The Rise of the Rustbelt Philip Cooke, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company Remaking the Rust Belt Tracy Neumann, 2016-06-28 Remaking the Rust Belt tells the story of how local leaders throughout the Rust Belt adapted internationally circulating ideas about postindustrial redevelopment to create the jobs and amenities they believed would attract middle class professionals but in so doing widened and deepened economic inequality among urban residents Dealing with Deindustrialization Margaret Cowell, 2014-09-25 The late 1970s and 1980s saw a process of mass factory closures in cities and regions across the Midwest of the United States What happened next as leaders reacted to the news of each plant closure and to the broader deindustrialization trend that emerged during this time period is the main subject of this book It shows how leaders in eight metropolitan areas facing deindustrialization strived for adaptive resilience by using economic development policy The unique attributes of each region asset bases modes of governance civic capacity leadership qualities and external factors influenced the responses employed and the outcomes achieved Using adaptive resilience as a lens Margaret Cowell provides a thorough understanding of how and why regions varied in their abilities to respond to deindustrialization *The Road Through the Rust Belt* William M. Bowen, 2014-05-14 The chapters in this book explore reasons for the decline of Rust Belt cities and the often innovative responses of local leaders and entrepreneurs that are helping to revive these areas **Postindustrial DIY** Daniel Campo, 2024-02-13 Chronicles grassroots efforts to recover rebuild and enjoy architecturally iconic but economically obsolete places in the American Rust Belt A pioneering Detroit automobile factory A legendary iron mill at the edge of Pittsburgh A campus of concrete grain elevators in Buffalo Two monumental train stations one in Buffalo the other in Detroit These once noble sites have since fallen from their towering grace As local elected leaders did everything they could to destroy what was left of these places citizens saw beauty and utility in these industrial ruins and felt compelled to act Postindustrial DIY tells their stories The culmination of more than a dozen years of on the ground investigation ethnography and historical analysis author and urbanist Daniel Campo immerses the reader in this postindustrial landscape weaving the perspectives of dozens of DIY protagonists as well as architects planners and preservationists Working without capital expertise and sometimes permission in a milieu dominated by powerful political and economic interests these do it yourself actors are driven by passion and a sense of civic duty rather than by profit or political expediency They have craftily remade these sites into collective preservation projects and democratic grounds for arts and culture environmental engagement regional celebrations itinerant play and in the moment constructions Their projects are generating excitement about the prospect of Rust Belt life even as they often remain invisible to the uninformed passerby and fall short of professional preservation or environmental reclamation standards Demonstrating that there is no such thing as a site that is too far gone to save or reuse Postindustrial DIY is rich with case studies that demonstrate how great architecture is not simply for the elites or the wealthy The citizen

preservationists and urbanists described in this book offer looser more playful and often more publicly satisfying alternatives to the development practices that have transformed iconic sites into expensive real estate or a clean slate for the next profitable endeavor Transcending the disciplinary boundaries of architecture historic preservation city planning and landscape architecture Postindustrial DIY suggests new ways to engage adapt and preserve architecturally compelling sites and bottom up strategies for Rust Belt revival
