**Love Disconsolated** Timothy P. Jackson, 1999-11-25 Few concepts are more central to ethics than love but none is more subject to false consolation This 1999 book explores several theological philosophical and literary accounts of love focusing on how it relates to matters such as self interest and self sacrifice and invulnerability and immortality Timothy Jackson first considers key aspects of what the Bible says about love then he further examines the meaning of love and sacrifice through a close reading of novels by Fitzgerald and Hemingway Lastly he evaluates how love constrains and is constrained by other traditional moral concepts Throughout Jackson defends

the moral priority of what the Christian tradition calls agape He argues that a proper understanding of agapic love rejects both moral relativism and the comfort of believing that good people cannot be harmed or that God causally necessitates every historical action and event When love is thus disconsolated it neither fears death nor despises life *Word(s)*

**Einstein in Love** Dennis Overbye,2001-10-01 In Einstein in Love Dennis Overbye has written the first profile of the great scientist to focus exclusively on his early adulthood when his major discoveries were made It reveals Einstein to be very much a young man of his time draft dodger self styled bohemian poet violinist and cocky charismatic genius who left personal and professional chaos in his wake Drawing upon hundreds of unpublished letters and a decade of research Einstein in Love is a penetrating portrait of the modern era s most influential thinker

**Will & Love** Darren Dyck,2023-03-10 Will Love examines four of Shakespeare s love plays Romeo and Juliet Troilus and Cressida Twelfth Night and Antony and Cleopatra in light of the Augustinian psychology at the heart of the theological romance tradition This tradition which Shakespeare inherits from medieval theologian poets such as Boethius Dante Petrarch and Chaucer issues from the idea initially expressed by Augustine in his Confessions that love functions as volitional weight as a kind of magnetism or almost gravitational force that it moves the lover in mysterious ways yet without diminishing his or her agency

Will Love highlights Shakespeare s conception of love in terms of motion and explores the metaphysical ethical psychological and dramatic implications of his doing so

*A Gravity's Rainbow Companion* Steven C. Weisenburger,2011-03-15 Adding some 20 percent to the original content this is a completely updated edition of Steven Weisenburger s indispensable guide to Thomas Pynchon s Gravity s Rainbow Weisenburger takes the reader page by page often line by line through the welter of historical references scientific data cultural fragments anthropological research jokes and puns around which Pynchon wove his story Weisenburger fully annotates Pynchon s use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk drug lingo and military slang as well as the more obscure terminology of black magic

Rosicrucianism and Pavlovian psychology The Companion also reveals the underlying organization of Gravity s Rainbow how the book s myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel

The Companion is keyed to the pages of the principal American editions of Gravity s Rainbow Viking Penguin 1973 Bantam 1974 and the special repaginated Penguin paperback 2000 honoring the novel as one of twenty Great Books of the Twentieth Century

new ones      **Beneath the Surface** Mary McGrath, 2019-01-25 This work emerged out of an intention to discern the primal wounding that left our human species so vulnerable to our own destruction It presents some unique theories about the developmental path of our species that when brought into the present light of discernment hold the potential to resolve their own healing in our common human consciousness      **Practical Theology** Peter Kreeft, 2014-11-20 Saint Thomas Aquinas has been admired throughout the ages for his philosophical brilliance and his theological sanity but author and professor Peter Kreeft thinks the practical spiritual wisdom of Aquinas is just as amazing In this book Kreeft brings together 358 useful everyday insights from Aquinas masterpiece the Summa Theologiae He pairs these easily digestible quotes from the Summa with his own delightfully written commentary in order to answer the kinds of questions real people ask their spiritual directors These 358 passages from the Summa have helped Kreeft in his own struggles to grow closer to the Lord His practical personal and livable advice is the fruit of his labors to apply the insights of Aquinas to his own quest for sanctity happiness and union with God      Selfless Love and Human Flourishing in Paul Tillich and Iris Murdoch Julia T. Meszaros, 2016-03-03 In an age of self affirmation and self assertion selfless love can appear as a threat to the lover s personal well being This perception jars with the Biblical promise that we gain our life through losing it and therefore calls for a theological response In conversation with the Protestant theologian Paul Tillich and the atheistic moral philosopher and novelist Iris Murdoch *Selfless Love and Human Flourishing in Paul Tillich and Iris Murdoch* enquires into the anthropological grounds on which selfless love can be said to build up rather than undermine the lover s self It proposes that while the implausibility of selfless love was furthered by the modern deconstruction of the self both Tillich and Murdoch utilize this very deconstruction towards explicating and restoring the link between selfless love and human flourishing Julia T Meszaros shows that they use the modern diagnosis of the human being s lack of a stable and independent self as manifest in Sartre s existentialism in support of an understanding of the self as relational and fallen This leads them to view a loving orientation away from self and a surrender to the other as critical to the full flourishing of human selfhood In arguing that Tillich and Murdoch defend the link between selfless love and human flourishing through reference to the human being s ontological selflessness Meszaros closely engages S ren Kierkegaard s earlier attempt to keep selfless love and human flourishing in a productive dialectical tension She also examines the breakdown of this tension in the later figures of Anders Nygren Simone Weil and Jean Paul Sartre and addresses the pitfalls of this breakdown Her examination concludes by arguing that the link between selfless love and human flourishing would be strengthened by a more resolute endorsement of a personal God and of the reciprocal nature of selfless love      *The Fire of God's Love* Bob Sorge, 1996-11 This book explores how God is igniting His Bride in this hour with His firey love awakening us to blazing passion for our Beloved Lord Jesus Emerging from the crucible of the firey dealings of God is a Bride who has been purified of all other affections but one her desire for her Beloved the Lord Jesus Look into this furnace of God s love at your own risk It is a fire that consumes all but love Take the time to

come to the passion that blazes on the cross let that love purge you of every defiling desire He intends to capture and possess every part of your being by revealing to you the fire of His love      The Equation of Love José Tiberius, 2020-09-01 Love poems and thoughts about relativity of time metaphysics and the Equation of Love Definition and concept of time Gravity and a new theory of everything In this book perspectives of modern science and metaphysics are combined besides the introduction about the relativity of love there are two titles dedicated to time and the Love Equation and gravity respectively In title II the different definitions of time are discussed emphasizing the subjective origin of the concept and the never ending attempts to obtain its common and objective idea There is a brief discussion about the new concept used by the physics science and more thoroughly the personal conception of metaphysical time and the time line as something real and subjective in contrast to the imaginary nature of time in Modern Physics Title III focuses on the Equation of Love Newton s gravity and its interrelations with Modern Physics and in particular with Einstein s equation of the mass energy equivalence In other words the new theory attempts to replace the correct duality of subjective and objective reality in the realm of philosophy separating them from other let s say imaginary realities It is not to say that imaginary realities are completely incorrect but they do not correspond to the standard common and simpler form of the operation of human logic and as a epistemological result of the scientific method
