Looking At The Overlooked:

Looking at the Overlooked Norman Bryson, 1990 Historically and culturally the societies that produced still life painting could hardly be more diverse What is it then that allows us to place such different types of image in a single category Norman Bryson argues that the family resemblances between the different types of still life stem from their common portrayal of a level of material culture that retains its fundamental outlines through long spans of time and across the boundaries and divisions of national culture the culture of domestic routine and the rituals of hospitality How this low plane reality is historically viewed and inflected by the higher levels and discourses of the surrounding culture is the fundamental subject of this book

Looking at the Overlooked Norman Bryson, 1995 *Charles Sheeler* Mark Rawlinson, 2020-09-08 Charles Sheeler was the stark poet of the machine age Photographer of the Ford Motor Company and founder of the painting movement Precisionism he is remembered as a promoter of and apologist for the industrialised capitalist ethic This major new rethink of one of the key figures of American modernism argues that Sheeler's true relationship to progress was in fact highly negative his precisionism both skewed and imprecise Covering the entire oeuvre from photography to painting and drawing attention to the inconsistencies curiosities and puzzles embedded in Sheeler's work Rawlinson reveals a profound critique of the processes of rationalisation and the conditions of modernity The book argues finally for a re-evaluation of Sheeler's often dismissed late work which it suggests may only be understood through a radical shift in our understanding of the work of this prominent figure

The Insectile and the Deconstruction of the Non/Human Fabienne Collignon, 2022-12-30 *The Insectile and the Deconstruction of the Non Human* defines conceptualizes and evaluates the insectile pertaining to an entomological fascination in relation to subject formation The book is driven by a central dynamic between form and formlessness further staging an investigation of the phenomenon of fascination using Lacanian psychoanalysis suggesting that the psychodrama of subject formation plays itself out entomologically The book's engagement with the insectile its enactments cultural dreamwork fantasy transformations in forming the so-called human subject undertakes a broader deconstruction of said subject and demonstrates the foundational but occluded role of the insectile in subject formation It tracks the insectile across the archives of psychoanalysis seventeenth century still life painting novels from the nineteenth century to the present day and post 1970s film *The Insectile*

and the Deconstruction of the Non Human will be of interest for scholars graduate students and upper level undergraduates in film studies visual culture popular culture cultural and literary studies comparative literature and critical theory offering the insectile as new category for theoretical thought **Staging Blackness** Priscilla Dionne Layne, Lily

Tonger-Erk, 2024-05-16 *Staging Blackness* provides a multifaceted look at how Blackness has been staged in Germany from the eighteenth century the birth of German national theater until the present In recent years the German stage has been at the forefront of discussions about race from cases of blackface to fights for better representation within the professional community These debates frequently invoke larger discussions about the politics of race in German theater and their origins and beyond Written by scholars and theater professionals with a wide variety of historical and theoretical expertise the chapters seek to explore the connections between the German discourse on national theater and emerging ideas about race analyze how dramaturges deal with older representations of Blackness in current productions and discuss the contributions Black German playwrights and dramaturges have made to this discourse Historians question how these plays were staged in their time while cultural studies scholars contemplate how to interpret the function of race in these plays and how they can continue to be staged today *Staging Blackness and Performing Whiteness in Eighteenth-Century German Drama* Wendy

Sutherland, 2017-05-15 Focusing on eighteenth century cultural productions Wendy Sutherland examines how representations of race in philosophy anthropology aesthetics drama and court painting influenced the construction of a white bourgeois German self Sutherland positions her work within the framework of the transatlantic slave trade showing that slavery colonialism and the triangular trade between Europe West Africa and the Caribbean function as the global stage on which German bourgeois dramas by Friedrich Wilhelm Ziegler Ernst Lorenz Rathlef and Theodor Körner and a novella by Heinrich von Kleist on which Körner's play was based were performed against a backdrop of philosophical and anthropological influences Plays had an important role in educating the rising bourgeois class in morality Sutherland argues with fathers and daughters offered as exemplary moral figures in contrast to the depraved aristocracy At the same time black female protagonists in nontraditional dramas represent the boundaries of physical beauty and marriage eligibility while also complicating ideas of moral beauty embodied in the concept of the beautiful soul Her book offers convincing evidence that the eighteenth century German stage grappled with the representation of blackness during the Age of Goethe even though the German states were neither colonial powers nor direct participants in the slave trade **Caterpillars** Harry

Berger, 2011 *It is rapacitas* Caterpillars also explores the impact of this message on the meaning of the genre's French name We use the conventional term nature morte dead nature without giving any thought to how misleading it is Because so many portraits of still in bloom are dying it would be more accurate to name the genre nature mourant The subjects of still life are plants that are still living plants that are dying but not yet dead Book Jacket [The Routledge Handbook of Architecture,](#)

relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
