Mababaya,2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom s socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general *The Middle East and Brazil* Paul Amar,2014-07-15 Connections between Brazil and the Middle East have a long history but the importance of these interactions has been heightened in recent years by the rise of Brazil as a champion of the global south mass mobilizations in the Arab world and South America and the cultural renaissance of Afro descendant Muslims and Arab ethnic identities in the Americas This groundbreaking collection traces the links between these two regions describes the emergence of new South South solidarities and offers new methodologies for the study of transnationalism global culture and international relations **Uae Yearbook** Ibrahim Al-Abed,Paula Vine,Peter Hellyer,2004-12 Each year this book celebrates achievements of the United Arab Emirates and in so doing it pays tribute to the architect of this stunning success story Sheikh Zayed bin Sultan Al Nahyan the greatly loved and respected founding
