Bunni, Lydia B. Bunni, 2022-02-16
The new 3rd edition of Nael Bunni's *Risk and Insurance in Construction* now co-authored with Lydia Bunni explains the need for insurance in construction and engineering projects and why it must be incorporated into the Conditions of Contract for such projects. It is unique in bringing together the background of the two topics of risk and construction insurance, explaining the flow and the interaction between them, and then dealing with how they have been used to formulate the 2017 FIDIC Suite of Contracts and the 2021 Green Book. This edition has been fully updated and new chapters deal with the latest definitions of risk outlined in ISO 31000:2009 and specifically explain the principles embodied in the new Clauses 17, 18, and 19 of the Major Suite of the FIDIC forms of contract and how they should be used. An important chapter, Chapter 5, is included discussing the logical transition from decision-making to risk identification to responsibility for those allocated with particular risks to the potential liability that results. This includes discussing particular liabilities that may arise for parties typically involved in construction and engineering projects, including developers, owners, contractors, and designers. This part of the book links insurance to the law and explains the interaction between the two topics. The correlation between liability and the need for indemnity, which can only be provided properly through insurance, is highlighted. The book is essential reading for practitioners from both the engineering profession and the insurance industry in all types of projects. Engineers who are required to use one of the Major Forms of the FIDIC Suite of Contracts, whether they are designers or contractors, and those involved in the insurance sector, whether brokers, claim consultants, or insurance company personnel, will find this book to be an indispensable reference. *Risk and Insurance in Construction* Nael G. Bunni, 2003-09-02
Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law, which in themselves are so deeply and intensely complex. However, insurance and law are

interwoven in the basic procedures used in the construction industry for undertaking work be they design construction supervision or operation or any combination of them This thoroughly revised edition of Nael Bunni s successful book formerly called Insurance in Construction provides information on risk construction law and construction insurance for those involved with all aspects of construction The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity namely construction New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years including FIDIC s new suite of contracts published in September 1999 ICE s seventh edition of the civil engineering standard form of contract and ICE s second edition of the design build form Construction All Risks Insurance Paul Reed,2016-11-21 The second edition of Construction All Risks Insurance will be essential reading for both lawyers and insurance brokers in the field of construction insurance Building on its reputation as the definitive reference for practitioners and updated with respect to the Insurance Act of 2015 Construction All Risks is the go to guide looking for answers in construction insurance **Practical Risk Management in the Construction Industry** Leslie Edwards,Leslie J.
