Porter, 2021-06-08 Three problems in the life of the church 1 For the past millennium theologians have done a brisk trade in proofs arguments for the so called existence of God the validity of the Christian faith and so on I think this is a mistake Christianity is a choice 2 Typical Christian theology begins with Jesus rather than with the Common Documents the documents shared in common by Christianity and rabbinic Judaism This is Marcionite Theology so called for a second century figure who wanted to delete the Common Documents from the Bible

Many problems in theology become much more tractable if the Common Documents the Exodus focally are treated as a model rather than as a mere prologue to the New Testament 3 There are problems with God interfering with nature and they have become worse with modern science God interfering with nature doesn't just injure the sciences it also generates serious pathologies in theology The theme is choices made by the church and the book is called The Accountant's Tale because somebody once asked an accountant What is two times two and got the answer What do you want it to be *The Scientist as Philosopher* Friedel Weinert,2005-10-18 How do major scientific discoveries reshape their originators and our own sense of reality and concept of the physical world The Scientist as Philosopher explores the interaction between physics and philosophy Clearly written and well illustrated the book first places the scientist philosophers in the limelight as we learn how their great scientific discoveries forced them to reconsider the time honored notions with which science had described the natural world Then the book explains that what we understand by nature and science have undergone fundamental conceptual changes as a result of the discoveries of electromagnetism thermodynamics and atomic structure Even more dramatically the quantum theory and special theory of relativity questioned traditional assumptions about causation and the passage of time The author concludes that the dance between science and philosophy is an evolutionary process which will keep them forever entwined **Striving for Excellence** ,1991 Beyond the Mechanical Universe Richard P.
