Trade Union Rights at the Workplace Roger Blanpain, Thomas Klebe, Marlene Schmidt, Bernd Waas, 2012-01-01 For employees collective protection has never been more urgent Everywhere pressures resulting from worldwide competition and technical innovation are downgrading and relocating jobs closing companies and fuelling workers fears of less than secure working conditions de qualification and job loss More and more trade unions confront the challenge of asserting their rights across borders However in order to establish the necessary preconditions for any transnational solidarity it is necessary to define and clarify both what is distinctive and what is fundamental in the different legal frameworks affecting trade union activity That is what this book sets out to do The essays presented here are an outcome of an international and comparative conference organised and sponsored by the newly established Hugo Sinzheimer Institute of Labour Law HSI Frankfurt am Main which took place in Frankfurt in January 2011 at the premises of IG Metall the world s largest trade union The book offers an overview of trade union rights in each of seven industrial countries Belgium Hungary England Germany France the Netherlands and the United States A concluding chapter by Manfred Weiss notes the futility of a harmonization approach stressing rather a strategy of accepting variety which nevertheless embraces close cooperation Issues covered include the following direct and indirect recognition of the rights of the unions at the workplace the right of access of trade union representatives not employed in the establishment competition from non unionized firms and low labour cost operations new styles of management hostile to trade unions employers use of the courts to prevent industrial action illegalized by new legislation relations among trade unions works councils workers representatives and employers organizations the role of the union at a time of change of company ownership and effects of public resistance to cuts in public services and to job losses At a time when the protection of the global voice of workers is of the utmost importance sensitivity to existing cultural differences is crucial to effective international engagement and cooperation among trade unions As an important contribution in this respect this book will be of great value to labour and employment lawyers and other professionals involved in law and policy affecting labour and industrial relations Publisher s website

The Right to Membership in a Trade Union Anna Margrethe Sogaard, 1966

An Ownership Theory of the Trade Union Donald L. Martin, 2023-07-28 An Ownership Theory of the Trade Union explores the economic theories behind trade union behavior analyzing the historical struggle to define what unions maximize Despite various theories suggesting unions aim to maximize wage rates membership benefits or organizational survival a consistent economic model for unions has been elusive The book critiques previous models highlighting the need for an ownership based approach to better explain unions objectives By examining the structure of property rights within unions the book argues that a theory of union behavior must take into account the specific rights and incentives facing union members and leaders The author introduces two contrasting models one assuming private property rights that allow union members to share in the capital value of future union gains and

another based on nonproprietary assumptions where members lack individual claims to union rents These models offer differing predictions for union policies on wages benefits and membership influenced by whether union members have a vested interest in the union's capitalized wealth The book asserts that analyzing the union's structure of property rights provides valuable insights into the practical incentives that drive union policies which are often inconsistent with wealth maximization assumptions in traditional economic models The book's chapters address specific elements of union organization including the role of union leaders monitoring costs and membership pricing and rationing Through this analysis it reveals how the ownership structure within unions shapes their economic decisions contrasting proprietary and nonproprietary models in terms of membership access wage policies and managerial discretion By focusing on property rights and institutional incentives *An Ownership Theory of the Trade Union* aims to offer a more precise and testable model of union behavior aligning it more closely with broader economic theories This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980 *The Right to Membership of a Trade Union* Roger W Rideout, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **The Universal Declaration of Human Rights** Johannes Morsink, 2010-08-03 Selected by Choice magazine as an Outstanding Academic Book for 1999 Born of a shared revulsion against the horrors of the Holocaust the Universal Declaration of Human Rights has become the single most important statement of international ethics It was inspired by and reflects the full scope of President Franklin Roosevelt's famous four freedoms the freedom of speech and expression the freedom of worship the freedom from want and the freedom from fear Written by a UN commission led by Eleanor Roosevelt and adopted in 1948 the Declaration has become the moral backbone of more than two hundred human rights instruments that are now a part of our world The result of a truly international negotiating process the document has been a source of hope and inspiration to thousands of groups and millions of oppressed individuals **Country Reports on Human Rights Practices**, 2003 **Strategies for Combating Right-Wing Extremism in Europe** Bertelsmann Stiftung, 2010-07-30 Right wing extremism is a phenomenon that can be

found throughout Europe All democratic societies are threatened by racist anti pluralistic and authoritarian ideas Even though the so called radical right differs in character and ideology in the various European countries it strives to restrict civic and human rights as well as to change the constitutional structures that are based on the principles of democracy and liberty Individual European countries deal with this challenge differently The various policy approaches found in these countries are a good source for developing improved practices for fighting rightwing extremism in Germany and worldwide With this publication the Bertelsmann Stiftung presents an overview of the radical right in Austria Belgium Denmark France Germany Great Britain Hungary Italy the Netherlands Sweden and Switzerland It also includes the most successful strategies against right wing extremism found in these countries The main focus of this publication is the actions pursued by the governments political parties and actors of the civil society Judicial provisions are highlighted as well as the implementation of laws special action programs the effectiveness of prosecution of right wing crimes cooperation of parties institutional responsibilities cooperation of authorities with NGOs and civil commitment against right wing extremism
