Ritual And Domestic Life In Prehistoric Europe:

Ritual and Domestic Life in Prehistoric Europe Richard Bradley, 2012-10-12 This fascinating study explores how our prehistoric ancestors developed rituals from everyday life and domestic activities Richard Bradley contends that for much of the prehistoric period ritual was not a distinct sphere of activity Rather it was the way in which different features of the domestic world were played out until they took on qualities of theatrical performance With extensive illustrated case studies this book examines farming craft production and the occupation of houses all of which were ritualized in prehistoric Europe Successive chapters discuss the ways in which ritual has been studied drawing on a series of examples that range from Greece to Norway and from Romania to Portugal They consider practices that extend from the Mesolithic period to the Early Middle Ages and discuss the ways in which ritual and domestic life were intertwined

The Prehistory of Britain and Ireland Richard Bradley, 2007-03-05 Sited at the furthest limits of the Neolithic revolution and standing at the confluence of the two great sea routes of prehistory Britain and Ireland are distinct from continental Europe for much of the prehistoric sequence In this landmark 2007 study the first significant survey of the archaeology of Britain and Ireland for twenty years Richard Bradley offers an interpretation of the unique archaeological record of these islands based on a wealth of current and largely unpublished data Bradley surveys the entire archaeological sequence over a 4 000 year period from the adoption of agriculture in the Neolithic period to the discovery of Britain and Ireland by travellers from the Mediterranean during the later pre Roman Iron Age Significantly this is the first modern account to treat Britain and Ireland on equal terms offering a detailed interpretation of the prehistory of both islands

The Bioarchaeology of Ritual and Religion Alexandra Livarda, Richard Madgwick, Santiago Riera Mora, 2017-12-21 The Bioarchaeology of Ritual and Religion is the first volume dedicated to exploring ritual and religious practice in past societies from a variety of environmental remains Building on recent debates surrounding for instance performance materiality and the false dichotomy between ritualistic and secular behavior this book investigates notions of ritual and religion through the lens of perishable material culture Research centering on bioarchaeological evidence and drawing on methods from archaeological science has traditionally focused on functional questions surrounding environment and economy However recent years have seen an increased recognition of the under exploited potential for scientific data to

provide detailed information relating to ritual and religious practice This volume explores the diverse roles of plant animal and other organic remains in ritual and religion as foods offerings sensory or healing mediums grave goods and worked artifacts It also provides insights into how archaeological science can shed light on the reconstruction of ritual processes and the framing of rituals The 14 papers showcase current and new approaches in the investigation of bioarchaeological evidence for elucidating complex social issues and worldviews The case studies are intentionally broad encompassing a range of sub disciplines of bioarchaeology including archaeobotany anthracology palynology micromorphology geoarchaeology zooarchaeology including avian and worked bone studies archaeomalacology and organic residue analysis The temporal and geographical coverage is equally wide extending across Europe from the Mediterranean and Aegean to the Baltic and North Atlantic regions and from the Mesolithic to the medieval period The volume also includes a discursive paper by Prof Brian Hayden who suggests a different interpretative framework of archaeological contexts and rituals

When We Are Human John Zerzan, 2021-07-13 These are dark and darkening times challenging us to look deeper to grasp the roots and dynamics of the looming civilizational crisis Chronic illness of the planet calls for radically new thinking if there is to be any hope of renewal When We Are Human offers thought at a necessary and primal level All previous civilizations have failed and now there s just one global civilization which is starkly grandly failing To deny or avoid this fact is to remain in the sphere of the superficial the irrelevant The physical environment is reaching the catastrophe stage as the seas warm rise acidify and fill with plastics Icebergs ahead and floating past beachgoers idly watching the planet die So much is failing so much is interrelated in the technosphere of ever greater dependence and estrangement Social existence now strangely isolated is beset by mass shootings rising suicide rates slipping longevity loneliness anxiety and the maddening stream of lies and concocted politics Zerzan trains his passionate focus on several fields of discourse anthropology history philosophy technology psychology and the spiritual Points of light that become a kaleidoscope refracting new insights and contributing an overall picture of late civilization

The Routledge Handbook of the Bioarchaeology of Human Conflict Christopher Knüsel, Martin Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the

remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development
