve Hawley 5 time Space Shuttle Mission Specialist Astronaut The TFNG book is incredible and amazingly thorough The detail in the book is awesome It is my go to book for any of the details I ve forgotten TFNG Dr Rhea Seddon 3 time Space Shuttle Mission Specialist Astronaut I can t believe how detailed and complete it is FANTASTIC work TFNG Robert L Hoot Gibson 5 time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office

Psychology of Space Exploration: Contemporary Research in Historical Perspective Douglas A. Vakoch, National Aeronautics and Space Administration, 2011-07-06 This book explores some of the contributions of psychology to yesterday s great space race today s orbiter and International Space Station missions and tomorrow s journeys beyond Earth s orbit It provides an analysis of the challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space

Psychology of Space Exploration: Contemporary Research in Historical Perspective Douglas A. Vakoch, National Aeronautics and Space Administration, 2012-01-27 Through essays on topics including survival in extreme environments and the multicultural dimensions of exploration readers will gain an understanding of the psychological challenges that have faced the space program since its earliest days An engaging read for those interested in space history and psychology alike this is a highly relevant read as we stand poised on the edge of a new era of spaceflight Each essay also explicitly addresses the history of

the psychology of space exploration **Star Bound** Emily Carney, Bruce McCandless, 2025 *Star Bound* is a book for anyone who wants to learn about the American space program but isn't sure where to start. First and foremost it's a history, short, sweet, and straightforward. From rocketry pioneer Robert Goddard's primitive flight tests in 1926 through the creation of NASA from our first steps on the moon to construction of the International Space Station and planning a trip to Mars, readers will meet the people and projects that have put the United States at the forefront of space exploration. Along the way they'll learn how the United States beat the Soviets to the moon, why astronauts float in space (hint: it's not for lack of gravity), how fast rockets have to go to stay in orbit around Earth, how we can look back in time through a space telescope. With technology evolving and humanity's understanding of the universe expanding, we are entering an exciting period of space exploration. Authored by two veteran space writers with unique insights into the topic, *Star Bound* offers up the story of Americans in space with a focus on the cultural and societal contexts of the country's most important missions rather than engineering and technical minutiae. Vibrant, positive, and humorous, *Star Bound* is packed with facts and stories for novice space fans. And sprinkled in with the history are lists of the greatest space songs, books, movies, and more, all designed to make space exploration accessible to even the casual reader.

Tragedy and Triumph in Orbit Ben Evans, 2012-06-01 April 12, 2011 is the 50th anniversary of Yuri Gagarin's pioneering journey into space. To commemorate this momentous achievement, Springer Praxis is producing a mini-series of books that reveals how humanity's knowledge of flying, working, and living in space has grown in the last half century. *Tragedy and Triumph* focuses on the 1980s and early 1990s, a time when relations between the United States and the Soviet Union swung like a pendulum between harmony and outright hostility. The glorious achievements of the shuttle were violently arrested by the devastating loss of *Challenger* in 1986, while the Soviet program appeared to prosper with the last *Salyut* and the next generation *Mir* orbital station. This book explores the continued rivalry between the two superpowers during this period, with each attempting to outdo the other. The Americans keen to build a space station, the Soviets keen to build a space shuttle, and places their efforts in the context of a bitterly divisive decade which ultimately led them into partnership.

Sally Ride Lynn Sherr, 2014-06-03 The definitive biography of Sally Ride, America's first woman in space, with exclusive insights from Ride's family and partner by the ABC reporter who covered NASA during its transformation from a test pilot boys' club to a more inclusive elite. Sally Ride made history as the first American woman in space. A member of the first astronaut class to include women, she broke through a quarter century of white male fighter jocks when NASA chose her for the seventh shuttle mission, cracking the celestial ceiling and inspiring several generations of women. After a second flight, Ride served on the panels investigating the *Challenger* explosion and the Columbia disintegration that killed all aboard. In both instances, she faulted NASA's rush to meet mission deadlines and its organizational failures. She cofounded a company promoting science and education for children, especially girls. Sherr also writes about Ride's scrupulously guarded personal life; she kept her sexual orientation private, with exclusive access to Ride's

partner her former husband her family and countless friends and colleagues Sherr draws from Ride's diaries files and letters This is a rich biography of a fascinating woman whose life intersected with revolutionary social and scientific changes in America Sherr's revealing portrait is warm and admiring but unsparing It makes this extraordinarily talented and bold woman an inspiration to millions come alive The Penguin Book of Outer Space Exploration John Logsdon, 2018-09-11 The fascinating story of how NASA sent humans to explore outer space told through a treasure trove of historical documents publishing in celebration of NASA's 60th anniversary and with a foreword by Bill Nye An extremely useful and thought provoking documentary journey through the maze of space history There is no wiser or more experienced navigator through the twists and turns and ups and downs than John Logsdon James Hansen New York Times bestselling author of First Man now a feature film starring Ryan Gosling and Claire Foy Among all the technological accomplishments of the last century none has captured our imagination more deeply than the movement of humans into outer space From Sputnik to SpaceX the story of that journey including the inside history of our voyages to the moon depicted in First Man is told as never before in The Penguin Book of Outer Space Exploration Renowned space historian John Logsdon traces the greatest moments in human spaceflight by weaving together essential fascinating documents from NASA's history with his expert narrative guidance Beginning with rocket genius Wernher von Braun's vision for voyaging to Mars and closing with Elon Musk's contemporary plan to get there this volume traces major events like the founding of NASA the first American astronauts in space the Apollo moon landings the Challenger disaster the daring Hubble Telescope repairs and more In these pages we such gems as Eisenhower's reactions to Sputnik the original NASA astronaut application John Glenn's reflections on zero gravity Kennedy's directives to go to the moon discussions on what Neil Armstrong's first famous first words should be firsthands accounts of spaceflight and so much more
