Risky Business Science Government And Global Markets:

Risky Business G. Bruce Doern, Edward James Reed, 2000-01-01 The essays in this volume ask what risks Canadians might be exposed to as fiscal pressures strain the capacity of regulators in areas such as food drugs pesticides fisheries and the environment Political Science Abstracts ,2012-12-06 Political Science Abstracts is an annual supplement to the Political Science Government and Public Policy Series of The Universal Reference System which was first published in 1967 All back issues are still available **Rationality in Public Policy** Douglas G. Hartle, Canadian Tax Foundation, 1999 The Politics of Green Transformations Ian Scoones, Melissa Leach, Peter Newell, 2015-01-09 Multiple green transformations are required if humanity is to live sustainably on planet Earth Recalling past transformations this book examines what makes the current challenge different and especially urgent It examines how green transformations must take place in the context of the particular moments of capitalist development and in relation to particular alliances The role of the state is emphasised both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations The book also highlights the role of citizens as innovators entrepreneurs green consumers and members of social movements Green transformations must be both top down involving elite alliances between states and business but also bottom up pushed by grassroots innovators and entrepreneurs and part of wider mobilisations among civil society The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability Written by experts in the field this book will be of great interest to researchers and students in environmental studies international relations political science development studies geography and anthropology as well as policymakers and practitioners concerned with sustainability *Global Governance* Timothy J. Sinclair, 2004 *Policing the Markets* James Williams, 2012-01-17 Set against the backdrop of the recurring waves of financial scandal and crisis to hit Canada the US the UK and Europe over the last decade this book examines the struggles of securities enforcement agencies to police the financial markets While allegations of regulatory failure in this realm are commonplace and are well documented in policy and legal scholarship James Williams seeks to move beyond these conventional accounts arguing that they are based on a limited view of the regulatory process and overlook the actual practices and dilemmas of enforcement work Informed by interviews with police regulators lawyers accountants and investor advocates along with a wealth of documentary materials the book is rooted in a uniquely interdisciplinary social science perspective Peering inside the black box of enforcement it examines the organizational professional geographical technological and legal influences that shape securities enforcement as a distinctly knowledge based enterprise The result of these influences Williams argues is the production of a very particular vision of financial disorder which captures certain forms of misconduct while overlooking others a reflection not of incompetence or capture but of the unique demands and constraints of the regulatory craft Providing a very different and much needed account of the challenges faced by regulators

and enforcement agencies this book will be of enormous interest to current research on enforcement regulation and governance both within and beyond the financial realm **The National Research Council in the Innovation Policy Era** G.
