Making England Landscape Of Bedfordshire:

The Hat Industry of Luton and its Buildings Katie Carmichael, David McOmish, David Grech, 2015-04-01 Although perhaps best known today as the home of Vauxhall Motors Luton's industrial roots run much deeper Long before it became associated with motor cars Luton was the centre of ladies hat production in this country a success founded upon the earlier regional industry of straw plaiting Many surrounding towns and villages fed into the industry and helped to make the region globally renowned At its peak in the 1930s the region was producing as many as 70 million hats in a single year however it entered a rapid decline following the Second World War from which it never recovered This has left Luton Dunstable and a number of other local towns with a challenging inheritance of neglected and decaying fragments of a once vital industry This book is intended to be an introduction and guide to the area's historical depth and to its distinctive and varied character seeking to explain the development of the region as the centre of the hatting industry in the south and exploring the lives of the people working there during the nineteenth and early twentieth centuries The historic links between the surviving building stock and the hatting industry are assessed and the book highlights the significance of the surviving fabric and the potential of the historic environment within future conservation and regeneration plans

The English Medieval Landscape Leonard Cantor, 2021-11-30 First published in 1982 The English Medieval Landscape was written to recreate and analyse the development of the major elements of the medieval landscape Illustrated with maps and photographs the book explores the nature of the English landscape between 1066 and 1485 from farms and chases to castles monastic settlements villages roads and more The English Medieval Landscape will appeal to those with an interest in medieval history and British social history

The Making of Oliver Cromwell Ronald Hutton, 2021-08-10 The first volume in a pioneering account of Oliver Cromwell providing a major new interpretation of one of the greatest figures in history Oliver Cromwell 1599 1658 the only English commoner to become the overall head of state is one of the great figures of history but his character was very complex He was at once courageous and devout devious and self serving as a parliamentarian he was devoted to his cause as a soldier he was ruthless Cromwell's speeches and writings surpass in quantity those of any other ruler of England before Victoria and for those seeking to understand him he has usually been taken at his word In this remarkable new work Ronald Hutton untangles the facts from the fiction Cromwell pursuing his devotion to God and cementing his Puritan support base quickly transformed from obscure provincial to military victor At the end of the first English Civil War he was poised to take power Hutton reveals a man who was both genuine in his faith and deliberate in his dishonesty and uncovers the inner workings of the man who has puzzled biographers for centuries

British and Irish Archaeology, 1994 [Interpreting the Landscape](#) Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain's landscape is the result of a chain of

social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved *Kingdom, Civitas, and County* Stephen Rippon, 2018 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English reconquest and replaced with the counties with which we are familiar today Handbook for British and Irish Archaeology, 1997 A one stop truly comprehensive dedicated and reliable sourcebook for archaeology **The Geography of British History** William Hughes, 1863 **An Environmental History of Wildlife in England 1650 - 1950** Tom Williamson, 2013-12-05 Choice Outstanding Academic Title 2014 While few detailed surveys of fauna or flora exist in England from the period before the nineteenth century it is possible to combine the evidence of historical sources ranging from game books diaries churchwardens accounts and even folk songs and our wider knowledge of past land use and landscape with contemporary analyses made by modern natural scientists in order to model the situation at various times and places in the more remote past This timely volume encompasses both rural and urban environments from 1650 to the mid twentieth century drawing on a wide variety of social historical and ecological sources It examines the impact of social and economic organisation on the English landscape biodiversity the agricultural revolution landed estates the coming of large scale industry and the growth of towns and suburbs It also develops an original perspective on the complexity and ambiguity of man animal relationships in this post medieval period **The Making of the English Landscape** William George

Hoskins,1970 Deals with the historical evolution of the English landscape as we know it It dispels the popular belief that the pattern of the land is a result of 18th century enclosures and attributes it instead to a much longer evolution **The child's geography of England** Mark James Barrington- Ward,1885 **Historical Geography: Progress and Prospect** Michael Pacione,2013-01-11 Historical geography has been a major area of activity in recent years Much of the recent work and research findings have been extremely valuable to historians and archaeologists and as background to the study of contemporary geography This reissue first published in 1987 presents an overview of contemporary developments in all the major branches of the discipline As such it provides a valuable introduction to the subject a review of the latest state of the art and a pointer to future research directions New Historical Geography of England H. C. Darby,1973-12-06 Analytic survey of the changing face of England countryside and town from the coming of the Anglo Saxons to 1914 **The Geography of British History: a Geographical Description of the British Islands at Successive Periods from the Earliest Times to the Present Day: with a Sketch of the Commencement of Colonisation on the Part of the English Nation** William HUGHES (F.R.G.S.),1863 **Cultural Transition in the Chilterns and Essex Region, 350 AD to 650 AD** John T. Baker,2006 This comparison of the archaeological evidence from the fourth to seventh centuries AD in the Chilterns and Essex regions focuses on the considerable body of place name data from the area The counties of Hertfordshire Middlesex Essex and parts of Buckinghamshire Bedfordshire and Cambridgeshire are included *The Archaeology of Medieval England and Wales* John Steane,2014-10-30 In the preceding 25 years to this book s publication in 1985 there was an extensive and unprecedented burst of archaeological activity in evidence from below ground deposits above ground structures and artefacts During the boom of the late 1960s and 1970s which led to go much central town redevelopment it was buried remains which yielded the most dramatic information In the recession of the 1980s it was realised that upstanding remains had a lot to offer as well and they were being subject to ever more sophisticated study techniques This book examines those recent developments in archaeology and assesses their bearing on the study of medieval English and Welsh history Taking a series of important themes such as government religion and the countryside the book offers a chronological approach from the coming of the Vikings 850 AD to the Reformation in 1530 This approach focuses on the impact of man on the urban and rural landscape An important text for students of ancient history *Anglo-Saxon England: Volume 28* Michael Lapidge,Malcolm Godden,Simon Keynes,2000-06-22 This volume is framed by articles that throw interesting light on the achievement and reputation of the greatest of Anglo Saxon kings Alfred The Domesday Geography of Eastern England H. C. Darby,2007-02-22 This edition has been considerably revised to take account of further research on this subject and place name identification The treatment of statistics for boroughs has been brought into line with the other volumes in this series a number of maps have been altered and a short section of Vineyards with one new map has been added to the last chapter **-Geography.
