Olmsted,2009-01-02 Many Americans believe that their own government is guilty of shocking crimes Government agents shot the president They faked the moon landing They stood by and allowed the murders of 2 400 servicemen in Hawaii Although paranoia has been a feature of the American scene since the birth of the Republic in Real Enemies Kathryn Olmsted shows that it was only in the twentieth century that strange and unlikely conspiracy theories became central to American politics In particular she posits World War I as a critical turning point and shows that as the federal bureaucracy expanded Americans grew more fearful of the government itself the military the intelligence community and even the President Analyzing the wide spread suspicions surrounding such events as Pearl Harbor the JFK assassination Watergate and 9 11 Olmsted sheds light on why so many Americans believe that their government conspires against them why more people believe these theories over time and how real conspiracies such as the infamous Northwoods plan have fueled our paranoia about the governments we ourselves elect Mediated Geographies and Geographies of Media Susan P. Mains,Julie Cupples,Chris Lukinbeal,2015-10-12 This is the first comprehensive volume to explore and engage with current trends in Geographies of Media research It reviews how conceptualizations of mediated geographies have evolved Followed by an examination of diverse media contexts and locales the book illustrates key issues through the integration of theoretical and empirical case studies and reflects on the future challenges and opportunities faced by scholars in this field The contributions by an international team of experts in the field address theoretical perspectives on mediated geographies methodological challenges and opportunities posed by geographies of media the role and significance of different media forms and organizations in relation to socio spatial relations the dynamism of media in local global relations and in depth case studies of mediated locales Given the theoretical and methodological diversity of this book it will provide an important reference for geographers and other interdisciplinary scholars working in cultural and media studies researchers in environmental studies sociology visual anthropology new technologies and political science who seek to understand and explore the interconnections of media space and place through the examples of specific practices and settings Transmedia Geographies Kevin Glynn,Julie Cupples,2025 Looking at the US New Zealand and Central America this book considers how cultural politics has been deeply reworked in our contemporary media environment The authors analyze how

rampant technological convergence has allowed stories to spill across media platforms as well as geographical borders and how those stories reemerge as transmediated events The authors explore the cultural politics that have developed within this new media environment by moving across the mediated landscapes of the first third and fourth Indigenous people s worlds which are deeply intertwined and interconnected under contemporary conditions of neoliberal globalization and emergent regimes of authoritarian postdemocracy The book attends both to the platforms and digital networks of the new media environment and to the cultural forms and practices that have constituted television as the dominant medium of communication throughout the second half of the twentieth century In the new media environment transmediation works on behalf not only of those corporate megaconglomerates that have become all too familiar to media consumers around the world but also of many communities that have previously been excluded from access to the means of electronic textual production and circulation For the latter grassroots transmediation has become an important technique for the production of cultural citizenship
