health risks and inequities in their lives and communities Authors address an array of urgent health concerns ranging from food safety to environment new technologies to infectious disease in such contrasting locales as the US Europe South and Southeast Asia and North Africa and across diverse ethnicities and social classes **Preterm Birth in the United States**

Janet M. Bronstein,2016-07-28 This first of its kind volume addresses the myriad of issues relating to and reviews the plethora of responses to premature births in the United States both in national context and compared with other countries In addition to current clinical data it examines how preterm births in the U S fit in with larger social concerns regarding poverty racial disparities reproductive rights gender expectations and the business of health care Comparisons with preterm birth phenomena in Canada the U K and other Western European countries illustrate cultural narratives about motherhood women s status differences across social welfare and abortion policies and across health care financing and delivery systems and how these may affect outcomes for newborns The book sorts out these intersecting complexities through the following critical lenses Clinical causes treatments and outcomes of preterm birth Population the distribution of preterm births Cultural how we understand preterm birth Health care delivering care for high risk pregnant women and preterm infants Ethical moral decision making about preterm births Preterm Birth in the United States synthesizes a wide knowledge base for maternal and child health professionals across diverse disciplines including public health social work nursing medicine and health policy Social scientists with interests in reproduction and gender issues will gain access to historical clinical and epidemiological knowledge that can support their work There is also an audience for the book among childbirth activists such as supporters of midwifery and less medicalized childbirth **Occupational Science** Gail E. Whiteford,Clare

Hocking,2012-02-13 Occupational Science Society Inclusion Participation is the must have resource for occupational therapists occupational scientists students and researchers The book begins with a comprehensive review of the current literature and the knowledge generated to date Reasons for the field s limited impact are proposed including its focus on individuals rather than groups and communities its psychological view of occupation and its narrow focus on socially approved occupations Global realities such as poverty anti social behaviour and ageing populations are discussed and implications for action are considered The second section of the books comprises a series of chapters that address the philosophical theoretical and scientific bases that underpin and inform everyday decision making in occupational therapy practice This is followed by a section on methodological and structural considerations The concluding chapter offers a critical reflection on methods strategies values and relationships for the future to achieve a relevant science that makes a difference to current occupational realities Written by an internationally renowned team of contributors this book offers a truly comprehensive critique of the field Features Internationally renowned Editors and contributors First comprehensive text on occupational science Fully up to date with the latest thinking and research Links theory to practice **Global Health** Mark Nichter,2008-04-24 In this lesson packed book Mark Nichter one of the world s leading medical anthropologists summarizes

what more than a quarter century of health social science research has contributed to international health and elucidates what social science research can contribute to global health and the study of biopolitics in the future Nichter focuses on our cultural understanding of infectious and vector borne diseases how they are understood locally and how various populations respond to public health interventions The book examines the perceptions of three groups whose points of view on illness health care and the politics of responsibility often differ and frequently conflict local populations living in developing countries public health practitioners working in international health and health planners policy makers The book is written for both health social scientists working in the fields of international health and development and public health practitioners interested in learning practical lessons they can put to good use when engaging communities in participatory problem solving Global Health critically examines representations that frame international health discourse It also addresses the politics of what is possible in a world compelled to work together to face emerging and re emerging diseases the control of health threats associated with political ecology and defective modernization and the rise of new assemblages of people who share a sense of biosociality The book proposes research priorities for a new program of health social science research Nichter calls for greater involvement by social scientists in studies of global health and emphasizes how medical anthropologists in particular can better involve themselves as scholar activists

Risk Communication and Public Health Peter Bennett, 2010 Controversies about risks to public health regularly hit the news whether about food safety environmental issues medical interventions or lifestyle risks such as drinking To those trying to manage or regulate risks public reactions sometimes seem bizarre To the public the behaviour of those supposedly in charge can seem no less odd Trust is currently at a premium This new edition of Risk Communication and Public Health covers the theoretical and research background and presents a wide range of contemporary case studies and the learning experiences from these and the political institutional and organisational issues they raise It concludes with an analysis of the lessons learned and gives pointers for the future The book offers international perspectives and contributors include representatives from consumer organisations as well as public health practitioners and academics This edition is substantially updated with new material and case studies but retains the same focus the improvement of communication and promotion of good practice in risk communication in Government the Health Service and elsewhere This second edition presents a broad view of the issues around risk communication and public health in a way that will be of interest to a range of public health practitioners managers and policy makers postgraduate students and academics in a number of disciplines and those interested in environmental health

Community at Risk Thomas D. Beamish, 2015-05-06 In 2001 following the events of September 11 and the Anthrax attacks the United States government began an aggressive campaign to secure the nation against biological catastrophe Its agenda included building National Biocontainment Laboratories NBLs secure facilities intended for research on biodefense applications at participating universities around the country In Community at Risk Thomas D Beamish

examines the civic response to local universities plans to develop NBLs in three communities Roxbury MA Davis CA and Galveston TX At a time when the country s anxiety over its security had peaked reactions to the biolabs ranged from vocal public opposition to acceptance and embrace He argues that these divergent responses can be accounted for by the civic conventions relations and virtues specific to each locale Together these elements clustered providing a foundation for public dialogue In contrast to conventional micro and macro level accounts of how risk is perceived and managed Beamish s analysis of each case reveals the pivotal role played by meso level contexts and political dynamics Community at Risk provides a new framework for understanding risk disputes and their prevalence in American civic life *Reconstructing Obesity* Megan B. McCullough, Jessica A. Hardin, 2013-10-01 In the crowded and busy arena of obesity and fat studies there is a lack of attention to the lived experiences of people how and why they eat what they do and how people in cross cultural settings understand risk health and bodies This volume addresses the lacuna by drawing on ethnographic methods and analytical emic explorations in order to consider the impact of cultural difference embodiment and local knowledge on understanding obesity It is through this reconstruction of how obesity and fatness are studied and understood that a new discussion will be introduced and a new set of analytical explorations about obesity research and the effectiveness of obesity interventions will be established *Food and the Risk Society* Charlotte Fabiansson, Stefan Fabiansson, 2016-05-26 This book offers a comprehensive understanding of the current scientific knowledge concerning risks associated with food preparation processing and consumption with particular attention to the gap between scientific research and public perception Examining the effects of food on the body from both micro and macro levels it covers a range of broad themes and current concerns including obesity and the obesity epidemic the benefits or otherwise of dietary supplements caffeine consumption GM food alcohol organic food the consumption of fruit and vegetables and pathogens and contaminants Thematically arranged according to the application of broad theoretical approaches in sociological theory the socio cultural perspective the risk society perspective and the governmentality perspective each chapter focuses on a particular area of interest or concern in relation to food covering the existing literature in detail and offering illustrative empirical examples whilst identifying gaps in knowledge and areas for further research An accessible and rigorous examination of food and health and the discrepancy between scientific opinion and consumer perception of safe food the real risks versus the perceived risks this book will appeal to scholars and students of sociology geography food nutrition and environmental ecosystems as well as health professionals *A Companion to the Anthropology of Environmental Health* Merrill Singer, 2016-05-31 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical

anthropologists conservationists environmental experts public health professionals health clinicians and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health along with future directions in the field
