The major themes include problems associated with capitalism a proposed socialist solution of a nationalisation of all industry the use of an industrial army to organize production and distribution as well as how to ensure free cultural production under such conditions The young man readily finds a guide Doctor Leete who shows him around and explains all the advances of this new age including drastically reduced working hours for people performing menial jobs and almost instantaneous Internet like delivery of goods Everyone retires with full benefits at age 45 and may eat in any of the public kitchens The productive capacity of America is nationally owned and the goods of society are equally distributed to its citizens A considerable portion of the book is dialogue between Leete and West wherein West expresses his confusion about how the future society works and Leete explains
