Science and the Christian Experiment Arthur Robert Peacocke, 1971 *The God Experiment* Russell Stannard, 1999

The Blackwell Companion to Science and Christianity J. B. Stump, Alan G. Padgett, 2012-03-12 A cutting edge survey of contemporary thought at the intersection of science and Christianity Provides a cutting edge survey of the central ideas at play at the intersection of science and Christianity through 54 original articles by world leading scholars and rising stars in the discipline Focuses on Christianity's interaction with Science to offer a fine grained analysis of issues such as multiverse theories in cosmology convergence in evolution Intelligent Design natural theology human consciousness artificial intelligence free will miracles and the Trinity amongst many others Addresses major historical developments in the relationship between science and Christianity including Christian patristics the scientific revolution the reception of Darwin and twentieth century fundamentalism Divided into 9 Parts Historical Episodes Methodology Natural Theology Cosmology Evolution The Human Sciences Christian Bioethics Metaphysical Implications The Mind Theology and Significant Figures of the 20th Century Includes diverse perspectives and broadens the conversation from the Anglocentric tradition **Thought Experiments, Science, and Theology** Yiftach Fehige, 2023-10-30 Did Adam have a navel Did Adam and Eve have sex Is God merely a fictional character like Superman Without thought experiments like these the field of science and religion would be severely impoverished Thought experiments are exercises of the imagination Like in many other disciplines the imagination has not received the attention it deserves in theology This book argues that the imagination must be taken seriously as an engine for progress It offers a theology of the imagination that is consistent with and goes beyond existing discussions about pluralism at the intersection of science and religion *History of Magic and Experimental Science (Vol. 1&2)* Lynn Thorndike, 2023-12-26 Lynn Thorndike's seminal work *History of Magic and Experimental Science* Volumes 1 2 is a groundbreaking exploration of the intricate interplay between magic alchemy and the nascent field of experimental science from antiquity to the Renaissance Thorndike employs a meticulous historical approach blending rigorous scholarship with an engaging narrative style that brings to life the evolution of scientific thought The two volumes cover a spectrum of practices and beliefs dissecting how magical traditions laid the groundwork for what would eventually become modern scientific inquiry thus situating magic at the crux of intellectual history Thorndike a prominent historian of science in the early 20th century drew on his extensive background in both philosophy and history to illuminate the often overlooked connections between magic and science His deep interest in the historical roots of scientific practices coupled with a conviction that understanding these roots is crucial for comprehending modern science propelled him to undertake this ambitious project His work challenges the prevailing narrative that dismisses magic as mere superstition instead arguing for its essential role in shaping scientific minds This two volume set is invaluable for scholars students and anyone intrigued by the foundations of scientific thought Thorndike's intricate narrative not only enriches our understanding of history but also encourages readers

to reassess the boundaries between magic and science It is a must read for those who wish to grasp the profound interrelation of cultural beliefs and scientific advancement Dictionary of Christianity and Science Zondervan,2017-04-25

Feng Shui: Teaching About Science and Pseudoscience Michael R. Matthews,2019-07-18 This book provides a richly documented account of the historical cultural philosophical and practical dimensions of feng shui It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims and that this examination provides

opportunities for students to better learn about the key features of the nature of science the demarcation of science and non science the characteristics of pseudoscience and the engagement of science with culture and worldviews The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal Feng shui is a deeply entrenched three millennia old system of Asian beliefs and practices about nature architecture health and divination that has garnered a growing presence outside of Asia It is part of a comprehensive and ancient worldview built around belief in chi qi the putative universal energy or life force that animates all existence the cosmos the solar system the earth and human bodies Harmonious living requires building in accord with local chi streams good health requires replenishment and manipulation of internal chi flow and a beneficent afterlife is enhanced when buried in conformity with chi directions Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture tai chi and qigong exercise and herbal dietary supplements Matthews has produced another tour de force that will repay close study by students scientists and all those concerned to understand science culture and the science culture nexus Harvey Siegel Philosophy University of Miami USA With great erudition and even greater fluidity of style Matthews introduces us to this now world wide belief system Michael Ruse Philosophy Florida State University USA The book is one of the best research works published on Feng Shui Wang Youjun Philosophy Shanghai Normal University China The history is fascinating The analysis makes an important contribution to science literature James Alcock Psychology York University Canada This book provides an in depth study of Feng Shui in different periods considering its philosophical historical and educational dimensions especially from a perspective of the demarcation problem between science and pseudoscience Yao Dazhi Chinese Academy of Sciences China

The Social Scientific Study of Exorcism in

Christianity Giuseppe Giordan,Adam Possamai,2020-06-01 This book presents an academic analysis of exorcism in Christianity It not only explores the crisis and drama of a single individual in a fight against demonic possession but also looks at the broader implications for the society in which the possessed lives In recognition of this coverage includes case studies from various geographical areas in Europe North and South America and Oceania The contributors explore the growing significance of the rite of exorcism both in its more structured format within traditional Christian religions as well as in the less controlled and structured forms in the rites of deliverance within Neopentecostal movements They examine theories on the interaction between religion magic and science to present new and groundbreaking data on exorcism The fight against demonic possession underlines the way in which changes within the religious field such as the rediscovery of typical practices of popular religiosity challenge the expectations of the theory of secularization This book argues that if possession is a threat to the individual and to the equilibrium of the social order the ritual of exorcism is able to re establish a balance and an order through the power of the exorcist This does not happen in a social vacuum but in a consumer culture where religious groups market themselves against other faiths This book appeals to researchers in the field

Paths from

Science Towards God Arthur R. Peacocke, 2013-10-01 Author is winner of 2001 Templeton Prize for Progress in Religion worth 1 million dollars By applying the principles of scientific thought to theological matters Arthur Peacocke argues that the divine principle is at work behind all aspects of existence both spiritual and physical This study tackles head on such fundamental issues as how evolution can be reconciled with creation and the relationship between Newton causality and divine action He concludes with an optimistic new theology for our brave new world *God, Life, and the Cosmos* Ted Peters, Muzaffar Iqbal, Syed Nomanul Haq, 2017-03-02 God Life and the Cosmos Christian and Islamic Perspectives is the first book in which Christian and Muslim scholars explore the frontiers of science religion discourse Leading international scholars present new work on key issues in science and religion from Christian and Islamic perspectives Following an introduction by the editors the book is divided into three sections the first explores the philosophical issues in science religion discourse the second examines cosmology the third analyses the issues surrounding bioethics One of the first books to explore aspects of science religion discourse from the perspective of two religious traditions God Life and the Cosmos opens up new vistas to all interested in science and religion and those exploring contemporary issues in Christianity and Islam Scientific Aspects of Christian Evidences George Frederick Wright, 1898 *Evolution* Arthur Peacocke, 2004-11-30 Arthur Peacocke eminent priest scientist has collected thirteen of his essays for this volume Previously published in various academic journals and edited books the provocative essays expand upon the theme of the evolution of nature humanity and belief They are grouped into three parts Natural Evolution covers topics ranging from the implications of deterministic chaos biological evolution and Christian theology chance potentiality and God complexity emergence and divine creativity Humanity Evolving in the Presence of God articulating God's presence in and to the world as it is unveiled by the sciences the chrysalis of the human the nature and purpose of man in science and Christian theology Theological Evolution the Reshaping of Belief dealing with science and the future of theology public truth in religion the incarnation of the self expressive word of God DNA and the challenges and possibilities of western theism In the epilogue Dr Peacocke discusses wisdom in science and education referring to Robert Grosseteste a medieval scientist theologian **Proceedings of the Twenty-second Annual Conference of the Cognitive Science Society** Lila R. science In a scientific culture how do we still meaningfully talk of the Biblical conception of God creating the world What are the natural cosmic and secular implications of the summit points of Christian revelation like the Holy Trinity the Incarnation Eschatology etc What are the scientific nuances of the theological vision of the human nature as imago Dei These are some the questions addressed in the book **A History of Magic and Experimental Science: The first thirteen centuries of our era** Lynn Thorndike,1923 This is a new release of the original 1923 edition Thought Experiments in Science, Philosophy, and the Arts Melanie Frappier,Letitia Meynell,James Robert Brown,2012-09-10 From Lucretius throwing a spear beyond the boundary of the universe to Einstein racing against a beam of light thought experiments stand as a fascinating challenge to the necessity of data in the empirical sciences Are these experiments conducted uniquely in our imagination simply rhetorical devices or communication tools or are they an essential part of scientific practice This volume surveys the current state of the debate and explores new avenues of research into the epistemology of thought experiments **Ethics and Experiments** Scott Desposato,2015-12-22 For most of political science s history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development **Experiments on Embryos** Anthony Dyson,John Harris,2012-10-12 Covering scientific legal ethical historical theological and public policy aspects of human embryo research the cases for and against are put strongly and clearly Scientific evidence is cogently presented by leading embryologists **The Study of Science and Religion** Carl Reinhold Brakenhielm,2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological

studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction
