Rise of the International Richard Devetak,Tim Dunne,2024-07-04 International Relations and History were once academic fields sharing a common concern with the affairs of empires states and nations Over the course of the twentieth century however they drifted apart International Relations largely retained the focus on the affairs and relations of these principal international actors but took a methodological turn leading to higher levels of theoretical abstraction History on the other hand retained the methods that define the discipline but shifted the focus veering away from matters of state to the vast array of actors events activities and issues that colour everyday life In recent years the drift has been arrested by scholars in each discipline who have turned towards the other discipline in their research International Relations has undergone a historiographical turn while History has taken an international turn Rise of the International brings together scholars of

International Relations and History to capture the emergence and development of the thought the relations and the systems that have come to be called international in western discourse The evidence offered by contributors to the volume suggests there has been no single stable unchanging concept or object of theoretical reflection or historical investigation that can be called the international but a variety of historically contingent conceptualizations across different contexts

Rise to Globalism Stephen E. Ambrose,1976 *Revisiting Globalization and the Rise of Global Production Networks* S. Javed Maswood,2017-07-24 This book takes issue with the likening of contemporary globalization to nineteenth century trade interdependence in which the defining feature of contemporary globalization is the spread of global production networks which were notably absent in the past Maswood demonstrates that the emergence of global production networks GPNs was not a result of economic and trade liberalization but instead due to neo protectionist developments in the 1980s that acted as a catalyst to transform Japan s nationally based production networks into the now ubiquitous GPNs Through this case study of Japan the author lays out a case for reconsidering the origins of globalization and explores some of the consequences that are likely to flow from progressive evolutionary transition towards a global economy

The Insular Cases and the Emergence of American Empire Bartholomew H. Sparrow,2006 Focuses on America s first attempts at empire building through a string of U S Supreme Court decisions in the early part of the 20th century that tried to define the legal and constitutional status of America s island territories Puerto Rico Cuba and the Philippines among others and reveals how the Court provided the rationalization for the establishment of an American empire
